Understanding Language through Humor

Students often struggle to understand linguistic concepts through examples of language data provided in class or in texts. Presented with ambiguous information, students frequently respond that they don’t “get it.” The solution is to find an example of humor that relies on the targeted ambiguity. Once they laugh at the joke, they’ve tacitly understood the concept, and then it’s only a matter of explaining why they found it funny. Utilizing cartoons and jokes illustrating linguistic concepts, this book makes it easy to understand these concepts, while keeping the reader’s attention and interest. Organized like a course textbook in linguistics, it covers all the major topics in a typical linguistics survey course, including communication systems, phonetics and phonology, morphemes, words, phrases, sentences, language use, discourses, child language acquisition, and language variation, while avoiding technical terminology.

Stanley Dubinsky is Professor of Linguistics at the University of South Carolina. His primary areas of research are syntax, semantics, and linguistic theory.

Chris Holcomb is an associate professor of English at the University of South Carolina. His primary research interests include histories of rhetoric, humor, discourse analysis, and prose style.
Understanding Language through Humor

STANLEY DUBINSKY AND CHRIS HOLCOMB
This book is dedicated to two special language users, Isaac and Elijah, whose language learning inspired so much of what is contained herein.
## Contents

*Acknowledgements*  
*Introduction*  
*Talking to Garfield: Human and animal communication*  
*Did I hear that right? The sounds of language*  
*Twisted words: Word structure and meaning*  
*Fitting words together: Phrase structure and meaning*  
*Meaning one thing and saying another: Indirect speech and conversational principles*  
*Fitting the pieces together: The structure of discourse*  
*“Kids say the darndest things”: Children acquiring language*  
*Variety is the spice of life: Language variation*  
*Cross-cultural gaffes: Language and culture*  
*The language police: Prescriptivism and standardization*  
*So long, and thanks for all the fish . . .*

Acknowledgements

We would like to thank some of the many people who have been instrumental in making this book possible: the legions of undergraduate students, who have endured the “testing” of language humor in Stan’s Introduction to Linguistics classes; Helen Barton, whose foray into South Carolina led to the conversation that started it all, and whose support and encouragement have been essential throughout; Hannah Peace, who worked tirelessly to copy and catalog Stan’s voluminous file of language humor cartoons; and Sarah Green, who made sure that we had all the pieces in place, so that the book could actually be produced.

Stan would also extend special thanks for help extended to him by: Jing Li, Lan Zhang, and Tan Ye (for help in translating Chinese menus); Brad Warthen (for help in making sense of cartoon syndicate licensing costs); Caroline Heycock (for getting us a photo of men in kilts when we were in dire need of it); and Melanie Bretey (who was able to find me a source for a photo of a yellow stop sign when no one else could).

Chris, for his part, would like to acknowledge the English Department at University of South Carolina for awarding him a Research Professorship which helped him move portions of this book to completion. He would also like to thank two colleagues in particular, Federica K. Clementi and Elaine Chun, for pointing him to materials (both scholarly and humorous) that were incorporated into this book. Federica deserves special thanks for introducing him to the humor of Larry David, who continues to be a source of enjoyment.
