transitions, Markov chains, 46
transmission rate, 216, 253
transport control protocol (TCP), 12–14
trellis diagrams, 313
triangle inequality, 161, 178
truncated random processes, 257, 258
T-spaced sinc-weighted sinusoid expansion, 111,
113, 127, 132, 148
typical sets, 41
ultra-wide-band modulation (UWB), 184
uncertainty of a random symbol, 36
uniform distribution, 77
uniform scalar quantizers, 75, 84
entropy, 79
high rate, 78
mean-square distortion, 79
uniform vector quantizers, 76, 82, 83
union bound, 137, 140, 145
uniquely decodable sources, 17, 20
unitary matrix, 256
universal data compression, 51
uplinks, 332, 334
variable-length codes, 19
variable-length source coding, 55
variable-to-fixed codes, 44
variable-to-variable codes, 44
vector quantizers, 81, 84, 87
vector spaces, 153–180
vector subspaces, 162
vectors, 153
basis, 157
length, 158, 159
orthogonal, 158, 180
orthonormal, 163, 178
unit, 156
see also random vectors
Viterbi algorithm, 315–317
Viterbi decoder, 381
voice processing, 68, 94, 112, 359
Voronoi regions, 73, 74
Walsh functions, 384
water filling, 360
waveforms see analog waveform sources; \( \mathcal{L}_2 \) functions
wavelength cellular systems, 334
weak law of large numbers (WLLN), 38, 41
weakly typical sets, 64
white Gaussian noise, 244–247
see also additive Gaussian noise; Gaussian noise; Gaussian processes
wide-sense stationary (WSS) processes, 236, 242, 259, 260
wireless, history of, 330
wireless channels
bandpass models, 389
discrete-time models, 389
input-output modelling, 341
physical modelling, 334
power requirements, 359
probabilistic models, 356, 389
wireless LANs, 332
wireline channels, imperfections, 185
\( \mathbb{Z} \), the integers, 94
zero-mean Gaussian processes
covariance function, 220–221
definition, 223
filter output, 234
as orthonormal expansions, 232, 233
stationary, 235
zero-mean Gaussian random variables, 219, 222
zero-mean Gaussian random vectors, 227, 228, 230, 250
zero-mean jointly Gaussian random variables, 222, 250, 254
zero-mean jointly Gaussian random vectors, 224, 230, 250, 254
