1 Introduction  1

Part I  The state of the art

2 The problem (P₁)  7

3 Historical background  9
  3.1 Overview  9
  3.2 The problem of evidence in the philosophy of science  9
  3.3 Debates on empiricalness in theoretical linguistics and the standard view of linguistic data (SVLD)  12
  3.4 Conclusions  16

4 The partial rejection of (SVLD) in the practice of object-scientific research  17
  4.1 Overview  17
  4.2 New tendencies in object-scientific research  17
  4.3 Conclusions  22

5 The partial rejection of (SVLD) in metascientific reflection  23
  5.1 Overview  23
  5.2 The diversity and the combinability of data  23
  5.3 The role of the sources in the reliability of data  25
  5.4 The complexity of linguistic data  26
  5.5 The treatment of the uncertainty of data  28
  5.6 The relationship between data and theory  31
  5.7 Data and the treatment of inconsistencies  34
  5.8 Linguistic evidence  36
  5.9 Conclusions  39
## Table of Contents

### Part II  The p-model

6  The solution to (P)$_I$  

**Part II  The p-model**

7  The problem (P)$_{II}$  

8  Historical background  

8.1  Overview  
8.2  The liberalisation of the concepts of ‘data’ and ‘evidence’ in the philosophy of science  
8.3  Trends in logic and argumentation theory  
8.4  Conclusions  

9  Plausible inferences  

9.1  Overview  
9.2  The concept of ‘inference’ and ‘deductive inference’  
9.3  The notion of ‘plausible statement’  
9.4  The concept of ‘demonstrative inference’  
9.5  The notion of ‘plausible inference’  
9.6  The fallibility of plausible inferences  
9.7  The dynamism of plausible inferences  
9.8  The p-context-dependence of plausible inferences  
9.9  The heuristic function of plausible inferences  
9.10  Conclusions  

10  Plausible argumentation  

10.1  Overview  
10.2  Informational under- and overdetermination, problems and their solution  
10.3  The notion of ‘plausible argumentation’  
10.4  The cyclic nature of plausible argumentation  
10.5  The prismatic nature of plausible argumentation  
10.6  Problem-solving strategies  
10.7  The effectiveness of plausible argumentation  
10.8  Conclusions  

11  The solution to (P)$_{II}$  

### Part III  Data and evidence

12  The problem (P)$_{III}$  

13  The concept of ‘datum’ and ‘evidence’  

13.1  Overview  
13.2  The concept of ‘datum’  
13.3  The concept of ‘evidence’  
13.4  Conclusions  

14  The solution to (P)$_{III}$  

---

vi  Contents  

6  The solution to (P)$_I$  

10  Plausible argumentation  

11  The solution to (P)$_{II}$  

12  The problem (P)$_{III}$  

13  The concept of ‘datum’ and ‘evidence’  

14  The solution to (P)$_{III}$  

---
Contents vii

Part IV Application of the p-model: a case study

15 The problem (P)IV 191

16 A case study: a reconstruction of Gentner & Wolff (1997) 192

16.1 Overview 192
16.2 Argumentation cycle 1: three model types of metaphor processing 193
16.3 Argumentation cycle 2: application of the Contrastive Strategy 201
16.4 Intermezzo: on the cyclic nature of psycholinguistic experiments 212
16.5 Argumentation cycle 3: change from a Contrastive to a Combinative Strategy 215
16.6 Argumentation cycle 4: return to the Contrastive Strategy 225
16.7 Conclusions 230

17 The solution to (P)IV 234

Part V The answers to the open questions

18 The problem (P)V 237

19 The answers to (OQ1)–(OQ7) 238

19.1 Overview 238
19.2 Ad (OQ1): the diversity and the combinability of data 238
19.3 Ad (OQ2): the role of the sources in the reliability of data 240
19.4 Ad (OQ3): the complexity of linguistic data 242
19.5 Ad (OQ4): the treatment of the uncertainty of data 243
19.6 Ad (OQ5): the relationship between data and theory 245
19.7 Ad (OQ6): data and the treatment of inconsistencies 247
19.8 Ad (OQ7): linguistic evidence 249
19.9 Conclusions 251

20 The solution to (P)V 254

21 Summary: the solution to the Main Problem (MP) 256

List of figures and table

Figures

1 Domain of the possible values of the conclusion’s plausibility on the basis of (29)–(31)  page 104
2 The structure of the argumentation cycle 137
3 Parallel structures analysis 152
4 The process of plausible argumentation 161
5 Starting p-context: comprehensive p-context of research into the psycholinguistics of metaphor interpretation 195
6 Cycle 1: extension of the starting p-context by the data listed in (55)–(59) 200
7 The structure of the experimental process 213
8 Cycle 3: the p-context after conducting Subcycle 1 217
9 Cycle 3: setting up the p-context at the start of Subcycle 2 220
10 Cycle 3: the p-context after conducting Subcycle 2 223
11 Cycle 3: the p-context after conducting Subcycle 3 225
12 The final p-context 229

Table

1 Means and standard deviations in Experiment 4 221
