ILLUSTRATIONS

1. Archaeological alchemy; or, how archaeologists spin stories from scraps.  
2. Schematic representation of the simplification of sampling theory and its separation from formation theory.  
4. Michael Schiffer’s flow model for durable objects through a cultural system.  
5. Warren DeBoer’s taphonomic model of the archaeological record, with Schiffer’s division between systemic and archaeological context added.  
6. The problem of time averaging: cumulative graph showing changing composition of three hypothetical faunal assemblages at fifty-year intervals.  
7. Stratigraphic matrix of a simple sequence of three units, transposed onto an entropy grid.  
8. Hawkes’s ladder of inference juxtaposed with Childe’s division of material and spiritual culture.  
9. New model of externalization that emerged in the mid-twentieth century.  
10. Leroi-Gourhan’s view of the exteriorization of techniques in evolutionary perspective.  
11. Binford’s and Hodder’s views of the relation between behaviour and material culture.  
12. Grid of forces defining objects and events.
Illustrations

13. The two basic meanings of the archaeological assemblage and their mutually interdependent nature. 197
14. Buildings as organisms. 203
15. Diagrammatic representation of how assemblages stabilize and disperse. 212
16. Grid of forces of assembly and disassembly in terms of the processes of enchainment and dispersal, and containment and exposure. 213
17. Hodder’s version of the archaeological operation: the hermeneutic spiral. 225
18. The assembling process: sorting finds as they come out of the ground. 235
19. The translation process: mobilizing properties from one material medium to another. 240
20. Visual translation devices: an archaeological planning frame and artist’s perspective frame. 241
