

Contents

<i>Preface</i>	<i>page vii</i>	8 Prevention of infectious disease	186
1 Emerging medical technologies: high stakes science and the need for technology assessment	i	9 Ethics of clinical research	229
2 Bioengineering and technology assessment	21	10 Technologies for early detection and prevention of cancer	248
3 Health and economic data: a global comparison	31	11 Cost effectiveness of screening for disease	305
4 World health and global health challenges	54	12 Technologies for treatment of heart disease	320
5 Healthcare systems: a global comparison	113	13 Clinical trial design and sample size calculation	356
6 Healthcare costs vs. time: trends and drivers	135	14 Technology diffusion	368
7 The evolution of technology: scientific method, engineering design, and translational research	149	15 Regulation of healthcare technologies	376
		16 Future of bioengineering and world health	398
		<i>Index</i>	405
