The Cambridge Companion to the Symphony

Few genres of the last 250 years have proved so crucial to the course of music history, or so vital to public musical experience, as the symphony. This Companion offers an accessible guide to the historical, analytical and interpretative issues surrounding this major genre of Western music, discussing an extensive variety of works from the eighteenth century to the present day. The book complements a detailed review of the symphony’s history with focussed analytical essays from leading scholars on the symphonic music both of mainstream composers, including Haydn, Mozart and Beethoven, and of recent figures, such as Carter and Berio. With chapters on a comprehensive range of topics, from the symphony’s origins to the politics of its reception in the twentieth century, this is an invaluable resource for anyone with an interest in the history, analysis and performance of the symphonic repertoire.

JULIAN HORTON is Associate Professor and Head of the School of Music at University College Dublin. His research focusses on nineteenth-century instrumental music, with special interests in the symphonies of Anton Bruckner and the analysis of sonata forms. His publications include Bruckner’s Symphonies: Analysis, Reception and Cultural Politics (2004) and chapters and articles in The Cambridge Companion to Bruckner (2004), Music Analysis, Music and Letters and Musical Quarterly.
