|---|----------------|
| Preface   | <i>page xi</i> |
| <b>1 Introduction . . . . .</b>   | <b>1</b>       |
| 1.1 Issues of Vagueness   | 1              |
| 1.2 Vagueness Defined   | 5              |
| 1.3 The Problem of the Fringe   | 6              |
| 1.4 Preview of the Rest of the Book   | 7              |
| 1.5 History and Scope of Fuzzy Logic  | 8              |
| 1.6 Tall People   | 10             |
| 1.7 Exercises   | 10             |
| <b>2 Review of Classical Propositional Logic . . . . .</b>  | <b>12</b>      |
| 2.1 The Language of Classical Propositional Logic   | 12             |
| 2.2 Semantics of Classical Propositional Logic  | 13             |
| 2.3 Normal Forms  | 18             |
| 2.4 An Axiomatic Derivation System for Classical<br>Propositional Logic   | 21             |
| 2.5 Functional Completeness   | 32             |
| 2.6 Decidability  | 35             |
| 2.7 Exercises   | 36             |
| <b>3 Review of Classical First-Order Logic . . . . .</b>  | <b>39</b>      |
| 3.1 The Language of Classical First-Order Logic   | 39             |
| 3.2 Semantics of Classical First-Order Logic  | 42             |
| 3.3 An Axiomatic Derivation System for Classical First-Order Logic  | 49             |
| 3.4 Exercises   | 55             |
| <b>4 Alternative Semantics for Truth-Values and Truth-Functions:<br/>Numeric Truth-Values and Abstract Algebras . . . . .</b> | <b>57</b>      |
| 4.1 Numeric Truth-Values for Classical Logic  | 57             |
| 4.2 Boolean Algebras and Classical Logic  | 59             |
| 4.3 More Results about Boolean Algebras   | 63             |
| 4.4 Exercises   | 69             |

| viii | Contents   |
|------|--|
| 5    | <b>Three-Valued Propositional Logics: Semantics . . . . . 71</b>                               |
| 5.1  | Kleene’s “Strong” Three-Valued Logic 71  |
| 5.2  | Lukasiewicz’s Three-Valued Logic 76  |
| 5.3  | Bochvar’s Three-Valued Logics 80   |
| 5.4  | Evaluating Three-Valued Systems; Quasi-Tautologies<br>and Quasi-Contradictions 84              |
| 5.5  | Normal Forms 89  |
| 5.6  | Questions of Interdefinability between the Systems<br>and Functional Completeness 90           |
| 5.7  | Lukasiewicz’s System Expanded 94   |
| 5.8  | Exercises 96   |
| 6    | <b>Derivation Systems for Three-Valued Propositional Logic . . . . . 100</b>                   |
| 6.1  | An Axiomatic System for Tautologies and Validity<br>in Three-Valued Logic 100                  |
| 6.2  | A Pavelka-Style Derivation System for $L_3$ 114  |
| 6.3  | Exercises 126  |
| 7    | <b>Three-Valued First-Order Logics: Semantics . . . . . 130</b>                                |
| 7.1  | A First-Order Generalization of $L_3$ 130  |
| 7.2  | Quantifiers Based on the Other Three-Valued Systems 137  |
| 7.3  | Tautologies, Validity, and “Quasi-”Semantic Concepts 140                                       |
| 7.4  | Exercises 143  |
| 8    | <b>Derivation Systems for Three-Valued First-Order Logic . . . . . 146</b>                     |
| 8.1  | An Axiomatic System for Tautologies and Validity<br>in Three-Valued First-Order Logic 146      |
| 8.2  | A Pavelka-Style Derivation System for $L_3^\forall$ 153  |
| 8.3  | Exercises 159  |
| 9    | <b>Alternative Semantics for Three-Valued Logic . . . . . 161</b>                              |
| 9.1  | Numeric Truth-Values for Three-Valued Logic 161  |
| 9.2  | Abstract Algebras for $L_3$ , $K_3^S$ , $B_3^I$ , and $B_3^E$ 163                              |
| 9.3  | MV-Algebras 167  |
| 9.4  | Exercises 172  |
| 10   | <b>The Principle of Charity Reconsidered and a New Problem<br/>of the Fringe . . . . . 174</b> |
| 11   | <b>Fuzzy Propositional Logics: Semantics . . . . . 176</b>                                     |
| 11.1 | Fuzzy Sets and Degrees of Truth 176  |
| 11.2 | Lukasiewicz Fuzzy Propositional Logic 178  |
| 11.3 | Tautologies, Contradictions, and Entailment in Fuzzy Logic 180                                 |

| Contents   | ix         |
|--|------------|
| 11.4 <i>N</i> -Tautologies, Degree-Entailment, and <i>N</i> -Degree-Entailment   | 183        |
| 11.5 Fuzzy Consequence   | 190        |
| 11.6 Fuzzy Generalizations of $K^S_3$ , $B^I_3$ , and $B^E_3$ ; the Expressive<br>Power of Fuzzy <sub>L</sub>                | 192        |
| 11.7 T-Norms, T-Conorms, and Implication in Fuzzy Logic  | 194        |
| 11.8 Gödel Fuzzy Propositional Logic   | 199        |
| 11.9 Product Fuzzy Propositional Logic   | 202        |
| 11.10 Fuzzy External Assertion and Negation  | 203        |
| 11.11 Exercises  | 206        |
| <b>12 Fuzzy Algebras . . . . .</b>   | <b>212</b> |
| 12.1 More on MV-Algebras   | 212        |
| 12.2 Residuated Lattices and BL-Algebras   | 214        |
| 12.3 <i>Zero</i> and <i>Unit</i> Projections in Algebraic Structures   | 219        |
| 12.4 Exercises   | 220        |
| <b>13 Derivation Systems for Fuzzy Propositional Logic . . . . .</b>   | <b>223</b> |
| 13.1 An Axiomatic System for Tautologies and Validity in Fuzzy <sub>L</sub>  | 223        |
| 13.2 A Pavelka-Style Derivation System for Fuzzy <sub>L</sub>  | 229        |
| 13.3 An Alternative Axiomatic System for Tautologies and Validity<br>in Fuzzy <sub>L</sub> , Based on BL-Algebras            | 245        |
| 13.4 An Axiomatic System for Tautologies and Validity in Fuzzy <sub>G</sub>  | 249        |
| 13.5 An Axiomatic System for Tautologies and Validity in Fuzzy <sub>P</sub>  | 252        |
| 13.6 Summary: Comparison of Fuzzy <sub>L</sub> , Fuzzy <sub>G</sub> , and Fuzzy <sub>P</sub> and<br>Their Derivation Systems | 254        |
| 13.7 External Assertion Axioms   | 254        |
| 13.8 Exercises   | 256        |
| <b>14 Fuzzy First-Order Logics: Semantics . . . . .</b>  | <b>262</b> |
| 14.1 Fuzzy Interpretations   | 262        |
| 14.2 Łukasiewicz Fuzzy First-Order Logic   | 263        |
| 14.3 Tautologies and Other Semantic Concepts   | 266        |
| 14.4 Łukasiewicz Fuzzy Logic and the Problems of Vagueness   | 268        |
| 14.5 Gödel Fuzzy First-Order Logic   | 278        |
| 14.6 Product Fuzzy First-Order Logic   | 280        |
| 14.7 The Sorites Paradox: Comparison of Fuzzy <sub>L∨</sub> , Fuzzy <sub>G∨</sub> ,<br>and Fuzzy <sub>P∨</sub>               | 282        |
| 14.8 Exercises   | 282        |
| <b>15 Derivation Systems for Fuzzy First-Order Logic . . . . .</b>   | <b>287</b> |
| 15.1 Axiomatic Systems for Fuzzy First-Order Logic: Overview   | 287        |
| 15.2 A Pavelka-Style Derivation System for Fuzzy <sub>L∨</sub>   | 288        |
| 15.3 An Axiomatic Derivation System for Fuzzy <sub>G∨</sub>  | 294        |

| x    | Contents  |
|------|---|
| 15.4 | Combining Fuzzy First-Order Logical Systems; External Assertion 297 |
| 15.5 | Exercises 298   |
| 16   | Extensions of Fuzziness . . . . . 300                               |
| 16.1 | Fuzzy Qualifiers: Hedges 300  |
| 16.2 | Fuzzy “Linguistic” Truth-Values 303                                 |
| 16.3 | Other Fuzzy Extensions of Fuzzy Logic 305                           |
| 16.4 | Exercises 306   |
| 17   | Fuzzy Membership Functions . . . . . 309                            |
| 17.1 | Defining Membership Functions 309                                   |
| 17.2 | Empirical Construction of Membership Functions 312                  |
| 17.3 | Logical Relevance? 313  |
| 17.4 | Exercises 313   |
|      | Appendix: Basics of Countability and Uncountability . . . . . 315   |
|      | Bibliography 321  |
|      | Index 327   |
