Index

“what” stream, 81
“where” stream, 81

3D full-head scans, 362

AAM See active appearance model
active appearance model, 208
affine model, 253
anticipation, 122, 136, 145, 146, 147, 149
artificial neural networks, 164
audiovisual fusion, 194
auditory cortex, 85
auditory scene analysis, 8
Autocuer, 110

background sequence, 250, 276, 292
Baldi, 328
bimodal, 121, 148
biological motion, 2
biomechanical model, 354, 371, 372
Broca, 78
Broca’s area, 83

chroma-key, 164, 198
cineradio-films, 385
corticulation, 110, 121, 122, 123, 124, 127, 129, 133, 134, 135, 145, 273, 275, 289, 305, 315, 399
cochlear implant, 17, 319
compositing, 292, 295, 305
control, 121, 122, 123, 126, 127, 128, 129, 130, 131, 133, 134, 135, 140, 141, 142, 145, 146, 154, 155, 156, 157, 399, 400
Cued Speech, 104, 347

dominant recoding model, 183
dynamics, 273, 275, 289, 305
direct identification model, 182
discrete cosine transform, 203
development, 122, 123, 130, 133, 134
developmental model, 203
developmental model, 203
degrees-of-freedom, 370, 374
dominant recoding model, 183
dominant recoding model, 183
dominant recoding model, 183
dominant recoding model, 183
dominant recoding model, 183
EigenPoints, 257, 258
eigenspace, 258
electro-encephalography, 100
electromagnetic articulography, 377
electromyography, 350
electropalatography, 327, 377
elliptical model, 253
EPG See electropalatography
event-related potentials, 77
face detection, 198
facial motion, 355
finite element modeling, 372
fuzzy logic multimodal perception
flow concatenation, 282
functional Magnetic Resonance Imaging, 100
functional models, 371
fuzzy logic multimodal perception, 63

Gaussian, 275, 287, 289, 292
genioglossus, 376
geometric models, 371
glide, 122, 130, 135, 136, 137, 140, 141, 142, 143, 144, 145, 146, 147, 149, 150, 151, 152, 155, 157, 400

gradient descent, 271, 275, 290

gurning actions, 85

hearing-impairment, 161, 175

hidden Markov model, 166, 215

HMM See hidden Markov model

hole-filling, 307

homophenous, 27

intelligibility, 294, 295, 296, 304, 305

jaw line, 250

k-means clustering, 280

large vocabulary continuous speech recognition, 195

late integration, 221

LDA See linear discriminant analysis

lexical equivalence class, 27

lexicalized tone, 65

linear discriminant analysis, 203, 218, 362

lipreaders, 271, 273, 274, 277, 301

lip reading, 104, 294, 301

lip tracking, 197, 201

Lombard effect, 194

magnetic resonance images, 373

magnetoencephalography, 100

Mary, 101, 275, 292, 293, 294, 305

maximum likelihood linear transform, 204

McGurk effect, 7, 11, 12, 19, 45, 57, 70, 193, 347

mid sagittal contours, 376

mirror neurons, 103

MLLT See maximum likelihood linear transform

morphing, 271, 273, 274, 277, 278

motion capture, 136

multidimensional morphable model, 273, 274, 275, 276, 277, 278, 279, 280, 281, 284, 287, 290, 291, 293, 305

multi-layer perceptron, 164

multimodal speech perception, 4

multisensory perception, 62

optical flow, 202, 277, 278, 279, 281, 282, 292, 307, 357

pandemonium, 9

PCA See principal components analysis

phoneme equivalence class, 27

placing, 137, 141, 142, 143, 144, 145, 146, 148, 149

point-light technique, 41

Positron Emission Tomography, 100

principal components analysis, 165, 199, 280, 351

Procrustes analysis, 207

production, 121, 122, 123, 124, 125, 126, 127, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 141, 143, 145, 154, 157, 400

region-of-interest, 198

regularization, 271, 274, 275, 287

re-orientation, 283

rescoring, 240

ROI See region-of-interest

S/N See signal-to-noise ratio

shaping, 127, 137, 141, 142, 143, 144, 145, 146, 148, 400

sign language, 97

signal-to-noise ratio, 6, 186

sine wave synthesis, 356

sinewave speech, 9, 24

smoothness, 200, 275, 287, 289, 291

somatotopic organization, 79

speaker normalization, 16

speech maps, 368

speechreading, 69, 105

spline, 201, 289, 320

structure-from-motion, 158

STS See superior temporal gyrus

superior temporal gyrus, 85

Tadoma, 17, 108, 395

talking computer agent, 188

tongue shape, 320

trajectory synthesis, 271, 275, 287, 293, 305

Transcranial magnetic stimulation, 101

triphone, 180, 250

Turing tests, 294

ultrasound, 372

uncanny valley, 365

ViaVoice, 198

viseme, 25, 172, 214, 253, 260

viseme clusters, 27

Wernicke, 77

X-ray, 372
