

Cambridge Introductions to Music **Electronic Music**

This accessible *Introduction* explores both mainstream and experimental manifestations of electronic music. From early recording equipment to the most recent multimedia performances, the history of electronic music is full of interesting characters, fascinating and unusual music, and radical technology. Covering many different eras, genres, and media, analyses of works appear alongside critical discussion of central ideas and themes, making this an essential guide for anyone approaching the subject for the first time. Chapters include key topics from synth pop to sound art, from electronic dance music to electrical instruments, and from the expression of pure sound to audiovisuals. Highly illustrated and with a wide selection of examples, the book provides many suggestions for further reading and listening to encourage students to begin their own experiments in this exciting field.

NICK COLLINS is Reader in Composition at Durham University.

MARGARET SCHEDEL is Assistant Professor of Music at Stony Brook University.

SCOTT WILSON is Senior Lecturer in Composition and Live Electroacoustic Music at the University of Birmingham.

A complete list of books in the series is featured at the back of this book.

Acknowledgments

With huge thanks to everyone; just too many to list. Some of you are named in the text, and others just helped regardless.

Scott would particularly like to praise Daria for putting up with him, Jonty Harrison for expert input, and Gayle Young for help in tracking down images. Margaret would like to thank her electronic music teachers, in order from high school through doctoral degree: Howard Fredrics, Geoffrey Wright, McGregor Boyle, Ichiro Fujinaga, Cort Lippe, Pauline Oliveros, and Mara Helmuth for their inspiration, support, and dogged determination to make circuitry musical. For varied assistance which may or may not have ended up in the final book, Nick would like to send out additional thank yous to Heiko Hoffmann, Chris Goddard, Brian Kane, Laurie Spiegel, Mick Grierson, Thor Magnusson, Leif Shackelford, Bill Thompson, Leonie Edwards-Jones, and Fredrik Olofsson. Public gratitude is also due to Vicki Cooper, Rebecca Taylor, Fleur Jones, Beata Mako, Gaia Poggiogalli, and Jon Lloyd at Cambridge University Press.

We would all like to thank our students for their unwavering curiosity, probing questions and acceptance of new sounds.
