accounting practices, role in ethnomethodological studies 4
adjacency pairs (paired actions) 27–8
question–answer pair 35–7
auctions
approaches to the study of economic action 120–2, 137–9
auctioneer’s system of ordering bids 122–6
authenticity of bids 127–31
commission bids 128–31
economic action as social interaction 121–2
establishing and preserving runs 125–6, 131–6
establishing only two bidders at any one time 125–6
incremental structure for bids 123–5
institutional forms of market activities 136–9
interactional organisation 136–9
pace and rhythm of bidding 126
revealing the source and integrity of bids 127–31
social and organisational issues 119–20
audio and/or video records, see recorded materials
Barbiegate, see school board meeting
body movements, significance in interactions 39–41
bureaucratic conduct, ethnomethodological study 19–21
call centres, asymmetries in interactions 37–9
Chair of a meeting
dilemmas associated with the role 58, 61–2
role 33–4
classroom interactions
role of feedback 34–5
turn-taking 34–5
communities of practice
analysis of a dental community of practice 220–1
approaches to study 218–19
centrifugal trajectories 218
critical contributions of peripheral participants 236–40
ethnomethodological approach 219
learning by observation and modelling 221–5
overlapping communities of practice 237–8
participation and peripherality 236–40
professional vision in apprenticeship training 221–5
real-time organisation of action and interaction 220–1
comparative method of conversation analysis 32–3
context, relevance to sequential interactions 28–30
conversation analysis (CA) approach to storytelling in organisations 97–100
comparative method 32–3
organisational discourse approach 9–10
perspective on organisational events 49–50
see also ethnomethodology and conversation analysis (EM/CA)
dental community of practice
analysis 220–1
apprenticeship of UK dental
students 220
approaches to the study of
communities of practice 218–19
centripetal trajectories 218
concept of communities of practice
218–19
critical contributions of peripheral
participants 236–40
ethnomethodological approach 219
interaction between demonstrators
and dental students 221–5
learning by observation and
modelling 221–5
managing uncertainties in front of the
patient 229–32
overlapping communities of practice
237–8
participation and peripherality 236–40
patient orientation to the training
situation 225–9, 232–6
patient’s critical role in community
practices 236–40
patient’s peripheral role in the
community of practice 225–9
peripheral trajectories 237–40
presence of the patient during
assessment and diagnosis 229–32
professional vision in apprenticeship
training 221–5
real-time organisation of action and
interaction 220–1
training and supervision of UK dental
students 220
discursive psychology, perspective on
organisational events 49–50, 52–3
document processing, see standard forms
Durkheim, Émile 14
economic actions, see auctions
embodied properties of work and
organisation 39–41
ethnography 6
ethnomethodological approach
avoidance of imposition of analytic
categorisation 16
focus on mundane or routine
activities 15

Index

guiding assumptions 13–16
practices and procedures that achieve
order 13–15
relevance of each party’s conduct
