

Index

- Abbot, Francis Ellingwood, 370 & n.1
- Aborigines Protection Society: memorial on proposed South African Confederation, 416–17
- Acland, Theodore D., 448
- Adie, Alexander James, 218, 235 & 236 n.3
- Agassiz, Louis, 80 n., 244 & n. & 244 n.1; glacier theory, 133 n.1, 159, 160, 141 & 147 n.5, 156, 218 & 234 n.6, 227, 363 & n.1
- Agricultural Gazette*: CD, scrofula and in-breeding, 407–8
- Aldabra tortoise, protection of, 394–6
- Alison, Robert Edward, 33 & 35 n.
- Alleloplasis darwini*: CD's discovery of, 39
- Allen, Grant, 426 & n.1
- American Journal of Science and Arts*, 329 n.1
- American Naturalist*: CD, letter on purportedly carnivorous bees, 428 & 429 n.1
- Anderson, James, 329 & 330 nn.1 & 4
- animal breeding: cross-breeding, CD's questionnaire, 91–94 & 94 n.1; feet of otter hounds, 351 & n.1; penguin ducks, length of leg bones, 324
- animal cruelty: CD appeals for abolition of steel traps, 339–90 & 340 n.2
- animal experimentation, 398–9, 441–2, 442–3
- Annals and Magazine of Natural History*: W. Kemp, germination of ceeds in a sand-pit, 177–9
- contributions by CD: Arachnidae, descriptions of, 133; caribbeous insects collected by, 140; CD, discovery of *Lophotus* spp., 128; fertilisation of orchids, 360; fungus collected by, 140; description of ground-beetle, 140; review of G. R. Waterhouse, *Natural history of the mammalia*, 203–5; *Sagitta*, structure and propagation of, 167–71 & 172 n.1; terrestrial Planariae, 179–87 & 187 n.1
- ants: perception in, 381 & n.2
- Athenaeum*, 281 n.1; CD, cut or uncut pages, 353–4 & 354 n.1; CD, defends theory of origin of species, 337; CD, reproductive power of elephants, 358 & n.1; CD, response to [R. Owen's] review of W. B. Carpenter's *Foraminifera*, 334–6 & 336 n.1
- Atlantic dust, 230
- Atriplex*: germination of ceeds found in a sand-pit, 178–9
- Audubon, John James, 380 & 381 n.10
- auriculas: reversion, 312–13
- Autobiography*, 2 n.1, 14 n.2.1, 126 n.1, 319 n.2, 322 n.1, 347 n.1, 364 n.1, 416 n.2, 428 n.1
- Ayrton, Acton Smee, 373 & n.1
- Azara, Felix d', 31 & 32 n.2
- Babington, Charles Cardale, 177 & 179 n.2
- Bachman, John, 363 & 364 n.2
- Bacon, Francis, 219 & 234 n.9
- Baird, William, 251 & n.2
- Baker, Charles, 23 & 30 n.20, 24, 25
- Baker, N., 398
- Bakewell, Robert, 285 & 296 n.14
- Balbi, Gasparo, 37 & 39 n.1
- Balch, Charles Leland, 369 & n.1
- Barbier, Edmond, 427 & n.1
- Baring, Francis Thornhill, 46 & 47 n.5
- Barkley, Henry, 416 & 417 n.2
- Barlett, Abraham Dee, 375 & 376 n.3
- Bary, Anton de, 485 nn.
- Bates, Henry Walter, 334 n.1; *Insect fauna of the Amazon valley*, CD's review of, 330–34
- Bayfield, Henry Wolsey, 212 & 216 n.10
- Beagle* voyage, xv; Atlantic dust, CD's observations of, 191–5; Beagle channel, 151, 158; Beagle Channel, Tierra del Fuego, 66, 131, 132; CD's letters from, 2–14; Cocos-Keeling Islands, 46 n.1; R. FitzRoy, captain, 15, 32, 74, 147, 318; Fuegians on board, 16 & 30 n.3; guanaco, shot for meat, 172; J. S. Henslow recommends to R. FitzRoy, 318; W. Kent, Assistant Surgeon, 203 n.2; C. Martens, draughtsman, 32 n.4; rats and water-casks, 426; T. Sorrell, boatswain, 95 & 96 n.5; J. L. Stokes, naval officer and mate, 188 n.1; B. J. Sullivan, second Lieutenant, 203 n.1; in Tahiti, 18–22; J. Wickham, first Lieutenant, 426 & n.2; J. C. Wickham, First Lieutenant, 426 & n.2. *See also* CD, *Beagle* voyage; *Journal of Researches*

- Beaton, Donald, 307–8 & 308 nn.1 & 5, 309 & 310 n.1, 314–15, 327 & nn.3 & 4, 328 & 329 n.2, 329
- Beaumont, Elie de, 201 n., 229 & n.
- Bechstein, Johann Matthäus, 307 & n.4
- Beechey, Frederick William, 21 & 30 n.15
- bees: and fertilisation of holly, 404; and fertilisation of kidney beans, 267–8; and fertilisation of Papilionaceae, 272–7 & 277 n.1; humble bees, whether fertilised in the air, 316–17; instincts, 378; intercourse between common and Ligurian, 299; purportedly carnivorous, 428; size in Jamaica, 3120, 321; whether differing in parts of Great Britain, 319–20
- Bell, John, 177
- Belt, Thomas, 418 & 419 n.5
- Bemmelen, Adrian Anthoni van, 407 n.1
- Beneke, Friedrich Wilhelm, 456 & n.
- Bennett, Alfred William, 308 & 309 n.1, 360 & nn., 361 & n.1
- Bennett, John Joseph, 283 & 295 n.7
- Bennett, Mary, 416 n.3
- Bentham, George, 281 n.1, 372 & 373 nn.2 & 3
- Berkeley, Miles Joseph, 140, 189–90 & 190 n.1, 275 & 278 n.17, 328, 338; with CD, conducts experiments to discover effect of sea-water on germination of seeds, 258–65
- Bertero, Carlo Giuseppe, 190 & 191 n.3
- Bicknell, Henry, 28 & 31 n.27
- Bienen Zeitung*, 320 n.4
- birds: duration of life, 363 & 364 n.1
- Bischoff, Karl Gustav, 103 n., 104 n.
- Biscoe, John, 95 & 96 n.4
- Bishop, Irving Prescott, 447 & 448 n.3
- Blackadder, Alexander, 64 & 91 n.6, 81
- Blyth, Edward, 429 & 430 n.4
- Boat Memory, 30 n.3
- Bolton, William, 247 & 249 n.3
- Bond, Frederick, 302 & 303 n.1
- Boner, Charles, 367 & nn.1 & 2
- Bonney, George, 449 n.4
- book publishing: cut or uncut pages, 353–4
- bookselling: CD affirms freedom of booksellers to settle retain price, 243
- Bory de Saint-Vincent, J. B. G. M., *Dictionnaire classique d'histoire naturelle*, 3 & 14 n.8
- botany: bees, and fertilisation of kidney beans, 267–8; bees, and fertilisation of Papilionaceae, 272–7 & 277 n.1; carbonate of ammonia, action on chlorophyll-bodies, 453–69; carbonate of ammonia, action on roots of certain plants, 470–86; *Catasetum tridentatum*, sexual forms of, 321 & n.1; climbing plants, movements and habits, 347 & n.1; Cocos-Keeling Island plants, 45–6 & 46 n.1; cross-bred plants, 309–10; cross-fertilisation of papilionaceous flowers, 350–51; *Cytisus scoparius*, fertilisation of, 349; double flowers, origin of, 165–6 & 166 n.1; *Drosera filiformis*, power of, 393; *Drosera*, irritability of, 303; *Epipactis latifolia*, appearance on CD's gravel walk, 338; fertilisation of Cyripediums, 354–5 & 355 n.1; fertilisation of Fumariaceae, 389; fertilisation of wheat, 314–15; fertilisation of winter-flowering plants, 361; fungi collected by CD, 140; illegitimate unions of dimorphic and trimorphic plants, offspring of 356 & n.1; leaves injured by free radiation, 450; legumes, natural crosses, 256; *Linum*, two forms of, 329 & n.1; *Medicago lupulina*, note on, 348; movement of leaves, 443–5; movement of plants, 438–9; botany, nectar-secreting organs of plants, 250; fertilisation of orchids, 300–302 & 302 n.1, 305–6, 315–16, 329–30, 360; *Lythrum salicaria*, sexual relations of three forms of, 345 & n.1; orchids, fertilisation of, 300–302 & 302 n.1, 305–6, 315–16, 329–10, 360; *Oxalis bowei*, flower forms, 348–9; *Pinguicula*, irritability of, 394; pollen, influence on appearance of ceed, 327; pollination by humble-bees, 134–6; pollination by insects and butterflies, 418–19; *Primula*, dimorphism, 322 & n.1; *Primula*, three forms of, 355 & n.1; *Pumilio argyrolepsis*, achenia, 303–5; salt-water and germination of ceeds, 246 & n.1, 247–9, 253–4, 258–65; ceeds, longevity of underground, 251–2 & 252 n.1, 254; self-fertilisation, 361; teasel, contractile filaments, 417–18; unisexual flowers, partial change of sex, 348–9; *Usnea plicata*, CD's description of, 242; variation in flowers, causes of, 312–13; variegated leaves, 175
- Boussingault, Jean Baptiste, 102 n., 115 & n., 118 n.
- Bowen, Augustus Frederick James, 212 & 216 n.10
- Brayley, Edward William, CD's testimonial for, 191 & n.1
- Bree, Charles Robert, 373–4 & 374 n.
- Brent, Bernard Price, 309 & n.5
- Brewster, David, 55 & 91 n.5, 56
- British Association for the Advancement of Science (BAAS): British Museum, management of, 206–8 & 208 n.1; CD, list of cirripedia, 255–6; Edinburgh meeting, 1871, 398; queries respecting the human race, to be addressed to travellers, 128 & n.; Strickland committee, 162 & n.1, 269
- British Medical Journal*: CD, defence of D. Ferrier, 452 & n.1
- British Museum: A. Günther, assistant keeper, Zoological Department, 396 n.1; integrity of collections, 296–7; management of, 206–7 & 208 n.1; purchase of fossils by, 46–7; Natural History collections, proposed severance of, 269–72 & 272 n.1, 278–81 & n.1, 364–5; G. R. Waterhouse, curator, 203 & 205 n.1; A. White, assistant, Zoology Department, 347–8 & 348 n.1
- Bronn, Heinrich Georg, 335 & 337 n.5
- Brown, Robert, 15 n.52, 205 & n.7, 300 & 302 n.3
- Brown-Séguard, Charles Edouard, 448 & n.5
- Brunton, Thomas Lauder, 379 & 390 n.5, 452
- Buch, Christian Leopold, 218 & 234 n.5
- bucket rope: CD seeks advice, 242 & n.1

- Buckland, William, 209 & 216 n.7; glaciation in North Wales, 140 & 147 n.2, 143, 145–6
- Bueno, Cosme, 107 & n. & 124 n.8
- Bulletins de la Société d'Anthropologie de Paris*: CD, letter to J. L. A. de Quatrefages, 340–41
- bumblebees. *See* humble-bees
- Burchell, William John, 31 & 32 n.3
- Burmeister, Karl Hermann Konrad, 345 n.
- Burnes, Alexander, 194 n.
- Burnett, John, 193 n.
- Busby, James, 23 & 30 n.19, 24, 26
- Butler, Arthur Gardiner, 431 & 432 n.2
- Butler, Samuel, 427 & n.1
- butterflies: sexual colours, 430–32
- Byerbach [Edward Beyerbach?], Mr., 106 & 124 n.7
- Bynoe, Benjamin, 158 n.
- Caldcleugh, Alexander: Chilean earthquake, 1835, 35 n., 40 & n., 41, 97 & 123 n.2, 101 & n., 106 & n., 108
- Cambridge, CD's first published word, 1
- Cambridge Philosophical Society, 2 & 14 n.1
- Cambridge Philosophical Transactions*: J. F. Stephens, *Chiasognarthus grantii*, 9 & 15 n.44
- Cambridge University: Greek, memorial advocating removal of from previous examination, 423 & 424 n.1; W. B. Dawkins candidate for Woodwardian Professorship of Geology, 376 & n.1
- Canby, William Marriott, 393 & n.1
- Candolle, Augustin Pyramus de, 166 & 167 n.5, 258 & 265 n.1, 260, 284 & 295 n.9, 287
- carbonate of ammonia: action on chlorophyll-bodies, 453–69; action on roots, 470–86
- Cardwell, Viscount, 398
- Carmarvon, earl of. *See* Molyneux, Henry Howard, earl of Carmarvon
- Carpenter, William Benjamin, *Foraminifera*, 334–6 & 336 n.1
- Catasetum tridentatum*: CD, three remarkable sexual forms, 321 & n.1
- Challenger*, voyage of, 408–9, 433
- Chambers, Robert, 218 & 234 n.8, 337 & n.3
- Chapman, Edward, 448
- Charpentier, Jean de, 80 n., 141, 159
- cirripedia: 'auditory sac', 324–6; fossils, 241; male and complemental male cirripedia, 382–5
- Clarke, George, 25 & 31 n.26
- Clarke, William Branwhite, 193 & n.
- Climbing plants*, 347 n.1
- Clindon, Mr., 28
- Clovis (Clodowig) I, King of the Franks, 254 & n.4
- coastal elevation: Chile, 32–5, 85; Pacific and Indian oceans, 37–9; subsidence in the Pacific, 437–8; volcanic phenomena and, 41–6, 70
- Cobbe, Frances Power, 442 n.1, 443 n.2
- Cobbold, Thomas Spencer, 386 & n.1
- Cocos-Keeling Islands: CD's notes on plants of, 45–6 & 46 n.1
- Coddington, Henry, 235 & 236 n.2
- Coe, Henry, 275 & 278 n.15, 277
- Coghlan, John, 342 & 345 n.3, 344 n.
- Cohn, Ferdinand Julius, 417–18 & 418 n. & n.1, 453 n., 456
- Colaptes campestris* (pampas woodpecker), 365–6
- Colenso, William, 31 n.23
- Coleoptera: collected by Darwin children at Downe, 297 & nn.
- Cook, James, 23 & 30 n.17, 95
- Cooke, Benjamin, 329 n.10
- coral reefs: CD's deductions from study of, 37–9; CD, in *Manual ... for H. M. Navy*, 232–3; CD, query to J. L. Stokes, 191
- Coral reefs*, 39 n.1, 139 n.5, 165 nn.1 & 5, 238 n.; CD's response to C. Maclaren's review of, 162–5
- corallines, 7, 8
- Cordier, Pierre-Louis-Antoine, 96 n.
- Coste, J. J., 100 & n. & 124 n.5
- Cottage Gardener and Country Gentleman*, 308 n.2, 310 n.2; CD, intercourse between common and Ligurian bees, 299
- Cotyledon stolonifera*, 419–20
- Courrejolles, François Gabriel, 107 n., 110 n.
- cowbird. *See* *Molothrus*
- Crick, Francis, 487 n.2
- Crick, Walter Drawbridge, 486 & 487 n.1, 487
- Crocker, Charles William, 312 & n.2, 316 & nn. 1 & 2
- Cross and self-fertilisation*, 348 n.1, 406 n.2, 407
- cross breeding: CD vindicates Gärtner's views on, 327–8; domestic animals, CD's questionnaire, 1839, 91–94 & 94 n.1; fertility of hybrid geese, 429–30; fowls, 308–9; horses, 311; plants, 297–8, 307–8, 309–10; strawberries, 322–3
- cross-fertilisation: Papilionaceae, 350–51
- Crowe, John Rice, 308 & 309 n.2
- Crüger, Hermann, 329 & 330 n.2, 330
- Cuming, Hugh, 196 & 203 n.6
- Cumming, Joseph George, 209 & n. & 216 n.5, 210, 213
- Cuvier, George, 8 & 15 n.39, 222
- Cyclamen persicum*: action of carbonate of ammonia on roots, 480–83
- Cynocephalus*: sexual selection, 400
- Cynopterus niger*: sexual selection, 400
- Cypripedium insigne*: fertilisation of, 354–5 & 355 n.1
- Cytisus scoparius*: fertilisation of, 349
- Dabs, William, 174 n.2
- Dallas, William Sweetland, 427 & 428 n.2
- Darwin Medal, Midland Union of Natural History Societies, 433 & n.1
- Darwin, Anne Elizabeth, 416 n.4
- DARWIN, CHARLES ROBERT
- Beagle* voyage, arachnid collections, 348 n.1; birds of Patagonia, 426 & n.1; caribideous insect collections, 140;

- edible fungi, 189–90; erratic boulders, 79–80, 80 & n., 147–61; fossil collections, 37 n.1; freshwater bivalves, 487; geological work on board ship, 216–34 & 234 n.1; guanaco, habit and meat of, 172–3; J. S. Henslow recommends CD to R. FitzRoy and takes charge of his specimens, 318; J. S. Henslow, recollections of, 317–19; labourers' diet in mines of Chile, 428; letters from published by J. S. Henslow, 2–14 & 14 nn.1 & 2; marine invertebrates, 172 n., 186 n.; microscope, use on board ship, 234–40; observations of arrow worms (*Sagitta*), 167–71 & 172 n.1; pampas woodpecker, 365–6 & 267 n.2; plant collections, Cocos-Keeling Islands, 45–6 & 46 n.1; pocket notebooks, 219 & 234 n.10; reflected in *Manual* for H. M. Navy, 234 n.1; rust in wheat, 176–7
- honours: *Alleloplasis darwinii* named for, 39; Midland Union of Natural History names Darwin Prize in his honour, 433 & n.1; New York Liberal Club, Honorary Member, 369 n.1; Netherlands Zoological Society presents photograph album to, 406–7 & 407 n.1; Oxford University, health prevents from accepting honorary degree, 365 & n.1; Yorkshire Naturalists' Union presents address to, 434
- memorials, co-signatory: Mr Ayrton and Dr Hooker, 373 & n.1; British Museum, management of, 206–8 & 208 n.1; British Museum, proposed severance of natural history collections, 269–72 & 272 n.1, 278–81 & n.1; Cambridge University, previous examination in Greek, 423 & 424 n.1; Council of the Royal Horticultural Society is asked withdrawal of prizes for collection of native plants, 346–7 & 347 nn.; fossils, recommendation that British Museum purchase, 46–7 & 47 n.1; giant tortoise of Aldabra, protection of, 394–6; National Herbaria, 386–8 & 388 n.1; Rolleston memorial fund, 448; proposed South African Confederation, 416–17; zoology of the *Challenger* expedition, 408–9
- personal activities: avoidance of interviews, 420; E. Barbier, conversation with, 427 & n.1; C. Boner, acknowledges books sent by, 367; bucket rope for wells, 242 & n.1, 266; Down Friendly Club, Treasurer's address, 405; Field Land Refuge, acknowledges donations to, 282; health, poor state of, 367; horse riding, 377 & n.3; printed acknowledgement of correspondence, 357 & n.1; tanks and hose, seeks advice, 243–4 & 244 n.2
- prefatory notices: A. Kerner, *Flowers and their unbidden guests*, 420; H. Müller, *Fertilisation of flowers*, 490–91; W. T. Van Dyck, modification of street-dogs by sexual selection, 488–9; A. Weismann, *Studies in the theory of descent*, preface, 452–3
- professional activities: BAAS, committee drawing up queries for travellers concerning the human race, 128 & n.; Geological Society, Secretary, 47 n.6; Royal Society, Royal Medal awarded to J. Richardson, 256–7 & 257 n.1. *See also* CD memorials, co-signatory, *above*
- publications. *See also under titles of books and journals*
- public policy: animal experimentation, 398–9; 441–2, 442–3; animal experimentation, defence of D. Ferrier, 452 & n.1; British Museum, natural history collections, 269–72 & 272 n.1, 278–81 & n.1, 296–7 & 297 n.2, 364–5; bookselling, freedom of booksellers to settle retail price, 243; cut or uncut pages, 353–4 & 354 n.1; infant education, 439–40; Council of the Royal Horticultural Society is asked withdrawal of prizes for collection of native plants, 346–7 & 347 nn.; proposed South African Confederation, 416–17; vermin and traps, 339–40 & 340 n.2; (with R. FitzRoy) missionary activity in Tahiti and New Zealand, 15–30. *See also* memorials, co-signatory *above*
- reviews: H. W. Bates, *Insect fauna of the Amazon valley*, 330–34; G. R. Waterhouse, *Natural history of the mammalia*, 203–5
- scientific interests: ancient gardening, sowing of runner beans, 345 & n.1; animal cross-breeding, questionnaire, 90–93 & 93 n.1; ants, perception, 381 & n.2, 381–2 & 382 n.3; bees, and fertilisation of kidney beans, 267–8; bees, intercourse between common and Ligurian, 299; bees, purportedly carnivorous, 428; bees, size in Jamaica, 320, 321; bees, whether differing in parts of Great Britain, 319–20; biographical sketch of an infant, 409–16; birds, destruction of flowers of primrose, 390–91 & 391 n.1, 391–3; birds, duration of life, 363–4 & 364 n.1; blighted wheat, 176–7; breeding of mouse-coloured ponies, 266; carbonate of ammonia, action on chlorophyll-bodies, 453–69; carbonate of ammonia, action on roots, 470–86; cherry blossom, 399–400; cirripedia, 'auditory sac', 324–6; cirripedia, list of for BAAS, 255–6; cirripedia, males and complementary males, 382–5; climbing plants, movements and habits, 347 & n.1; coastal elevation, Chile, 32–5; coastal elevation and subsidence, Pacific and Indian oceans, 37–9; Cocos-Keeling Island plants, 45–6 & 46 n.1; coral reefs, 37–9, 191; coral reefs, response to C. Maclaren's review, 162–5; *Cotyledon*, growth indoors, 419–20; cross-bred plants, 297–8, 307–8, 309–20; cross-breeding, fowls, 308–9; cross-fertilising papilionaceous flowers, 350–51; Cyripediums, fertilisation of, 354–5 & 355 n.1; *Cytisus scoparius*, note, 348; dimorphism in *Primula*, 322 & n.1; dispersal of freshwater bivalves, 486–7; double flowers, their origin, 165–6 & 166 n.1; drift deposits near Southampton, 436–7; dun horses, 306 & n.1, 308–9, 311; dust, Atlantic ocean, 191–5; edible fungi, Terra del Fuego, 189–90 & 190 n.1; elephants, reproductive power, 358 & n.1, 359 & n.3; erratic boulders, 79–80, 95–6, 128–33 & 133 n.1, 147–61, 208–15 & 215 n.1; expression of the eye, 435; expression, questionnaire, 351–2 & 353 n.1;

DARWIN, CHARLES ROBERT (cont.)

Falkland Islands, geology, 195–202; fertilisation of Fumariaceae, 389; fertilisation of plants, 406; fertilisation of winter-flowering plants, 361; fertility of hybrid geese, 429–30; fertility of organisms, 371; finches, habits of, 32; floating ice, 241; fossil deposits, La Plata, 35–7; fowls, influence of form of brain on character of, 306–7; glaciation in Caernarvonshire, 140–46 & 146 n.1; gladioli, parentage of, 315; Glen Roy roads, formation of, 50–89 & 91 n.1; hedgehogs, 355; holly berries, scarcity of, 403–4, 404; humble-bees, pollination by, 134–6; humble bees, whether fertilised in the air, 316–17; hybrid dianthus, 257 & 258 n.1; icebergs, power to make rectilinear grooves, 244–6; inheritance, 446–8; inherited instinct, 375; insectivorous plants, 393, 394; insects, records of captures, 1829–32, 1–2; instinct, birds, 392; instincts, origin of, 377–81; legumes, natural crossing, 256; *Leschenaultia*, fertilisation of, 309–10, 371–3; manures and steeping ceed, 174–5; marine shells of the Amazon, 363; *Medicago lupulina*, note on, 348; *Megatherium*, discovery of, 4; meteorites, O. Hahn's discovery of fossil organisms in, 449; *Molothrus*, parasitic habits, 451; commends E. S. Morse's work on Omori shell mounds, 432; mosquitoes, 450; CD, moths, do *Tineina* suck flowers?, 302–3; mould, formation of, 48–50, 124–7, 173–4, 357; F. Müller, findings of, 388–9, 418–19, 424–5 & 426 n.5, 438–9, 443–5, 450; nectar-secreting organs of plants, 250; nematodes, 386; orchid, appearance on gravel walk, 338; orchids, fertilisation of, 300–302 & 302 n.1, 305–6, 315–16, 329–30; *Oxalis bowei*, 349–50; pampas woodpecker (*Colaptes campestris*), 365–6 & 267 n.2; CD, Pampean formation, thickness of, 342–5 & 345 n.1; CD, Patagonian fossil beds, 243; Patagonian stone, as volcanic product, 188–9; peas, parentage of crosses, 321–2; penguin ducks, length of leg bones, 324; perception in lower animals, 376–7; pigeons, crosses, 308–9; pigeons, modifications, 340–41; *Pinguicula*, irritability of, 394; Planariae, terrestrial, 179–87 & 187 n.1; Plinian Society, papers contributed to, 364; pollen, influence on appearance of ceed, 327; potato propagation, 397 & n.1; productiveness of foreign ceeds, 268–9; *Pumilio argyrolepis*, achenia, 303–5; records of captured insects, 1829–32, 1–2; reversion, sheep, 434–5; *Rhea* spp., notes on, 31–2; *Sagitta*, structure and propagation of, 167–71; salt of the Rio Negro, 206; salt, action on carbonate of lime, 176; sand lizard, seeks eggs of, 249; sandstone bar at Pernambuco, 137–9; scrofula and in-breeding, 407–8; sea-water, experiments discover effect on germination of ceeds, 246 & n.1, 247–9, 253–4, 258–65; seedling fruit trees, whether true to parents, 254–5; seeds, effect of salt-water on germination of, 246 & n.1, 247–9,

253–4; seeds, vitality of underground, 251–2 & 252 n.1, 253; self-fertilisation, 361; sex ratios in domestic animals, 356; sexual colours of butterflies, 430–32; sexual selection, monkeys, 400–403; shell rain, 250–51; shells, transplantation by aquatic birds, 422–3; strawberries, cross-breeds, 322–3; teasel, contractile filaments, 417–18; termites and stingless bees of Brazil, 388–9; unisexual flowers, partial change of sex, 348–9; *Usnea plicata*, description of, 242; variations effected by cultivation, 323; variegated leaves, 175; vegetarian diet and capacity for labour, 428; vincas, fertilisation of, 311–12, 316, 360; volcanic phenomena and continental elevation, 40–5, 69, 86–7, 97–123 & 123 n.1; volcanic rocks, structure analogous to that of glaciers, 188; yellow rain, 338; zoological nomenclature, 162 & n.1, 269 & n.1

scientific theories: design in nature, 445–6; evolution, origins of theory of, 396; inheritance, 446–7; natural selection, anticipated by P. Matthew, 299 & n.1; natural selection, confidence in adoption of theory of, 337; natural selection, defends in *Spectator*, 374–5; natural selection, origins of theory of, 396; natural selection, response to C. W. Thomson; origin of species, first published reference to, 39 & n.3; origin of species, letter to *Athenaeum* defending, 337; pangenesis, 368–9; pangenesis, reply to F. Delpino's criticisms, 361–3 & 363 n.1; response to [R. Owen's] review of W. B. Carpenter's *Foraminifera*, 334–6; species, sketch of work on (1839), 283 & n., 283–6; *Truths for the times*, qualified endorsement of, 370; variation, laws of, 312–13; defends A. R. Wallace's interpretation of his views, 373–4 & 374 n.

testimonials: E. W. Brayley, 191 & n.1; W. Boyd Dawkins, 376 & n.1; T. H. Huxley, 242 & n.1; A. White, 347–8 & 348 n.1

Darwin, Emma, 405–6 n.1, 449 n.4

Darwin, Erasmus, 427 & n.1

Darwin, Francis, 357 n.1, 405–6 n.1, 418 & 419 n.4, 434 n.1, 438, 449 n.4, 482 n.; action of carbonate of ammonia on chlorophyll-bodies, 453 & 469 n.1; Coleoptera collected at Down, 297 & n.2; contractile filaments of the teasel, 417 & n.; CD endorses paper by, 409; reads CD's papers to Linnean Society, 453, 470

Darwin, George Howard, 359 & nn.2 & 3, 427 n.1

Darwin, Henrietta. *See* Litchfield, Henrietta

Darwin, Horace: Coleoptera collected at Down, 297 & n.2

Darwin, Leonard: Coleoptera collected at Down, 297 & n.2

Darwin, William Erasmus, 370 n.1, 416 n.2

Daubeny, Charles Gildes Bridle, 218 & 234 n.4

Davis, Charles Oliver Bond, 25 & 31 n.26

Davis, Richard, 25 & 31 n.25

Dawkins, William Boyd, 376 & n.1

- Decaisne, Joseph, 254 & 255 n.3
 Delbouef, Joseph Rémi Léopold, 424 & 426 n.3
 Delpino, Giacomo Giuseppe Federico, 361 & n.2, 361–3 & 363 n.1
 Delsarte, François, 435–6 & 436 n.2
Descent, xx, 307 n.3, 309 n.5, 367 n.2, 381 n.10, 400 & 403 nn.1 & 6, 416 n.5, 432 n.2, 488 & n.
 Dick, Thomas Lauder: Glen Roy roads, 50 & 91 n.2, 52, 53, 54, 56, 57, 58 n., 65 n., 69, 70, 71, 72, 81 n., 82, 84, 88
 Dickens, Charles, xix
 Dickins, Frederick Victor, 432 & n.2
Dionaea muscipula: action of carbonate of ammonia on, 457–9, 475
Diplanaria: CD describes new genus, 185–7
Dipsacus: contractile filaments, 417–18
 Disraeli, Benjamin, 282 n.1
 Dixon, Edmund Saul, 429 & 430 n.6
 Dolomieu, Sylvain, 99 n.
 Doubleday, Henry, 371 & n.2
 Douglas, Charles D., 40 & 45 n.2, 98 & 124 n.3, 99, 99–100
 Down Friendly Club, Treasurer's address, 405 & n.1
Drosera: irritability of, 303; *D. filiformis*, 393; *D. rotundifolia*, action of carbonate of ammonia on, 453–5, 459–63, 469, 475
Drosophyllum lusitanicum: action of carbonate of ammonia on, 463–4, 475–6, 484
 Drummond, James, 303 & 305 n.1, 310 & n.6, 372 & 373 n.2
 Dugès, Antoine, 179 & 187 n.3, 180 & n., 181
 Duncan, Peter Martin, 408 & 409 n.1
 dun horses, parentage, 306, 308–9, 311
 Dupuy, Eugène, 448 & n.6
- earthquakes: Chile, 1835, 10, 40–5, 97–123
 earthworms, and production of mould: 48–50, 124–7, 173–4, 357
Earthworms, 50 n., 127 n., 357–8 n.1
Edinburgh New Philosophical Journal: CD, response to C. Maclaren's review of *Coral reefs*, 162–5
 Egerton, Philip Grey, 270
 Ehrenberg, Charles Gottfried, 243; Atlantic dust, constituents of, 191–5 & 194 n., 230 & 234 n.18; Patagonian stone, quotes CD's description of, 188–9; Planariae, 179 & 187 n.4, 180
 Ekmarck, Carl Daniel, 364 & n.3
 El'leparu (York Minster), 30 n.3
 elephants: reproductive power, 358 & n.1, 359 & n.3
 Eliot, George, xix
Eliza Scott, Antarctic voyage, 95
 Elliot, W., 364
 endangered species: Aldabra tortoise, 394–6; Royal Horticultural Society asked withdrawal of prizes for collection of native plants, 346–7 & 347 nn.
 Enderby, Charles, 95 & 96 n.1
 Endlicher, Stephan Friedrich Ladislaus, 438 & 439 n.3
Entomologist's weekly Intelligencer, 302 n.1; Darwin brothers, Coleoptera collected at Down, 297 & n.1; CD, do Tineina suck flowers?, 302–3
 entomology: *Alleloplasis darwinii*, CD's discovery of, 39; Arachnidae, CD's descriptions of, 133–4; arachnids, *Beagle* voyage, 348 n.1; bees, size in Jamaica, 320, 321; bees, whether differing in parts of Great Britain, 319–20; caribideous insects collected by CD, 140; Coleoptera collected by Darwin boys at Down, 297 & n.1; coleopterous insects, CD's collections, 128; CD queries whether Tineina suck flowers, 302–3; CD, records of captured insects, 1829–32, 1–2; CD's review of H. W. Bates, *Insect fauna of the Amazon valley*, 330–34; *Eripus heterogaster*, CD's description of, 134; humble bees, whether fertilised in the air, 316–17; *Linyphia argyrobapta*, CD's description of, 133; *Lophotus* spp., CD's discovery of, 128; mimicry, Amazon insects, 330–34; termites and stingless bees of Brazil, 388–9
 Erichsen, John Eric, 398
 erratic boulders, 79–80, 128–33 & 133 n.1, 147–61, 208–15 & 215 n.1, 227–8; Caermarvonshire, 144–5; distribution in South America, 128–33 & 133 n.1, 147–61
 Eschwege, William Ludwig von, 158 n.
 Euphorbiaceae, action of carbonate of ammonia on, 470–74, 484
 expression: CD's questionnaire, 351–2 & 353 n.1
Expression, 353 n.1, 381 n.2, 436 n.3
 Eyton, Thomas Campbell, 429 & 430 n.1
- Falconer, Hugh, 358 & n.2
 Falkland Islands: geology, 195–202
 Falkner, Thomas, 25 & 31 n.24
 Farrer, Thomas Henry, 418 & 419 n.3
 Ferrier, David, 452 & n.1
 fertilisation of flowers: CD, prefatory notice, H. Müller, *Fertilisation of flowers*, 490–91
The Field, the Farm, the Garden, the Country Gentleman's Newspaper: CD, dun horses, parentage of, 306, 308–9, 311; CD, fowls, influence of form of brain on character of, 306–7
 Field Lane Refuge, 282
 finches, CD, remarks on habits of, 32
 Fischer, Johann von, 400–401 & 403 nn.2 & 3
 Fish, David Taylor, 357 & n.1, 404 & n.2
 Fitch, Walter Hood, 322 n.1
 Fitzinger, Leopold, 13 n.
 FitzRoy, Robert: Captain, H. M. S. *Beagle*, 15, 32, 74, 97 n., 147, 318; Chilean earthquake, 40 & n., 43, 97, 113; *Voyages of Adventure and Beagle*, 100 n., 114 n., 158 nn.; (with CD), missionary activity Tahiti and New Zealand, 15–30
 Foraminifera: CD's response to [R. Owen's] review of W. B. Carpenter's work on, 334–6
 Forbes, Edward, 167 & n., 214 & n., 247 & 249 n.1, 348 n.1

Forbes, James David, 188 & n.2, 221 & 234 n.11
Forms of flowers, 322 n.1, 329 n.1, 345 n.1, 356 n.1, 356 n.1, 419 n.9
Fossil Cirripedia, 241 n.
 fossils: *Beagle* voyage, CD's discoveries, 4, 6, 7; CD and others recommend British Museum's purchase of, 46 & 47 n.2; CD's advice on collection of, 220–22; Falkland Islands, footprints, 222–3; in Pampean formation, 342–5; Lepadidae, 241 & n.1; deposits in La Plata, 35–7; Patagonian fossil beds, 243
 fowls: influence of form of brain on character of, 306–7; Polish, 341, 342; sexual selection, 402
 Fox, Henry Stephen, 157 n.
Fragia: action of carbonate of ammonia on roots, 479
 Frankland, Edward, 392 & 393 n.3
 Freeman, Richard Broke, xxi, xxii
 Friepri, Robert Friedrich, 254 & n.8
 Fuegians, on *Beagle* voyage, 16 & 30 n.3; New Zealand missionaries' interest in, 25–6
 Fumariaceae, fertilisation, 389
 fungi: collected by CD, 139; edible, of Terra del Fuego, 189–90 & 190 n.1
 Galapagos islands, finches, 32; note on lichen, 242; tortoises, 396
Gallus bankiva: cross-breeding, 308–9
 Galton, Francis, 368 & 369 nn.2 & 6
Gardeners' Chronicle and Agricultural Gazette: J. Lindley, editor, 167 n.3
 communications from CD: action of salt on carbonate of lime, 176; ancient gardening, 346 & n.1; appearance of an orchid in a singular place, 338; bees and fertilisation of kidney beans, 267–8; bees, and fertilisation of Papilionaceae, 272–7 & 277 n.1; breeding of mouse-coloured ponies, 266; British Museum, proposed severance of natural history collections, 278–81 & n.1; bucket rope, C242 & n.1; cross-bred plants, whether permanent, 297–8; cross-fertilising papilionaceous flowers, 350–51; double flowers, origin of, 165–6; *Drosera*, irritability of, 303; fertilisation of *Cyripediums*, 354–5 & 355 n.1; fertilisation of *Leschenaultia*, 371–3; fertilisation of orchids by insects, 300–302 & 302 n.1, 305–6, 315–16; fertilisation of vincas, 311–12; fertility of crossed plants, 406; growth under difficulties, 419–20 & n.1; holly berries, scarcity of, 403–3; hose between tanks, 243–4 & 244 n.2; humble-bees, pollination by, 134–6; hybrid dianths, 257 & 258 n.1; kidney beans, crossing of, 275; lizard eggs, 249; manures and steeping ceed, 174–5; natural crossing among legumes, 256 & n.2; natural selection anticipated by P. Matthew, 299 & n.1; nectar-secreting organs of plants, 250; origin of mould, 173–4, 357; *Oxalis bowei*, 349–50; partial change of sex in unisexual flowers, 348–9; peas, parentage of

Index

crosses, 321–2; *Pinguicula*, irritability of, 394; productiveness of foreign ceeds, 268–9; *Pumilio argyrolepis*, achenia, 303–5; rust in wheat in Plata, 176–7; salt of the Rio Negro, 206; ceedling fruit trees, 254–5; ceeds, effect of salt-water on germination of, 246 & n.1, 247–9, 253–4; sex ratios in domestic animals, 356; shell rain in Isle of Wight, 250–51; variegated leaves, 175; vermin and traps, 339–40 & 340 n.2; vincas, 316 & n.2; vitality of seeds, 251–2 & 252 n.1, 254; yellow rain, 338
Gardener's Magazine, 273 & 277 n.6
 Garrett, Edward Lacy, 359 & n.1
 Garner, Robert, 325 & 326 n.6
 Gärtner, Karl Friedrich von, 250 & n.1, 254 & n.2, 257 & 258 n.2, 275, 298 & 299 n.6, 327 & n.1, 329 n.5, 350 & 351 n.2; CD's vindication of, 327–8
 Gaudin, Charles, 201 n.
 Gay, Claude, 9 & 15 n.45, 100 & n.
 Geikie, James, 436 & 437 n.1
 Geological Society: CD, Secretary, 47 n.6; H. Warburton, President, 47 n.2; *Proceedings*. See *Proceedings of the Geological Society*; *Quarterly Journal*. See *Quarterly Journal of the Geological Society of London*
 geology: Atlantic ocean, dust, 191–5; coastal elevation, Chile, 32–5; coastal elevation, Pacific and Indian oceans, 37–9; coral reefs, 37–9, 162–5, 191; Cordilleras, 11; CD, 'Geology', in *Manual ... for H. M. navy*, 216–34 & 234 n.1; drift deposits, Southampton, 436–7 & 437 n.1; erratic boulders, 79–80, 95–6, 128–33 & 133 n.1, 147–61, 208–15 & 215 n.1; Falkland Islands, 195–202; glaciation in Caernarvonshire, 140–46; Glen Roy roads, CD's account of, 50–89 & 91 n.1; icebergs, power to make rectilinear grooves, 244–6; mould, formation of, 48–50, 173–4, 357; Pacific subsidence, 437–8; Pampean formation, thickness of, 342–5 & 345 n.1; salt, action on carbonate of lime, 176; sandstone bar at Pernambuco, 137–9; shell rain, 250–51; volcanic phenomena, South America, 97–123 & 123 n.1; volcanic phenomena, and continental elevations, 40–5, 69; volcanic rocks, structure analogous to that of glaciers, 188
 Gerstaecker, Carl Eduard Adolph, 386 n.3
 Gillies, John, 101 & n.
 gladioli: parentage of, 315
 Gladstone, William Ewart, 364, 373 & n.1, 386
 Glen Roy roads, xvi, 50–89 & 91 n.1
 Godron, Dominique Alexandre, 260 & n., 319 & 321 n.1

- Proceedings of the Royal Society of Edinburgh*: CD, analogy of the structure of some volcanic rocks and glaciers, 188
- Proceedings of the Royal Society of London*: CD announces of award of Royal Medal to J. Richardson,
- Proceedings of the Zoological Society*: notes by CD: Galapagos finches, habits of, 32; pampas woodpecker, 365–6; nematodes, 386; *Rhea* spp., 31–2; preliminary notice, W. T. Van Dyck, modification of street-dogs by sexual selection, 488–9
- Pumilio argyrolepis*, achenia, 303–5
- Quarterly Journal of Microscopical Science*, CD endorses paper by F. Darwin, 409
- Quarterly Journal of the Geological Society of London*, contributions by CD: abstract of paper on Lepadidae, 241 & n.1; dust in the Atlantic ocean, 191–5; erratic boulders, 208–15 & 215 n.1; geology of the Falkland Islands, 195–202; thickness of the Pampean formation, 342–5 & 345 n.1
- Quatrefages de Bréau, Jean Louis Armand, CD letter to, 340–41
- Quenstedt, Friedrich August, 449 & n.3
- Quetelet, Lambert Adolphe Jacques, 385 & 386 n.7
- Quoy, Jean René Constant, 167 & n.
- Rachel, George W., 450 n.7
- Ramsay, Andrew Crombie, 245 n.1
- Reeds, Trenham, 206 & n.3
- Reichenau, Wilhelm von, 488 n.
- Rengger, Johann Rudolf, 489 n.
- reversion: F. Müller’s findings, 424–5
- Rhea* spp., 31–2; nesting habits, 451
- Rice, Thomas Spring, 46 & 47 n.1
- Richardson, John, 145 n., 196 & 203 n.7; Royal Medal awarded to, 256–7 & 257 n.1
- Richter, H. E., 449 & 450 n.6
- Rivers, Thomas, 254 & 255 n.4
- Roebuck, William Denison, 434 & n.1
- Rogers, Henry Darwin, 139 & n.7, 213 & n.
- Rolleston, George: memorial fund, 448 & n.1
- Roma Etrusca*: CD, letter to G. E. Mengozzi on design in nature, 445–6
- Romanes, John, 424 & 426 n.1
- Ross, John Clunies, 46 n.1
- Roussin, Albert René, 193 & n., 138 & 139 n.2
- Royal Botanic Gardens, Kew: national herbaria, 387–8 & 388 n.1
- Royal Commission on animal experimentation, 398–9, 441 & 442 n.3
- Royal Horticultural Society: Council requested to withdraw prizes for collection of native plants, 346–7 & 347 nn.
- Royle, John Forbes, 303 & nn.3 & 4
- Russell, Lord John, 206
- Sabine, Edward, 381 n.8
- Sachs, Ferdinand von, 455 n., 485 n.
- Sagitta*, structure and propagation of, 167–71
- Saint-Hilaire, Étienne Geoffroy de, 337 & n.2
- Salisbury, Richard Anthony, 323 & 324 n.6
- salt, of Rio Negro, 206
- Sanderson, John, Sr, 434–5 & 435 n.1
- Sarcey, Francisque, 427 & n.1
- Sarracenia purpurea*: action of carbonate of ammonia on, 464–5, 475–6
- Savigny, Marie-Jules-César Lelorgne de, 8 & 15 n.41
- Saxifraga umbrosa*: action of carbonate of ammonia on roots, 475
- Scalpellum vulgare*: males and complementary males, 382–5
- Scherzer, Karl von, 353 n.1
- Schmidt, O., 396 & n.1
- Schrenk, Leopold, 429 & n.
- Schulte, Eduard, 430 & 432 n.1
- Schweitzer, Edward G., 258 & 265 n.
- Science*: CD’s response to O. Hahn’s discovery of fossil organisms in meteorites, 449
