More Information

Index

analogue-to-digital conversion (ADC), 11, 47, 50, 64, 65, 152
Arimoto-Blahut algorithm, 109–111, 117, 118, 152, 153, 312

basilar membrane, 330, 331, 334, 335, 339, 342, 343
Brownian motion, 11, 63, 323, 330, 335, 337–339, 342, 344, 356

carbon nanotubes, 3, 20, 29
Cauchy–Schwarz inequality, 390
channel capacity, 36–38, 65, 66, 69, 100, 102, 105, 106, 109, 111, 113, 148, 292, 309, 310, 312, 326, 327, 340, 356
  binary symmetric channel, 102
  Shannon–Hartley formula, 36, 38, 39, 102, 103, 291
  SSR, 59, 61, 101, 106–111, 113, 117, 118, 120, 124, 125, 133, 150–156, 158–166, 359
  stochastic resonance, 30, 37
cochlear implants, 2, 5, 46, 62, 63, 323, 324, 344, 346–349, 351, 352, 354–357, 360, 361
cochlear nerve, 36, 63, 344, 348, 349, 353–356
coherence function, 314, 337–343, 350
computational neuroscience, 120, 121, 124, 150, 152, 155, 201, 296
correlation coefficient, 18, 27, 30, 167, 171, 176–181, 183–188, 192, 194, 201, 203, 204, 206–210, 212, 220, 228, 231, 234–237, 244–246, 268, 269, 300, 313, 318, 325–327, 337, 359, 380, 381
Cramer–Rao bound, 58, 213–215, 217, 231, 232, 241, 242, 390, 391

DIMUS sonar arrays, 41, 65, 182, 226, 229, 232, 361
distortion, 5, 41, 43, 46, 49, 51, 52, 166, 169, 291, 292
  harmonic, 13, 31, 32
  intermodulation, 31
dithering, 4, 9–13, 28, 52–58, 230, 249, 250

Fisher information, 30, 58, 64, 120, 124, 125, 149–151, 155, 158, 159, 164, 165, 172, 212–218, 221, 241–243, 246, 281, 282, 284, 285, 290, 360, 375, 388, 389
forbidden interval theorem, 20, 29, 30

inner hair cell, 63, 323, 330–332, 335, 337, 343

Jeffrey's prior, 120, 151, 375

linear response theory, 7, 15, 28, 32, 33
Lloyd Method I algorithm, 210, 270–275
Lloyd–Max algorithm, 52, 270
lossy compression or source coding, 3, 49, 67, 68, 121, 158, 166, 167, 171, 233, 291, 292, 296, 309

mean square error distortion, 5, 30, 51, 52, 58, 167–169, 172–174, 176–178, 180, 181, 206, 207, 212, 215, 217–221, 224, 228–234, 240–242, 244–248, 267, 268, 271, 276, 277, 281, 285, 289, 290, 292, 293, 295, 297, 310–312, 315, 359, 360, 386
minimum description length, 165
MMSE distortion, 200–203, 206–208, 220–223, 232, 234, 237, 239, 240, 244, 246, 262, 269–271, 273, 274, 286–288, 294, 312, 315, 316, 319, 320, 359, 385–388
multiplicative noise, 16, 63, 348, 350, 353–357
mutual information, 12, 35, 37–39, 48, 51, 66, 101, 106, 109, 113, 117, 121, 314, 325, 371
  energy constraints, 292, 295, 297–300, 303, 307, 308, 321
  neural coding, 296
  optimal thresholds, 248, 249, 251, 252, 259, 260, 269, 271, 275, 277–279, 281–283, 286, 287, 290, 320, 360
  rate–distortion, 309–311, 315
  SSR, 4, 59, 62–64, 70, 80, 85, 87, 89, 105, 106, 109, 111–114, 117, 118, 120, 123, 125, 127, 131, 135, 148, 161, 163–166, 168, 189, 196, 222, 228, 233, 248, 249, 253, 292–294, 314–316, 319, 358
  stochastic resonance, 19, 28, 30, 36, 60, 61

neurons, 27, 35, 45, 130, 296
  as an excitable system, 17

More Information

neurons (cont)
coding, 32, 34, 35, 110, 124, 130, 152, 155, 292, 296–298, 309
energy efficiency, 64, 291, 292, 297, 298, 304, 305, 307, 308, 321
FitzHugh–Nagumo model, 290, 322
leaky integrate-and-fire model, 61, 349
McCulloch–Pitts model, 2
models, 2, 124, 245, 329
noise, 17, 45, 296, 309
populations, 9, 17, 27, 28, 65, 124, 201, 242, 297, 298, 307–309, 344, 346, 352
sensory, 1, 2, 17, 25, 35, 36, 62, 292, 296, 324, 328, 329, 357
spike trains, 307, 330, 341–343, 350
SSR in, 2, 62, 64, 357
FitzHugh–Nagumo model, 63
Hodgkin–Huxley model, 63
leaky integrate-and-fire model, 63
stochastic resonance in, 1, 2, 6, 7, 16, 17, 28, 45, 62
FitzHugh–Nagumo model, 17, 28
Hodgkin–Huxley model, 18
models, 7, 9, 17, 45
physiological experiments, 2, 7, 9, 17, 18, 45, 337, 338

point density function, 157, 158, 278, 279
power spectral density, 10, 15, 21, 23, 30, 31, 104, 337

rate–distortion, 109, 152, 245, 292, 296, 309–312, 314
optimal thresholds, 320
SSR, 314, 315, 317, 321, 322, 360
relative entropy, 48, 49, 80–82, 118, 121, 146, 147, 150, 151, 156, 158, 159, 161, 165

sensor network, 3
signal-to-noise ratio, 3, 7, 8, 10–12, 14–16, 18, 25, 27, 28, 30–39, 41, 43, 44, 46, 62, 64–66, 103, 171, 172, 174, 209, 211, 224–232, 245, 248, 250, 253, 296, 311, 315, 323, 328, 344, 358
Signal-to-quantization-noise ratio, 51, 167, 171, 172, 176, 178, 179, 225, 226, 228–230, 232, 271–274, 311, 313, 315, 317–319, 359
SNR gains, 32–39, 358
stereocilia, 323, 330–332, 335, 337–339, 342, 343, 356
Stirling's formula, 126, 128, 164
stochastic pooling networks, 60, 64
stochastic resonance
aperiodic (ASR), 7, 12, 17–20, 28, 32, 36–39, 44, 60, 61, 245, 324, 329, 346
applications, 9
array enhanced, 7, 19, 28
bistable systems, 12, 15–18, 20–24, 27, 30, 44
excitable systems, 16, 17, 24, 25

Wiener decoding, 178, 193, 194, 201, 205–210, 212, 231, 234, 236, 237, 239, 243, 244, 246, 268, 314
