Library of Congress Cataloging-in-Publication Data

Names: Roithmayr, Carlos M., author. | Hodges, Dewey H., author.

Title: Dynamics : theory and application of Kane's method / Carlos M. Roithmayr (NASA Langley Research Center), Dewey H. Hodges (Georgia Institute of Technology).

Description: New York, NY : Cambridge University Press, [2015] | 2015 | Includes bibliographical references and index.

Identifiers: LCCN 2014026343 | ISBN 9781107005693 (hardback : alk. paper)

Subjects: LCSH: Motion—Mathematical models. | Constraints (Physics) | Nonholonomic dynamical systems. | Structural dynamics. | Structural optimization.

Classification: LCC QC133 . R65 2015 | DDC 531/.11—dc23

LC record available at <http://lcn.loc.gov/2014026343>

This work contains material taken from *Dynamics: Theory and Applications* by Thomas R. Kane and David A. Levinson. It also contains material drawn from *Spacecraft Dynamics* by Thomas R. Kane, Peter W. Likins, and David A. Levinson. These gentlemen have generously allowed Carlos M. Roithmayr and Dewey H. Hodges, the authors of this derivative work, to sample freely from the rich content of their two books. Original material and minor revisions contributed by the authors are distributed throughout the work.

Messrs. Kane, Levinson, and Likins are sole and exclusive owners of the Copyright in their own work, and retain full rights with regard to that material. Messrs. Roithmayr and Hodges are sole and exclusive owners of the Copyright in their contributions to this new work. All have agreed to the creation of the new work, which is, for copyright purposes, the compilation of their contributions and copyrighted in the names of Roithmayr and Hodges. In this case all authors retain full and unrestricted right and title to the copyright in their original contribution, and the free use in any manner, not to be restricted in any way by the appearance of any materials in this new work.
