Cambridge University Press & Assessment 978-1-009-10852-2 — Understanding Human Metabolism Keith N. Frayn Table of Contents <u>More Information</u>

# Contents

	Foreword Preface Acknowledgements	page xiii xv xix
1	What is Metabolism?	1
'	Metabolism Is a Very Big Subject	1
	Metabolism Developed Very Early in Evolution	2
	Human Metabolism Must Depend upon a Flow of Information	3
	How Did Our Present Views of Metabolism Evolve?	5
	Human Metabolism in a Wider Context	11
	What Is Metabolism? Conclusion	12
2	Metabolic Fuels	13
	Humans, like the Cordless Vacuum Cleaner, Have Fuel Stores	13
	Carbohydrates: The Bread of Metabolism	14
	Fats: The Butter of Metabolism	17
	Carbohydrates and Fats as Fuel Stores	20
	Carbohydrates versus Fats as Fuel Stores	22
	Storing and Mobilising Our Reserves: Just like Making Soap!	23
	Proteins	27
	Fuel Stores and Metabolism	31
3	Metabolic Pathways	32
	The Concept of Metabolic Pathways	32
	Metabolic Pathways Typically Involve Many Small Steps	32
	Enzymes Bring about Metabolic Pathways	34

### Cambridge University Press & Assessment 978-1-009-10852-2 — Understanding Human Metabolism Keith N. Frayn Table of Contents <u>More Information</u>

#### **x** CONTENTS

	Metabolic Pathways Go from the Twentieth to the	
	Twenty-first Century	37
	Metabolic Pathways Underlie any Description of	
	Human Metabolism	42
4	Communication Systems in Human Metabolism	43
	The Need for Communication in Human Metabolism	43
	The Major Communication Systems	44
	It's My Nerves	44
	Hormones Are Remarkable Signals	47
	Hormones and Receptors	50
	There Is a Large Family of G Protein-coupled Receptors	54
	Some Receptors Affect the Synthesis of Proteins from Genes	56
	Metabolism and Hormones Begin to Get Confused	57
5	ATP: The Common Currency of Metabolic Energy	59
	The Idea of an 'Energy Currency'	59
	What Is ATP?	60
	Metabolism and Combustion	62
	Two Ways of Making ATP	62
	Mitochondria	64
	Cellular Location of Metabolic Pathways	65
	Alcohol Metabolism	67
	Fatty Acid Breakdown	67
	Many Amino Acids also Lead to Acetyl-CoA	69
	The Fate of Acetyl-CoA	69
	Oxidation and the Citric Acid (Krebs) Cycle	69
	Oxidative Phosphorylation	72
	One Glucose or Amino Acid Molecule Makes a Lot of ATP:	
	Fatty Acids Even More	75
	A Further Uncertainty in ATP Yields	76
6	Metabolism in Daily Life	77
	How We Study Human Metabolism	77
	Daily Life as Opposed to Acute Stress	80
	Before Breakfast: Glucose Metabolism	80
	Before Breakfast: Fat Metabolism	84

### Cambridge University Press & Assessment 978-1-009-10852-2 — Understanding Human Metabolism Keith N. Frayn Table of Contents <u>More Information</u>

		CONTENTS	xi
	Amino Acids after Fasting Overnight		85
	The Human Gut (Gastrointestinal Tract)		86
	Toast for Breakfast		87
	Butter on the Toast		90
	Add in Some Protein		95
	The Colon and Human Metabolism		96
	Daily Metabolism and Energy Balance		97
7	Metabolism Is So Adaptable		98
	Why Our Metabolism Needs to Be Adaptable		98
	Survival during Starvation, and Physical Activity,		
	Both Need Cooperation between Tissues		98
	Studies of Human Starvation		99
	Metabolic Changes in Starvation: An Overview	1	103
	Glucose, Insulin, and Fat Mobilisation	1	104
	Ketone Bodies: Fuel for the Brain	1	106
	Starvation and Diabetes Contrasted	1	109
	Protein and Amino Acid Metabolism in Fasting	1	110
	Slow and Fast Metabolism	1	112
	Exercise and Physical Activity	1	112
	Muscles	1	113
	Fast-twitch Muscles	1	115
	Slow-twitch Muscles	1	117
	Communications during Exercise	1	118
	Fuels Used during Exercise	1	119
	Fight or Flight	1	124
	Carbohydrates and Fats as Fuels	1	125
8	Metabolic Interactions between Nutrients	1	26
	Carbohydrate, Fat, and Amino Acid Metabolism		
	Are Necessarily Inter-connected	1	126
	Energy Is the Primary Determinant: Fuel Use Adjusts accordin	۱g	
	to Availability	1	126
	Glucose Can Make Fat, but Fat Can't Make Glucose	1	130
	The Importance of Lipogenesis	1	132
	Amino Acids Are also Intimately Linked with Glucose and		
	Fat Metabolism	1	134

### Cambridge University Press & Assessment 978-1-009-10852-2 — Understanding Human Metabolism Keith N. Frayn Table of Contents <u>More Information</u>

#### xii CONTENTS

	Glucose, Fat, and Insulin	137
	The Glucose Fatty-acid Cycle and Other Mechanisms	139
	Longer-term Relationships between Carbohydrate, Fat, and Amino	
	Acid Metabolism	141
	Putting This into Perspective: Metabolic Interactions and	
	Daily Life	142
9	Metabolic Disorders	144
	Metabolism In and Out of Balance	144
	Inherited and Acquired Metabolic Disorders	144
	Inherited Disorders of Metabolism: Different Patterns	
	of Inheritance	145
	Disorders of Metabolism Inherited in a Mendelian Fashion	146
	Polygenic and Acquired Metabolic Disorders: A Grey Area	148
	Diabetes: A Widespread Disorder of Metabolism	149
	Cardiovascular Disease and Metabolism	153
	Cancer and Metabolism	154
	Metabolic Disorders: Conclusions	156
	Concluding Remarks	157
	Summary of Common Misunderstandings	159
	References	161
	Figure Credits	169
	Index	172
