

Subject index

This book has a very detailed list of Contents, which makes clear most of the topics discussed. The following index does not duplicate to any extent the material contained there, but adds selected topics that do not emerge from the Contents. References to classical authors can be located from the Index locorum potiorum. Authors or texts with an entry here are usually not comprehensively indexed in the Index locorum potiorum, or else their usage is regarded as worthy of special note.
