

## Contents

<i>Preface</i>	<i>page ix</i>
1. Observation of clouds	1
2. The shape and size of cloud and precipitation particles	27
3. Molecular structures of water substance	68
4. Bulk thermodynamic equilibrium among water vapor, liquid water, and ice	86
5. Surface thermodynamics of water substance	107
6. Aerosol in the atmosphere	134
7. Nucleation	156
8. Hydrodynamics of cloud and precipitation particles	182
9. Diffusion growth and evaporation of cloud and precipitation particles	228
10. Collision, coalescence, breakup, and melting	252
11. Cloud drop population dynamics in the warm rain process	288
12. Fundamental cloud dynamics	305
13. Numerical cloud models	327
14. Cloud electricity	363
15. Clouds–environment interaction	396
<i>References</i>	429
<i>Index</i>	445

Color plates can be found between pages 304 and 305
