|------|---------------------------------------------------------------------|----------------|
|      | <i>Preface</i>                                                      | <i>page xi</i> |
| 1    | <b>The Principle of Equivalence</b>                                 | 1              |
| 1.1  | Are Smooth Curves Natural?                                          | 1              |
| 1.2  | The Birth of General Relativity                                     | 3              |
| 1.3  | Tangents to Curves in One Dimension                                 | 4              |
| 1.4  | Curved Surfaces and Tangent Planes                                  | 7              |
| 1.5  | Four-Dimensional Space-Time                                         | 10             |
| 1.6  | Einstein’s Principle of Equivalence                                 | 13             |
| 1.7  | The Einstein Summation Convention                                   | 15             |
| 1.8  | Diagnostic Quiz                                                     | 16             |
| 1.9  | Problems                                                            | 17             |
| 2    | <b>Tensors</b>                                                      | 19             |
| 2.1  | Curvilinear Coordinates                                             | 19             |
| 2.2  | Metric Coefficients in Plane Polar Coordinates                      | 20             |
| 2.3  | A Closer Look at Polar Coordinates                                  | 24             |
| 2.4  | Tensors in Polar Coordinates                                        | 26             |
| 2.5  | Transformation Laws for the Components of Tensors of Arbitrary Rank | 27             |
| 2.6  | Tensor Analysis                                                     | 27             |
| 2.7  | Tensors in Space-Time                                               | 30             |
| 2.8  | Some More Space-Time Tensors                                        | 33             |
| 2.9  | Index Tricks of the Trade                                           | 35             |
| 2.10 | Problems                                                            | 39             |

|          |                                        |     |
|----------|----------------------------------------|-----|
| viii     | <i>Contents</i>                        |     |
| <b>3</b> | <b>Matter in Space-Time</b>            | 43  |
| 3.1      | Dust                                   | 43  |
| 3.2      | Energy and Momentum of Dust            | 46  |
| 3.3      | The Stress Energy Tensor of Dust       | 46  |
| 3.4      | Conservation of Energy                 | 50  |
| 3.5      | Problems                               | 51  |
| <b>4</b> | <b>Geodesics</b>                       | 53  |
| 4.1      | The Action and Lagrangian for a Curve  | 53  |
| 4.2      | The Euler–Lagrange Equations           | 55  |
| 4.3      | Geodesics in Flat Space                | 59  |
| 4.4      | Tensor Expression for the Lagrangian   | 62  |
| 4.5      | Lagrangians in Space-Time              | 63  |
| 4.6      | Cyclic Coordinates                     | 66  |
| 4.7      | Differentiation of Tensors             | 67  |
| 4.8      | Christoffel Symbols                    | 69  |
| 4.9      | Covariant Derivatives                  | 71  |
| 4.10     | The Metric Coefficients                | 75  |
| 4.11     | The Geodesic Equations                 | 76  |
| 4.12     | Problems                               | 78  |
| <b>5</b> | <b>Einstein’s Equations</b>            | 83  |
| 5.1      | Curvature Tensors                      | 83  |
| 5.2      | Parallel Transport                     | 83  |
| 5.3      | Curvature from Christoffel Symbols     | 87  |
| 5.4      | Symmetries of the Riemann Tensor       | 88  |
| 5.5      | The Ricci Curvature Tensor             | 94  |
| 5.6      | Bianchi Identities                     | 95  |
| 5.7      | Einstein’s Equations, up to a Constant | 96  |
| 5.8      | Problems                               | 98  |
| <b>6</b> | <b>Schwarzschild’s Solution</b>        | 100 |
| 6.1      | Introduction                           | 100 |
| 6.2      | General Form of the Metric             | 100 |
| 6.3      | Christoffel Symbols                    | 101 |
| 6.4      | Evaluation of Riemann Components       | 104 |
| 6.5      | Ricci Tensor Coefficients              | 107 |
| 6.6      | The Ricci Scalar                       | 110 |
