

Contents

	<i>Preface</i>	<i>page</i> vii
	<i>List of notation</i>	xii
1	Toward the nanoscale	1
2	Particles and waves	11
	2.1 Introduction	11
	2.2 Classical particles	11
	2.3 Classical waves	13
	2.4 Wave–particle duality	23
	2.5 Closing remarks	28
	2.6 Problems	29
3	Wave mechanics	33
	3.1 Introduction	33
	3.2 The Schrödinger wave equation	33
	3.3 Wave mechanics of particles: selected examples	38
	3.4 Atoms and atomic orbitals	55
	3.5 Closing remarks	62
	3.6 Problems	63
4	Materials for nanoelectronics	65
	4.1 Introduction	65
	4.2 Semiconductors	66
	4.3 Crystal lattices: bonding in crystals	68
	4.4 Electron energy bands	73
	4.5 Semiconductor heterostructures	84
	4.6 Lattice-matched and pseudomorphic heterostructures	87
	4.7 Organic semiconductors	95
	4.8 Carbon nanomaterials: nanotubes and fullerenes	98
	4.9 Closing remarks	104
	4.10 Problems	107

vi	Contents	
5	Growth, fabrication, and measurement techniques for nanostructures	109
	5.1 Introduction	109
	5.2 Bulk crystal and heterostructure growth	110
	5.3 Nanolithography, etching, and other means for fabrication of nanostructures and nanodevices	115
	5.4 Techniques for characterization of nanostructures	120
	5.5 Spontaneous formation and ordering of nanostructures	127
	5.6 Clusters and nanocrystals	134
	5.7 Methods of nanotube growth	136
	5.8 Chemical and biological methods for nanoscale fabrication	141
	5.9 Fabrication of nanoelectromechanical systems	157
	5.10 Closing remarks	161
	5.11 Problems	163
6	Electron transport in semiconductors and nanostructures	165
	6.1 Introduction	165
	6.2 Time and length scales of the electrons in solids	165
	6.3 Statistics of the electrons in solids and nanostructures	172
	6.4 The density of states of electrons in nanostructures	180
	6.5 Electron transport in nanostructures	183
	6.6 Closing remarks	213
	6.7 Problems	215
7	Electrons in traditional low-dimensional structures	218
	7.1 Introduction	218
	7.2 Electrons in quantum wells	218
	7.3 Electrons in quantum wires	228
	7.4 Electrons in quantum dots	231
	7.5 Closing remarks	237
	7.6 Problems	238
8	Nanostructure devices	242
	8.1 Introduction	242
	8.2 Resonant-tunneling diodes	242
	8.3 Field-effect transistors	255
	8.4 Single-electron-transfer devices	269
	8.5 Potential-effect transistors	276
	8.6 Light-emitting diodes and lasers	284
	8.7 Nanoelectromechanical system devices	306
	8.8 Quantum-dot cellular automata	317
	8.9 Closing remarks	321
	<i>Appendix: tables of units</i>	323
	<i>Index</i>	325
