- almost sure convergence, 19
  - distribution function, 19
- arcsinus law, 87
- asymptotic freeness, 78
- Bai and Silverstein method, 115
- Bayesian probability theory, 478
- Bell number, 101
- Borel–Cantelli lemma, 46
- broadcast channel, 335
  - linear precoders, 336
- Brownian motion, 507
  - Dyson, 508
- capacity maximizing precoder, 5
  - frequency selective channels, 325
  - Rayleigh model, 296
  - Rice model, 318
- Carleman’s condition, 95
- Catalan number, 102
- Cauchy integral formula, 202
- CDMA
  - orthogonal, 284
  - random, 264
- central limit theorem, 63, 213
  - martingale difference, 69
  - variance profile, 175
- channel modeling, 477
  - correlated channel, 484
  - rank-limited channel, 494
- circular law, 31
- CLT, *see* central limit theorem
- cognitive radio, 393
- complex analysis
  - pole, 206
  - residue, 206
  - residue calculus, 207
- complex zonal polynomial, 24
- conditional probability, 66
- consistent estimator, 2
- convergence in probability, 19
- correlated channel, 484
- correlation profile, 149
- cumulant
  - classical cumulant, 101
  - free cumulant, 99
  - moment to cumulant, 100
- cumulative distribution function, *see* distribution function
- decoder design, 328
- delta method, 216
- detection, 393
  - condition number criterion, 413
  - error exponent, 416
  - GLRT criterion, 414
  - Neyman–Pearson criterion, 399
  - test power, 416
- deterministic equivalent, 114
  - Haar matrix, 153
  - information plus noise, 152
  - variance profile, 145
- distribution function, 18
- dominated convergence theorem, 135
- Dyson Brownian motion, 508
- eigen-inference, *see* G-estimation
- eigenvector
  - central limit theorem, 238
  - limiting distribution, 238
- elementary symmetric polynomials, 100
- empirical spectral distribution, 29
- ergodic capacity, 296
  - frequency selective channels, 324
  - Rayleigh model, 295
  - Rice model, 316
- e.s.d., 29
- estimation, 421
  - DoA, 422
    - G-MUSIC, 425
    - MUSIC, 423
  - G-MUSIC, 429
  - power estimation, 432
    - free probability, 440
    - G-estimation, 447
- $\eta$ -transform, 41
- exact separation, 184, 193

- femto-cell, 11
- fixed-point algorithm, 117
- Fredholm determinant, 233
- free family, 73
- free moments, 98
- free probability theory, 72
  - additive convolution, 75
  - additive deconvolution, 75
  - additive free convolution, 100
  - asymptotic freeness, 78
  - free cumulant, 99
  - free moments, 98
  - information plus noise, 85
  - limit distribution, 77
  - multiplicative convolution, 75
  - multiplicative deconvolution, 75
  - multiplicative free convolution, 101
  - random matrices, 77
  - rectangular free cumulants, 110
  - rectangular free probability, 109
- frequency selective channel, 322
- full circle law, 31
  
- G-estimation, 199, 421
- G-MUSIC, 425
- Gaussian method, 139
  
- Haar matrix, 80, 87, 153
- Harish–Chandra formula, 22, 25
- H older’s inequality, 47
- l’Hostipal rule, 27, 208
- hypergeometric function, 24
  
- imperfect CSI, 339
- information plus noise, 152
  - deterministic equivalent, 145
  - exact separation, 193
  - free convolution, 85
  - limiting support, 197
  - no eigenvalue outside the support, 192
  - spectrum analysis, 192
- information plus noise matrix
  - l.s.d., 60
- integration by parts, 140
- isometric matrix, *see* Haar matrix
  
- Jacobian matrix, 176
- Jakes’ model, 326
  
- Kronecker model, 339, 488
  
- Laguerre polynomial, 22, 296
- law of large numbers, 1
- limit distribution, 77
- limit spectral distribution, 30
