## Constructional Change in English

Martin Hilpert combines Construction Grammar and advanced corpus-based methodology into a new way of studying language change. Constructions are generalizations over remembered exemplars of language use. These exemplars are stored with all their formal and functional properties, yielding constructional generalizations that contain many parameters of variation. Over time, as patterns of language use are changing, the generalizations are changing with them. This book illustrates the workings of constructional change with three corpus-based studies that reveal patterns of change at several levels of linguistic structure, ranging from allomorphy to word formation and to syntax. Taken together, the results strongly motivate the use of Construction Grammar in research on diachronic language change.

This new perspective has wide-ranging consequences for the way historical linguists think about language change. It will be of particular interest to linguists working on morpho-syntax, sociolinguistics, and corpus linguistics.

MARTIN HILPERT is Assistant Professor of English Linguistics at the University of Neuchâtel.

STUDIES IN ENGLISH LANGUAGE

*General editor*

Merja Kytö (Uppsala University)

*Editorial Board*

Bas Aarts (University College London),

John Algeo (University of Georgia),

Susan Fitzmaurice (University of Sheffield),

Christian Mair (University of Freiburg),

Charles F. Meyer (University of Massachusetts)

The aim of this series is to provide a framework for original studies of English, both present-day and past. All books are based securely on empirical research, and represent theoretical and descriptive contributions to our knowledge of national and international varieties of English, both written and spoken. The series covers a broad range of topics and approaches, including syntax, phonology, grammar, vocabulary, discourse, pragmatics, and sociolinguistics, and is aimed at an international readership.

Already published in this series:

Geoffrey Leech, Marianne Hundt, Christian Mair and Nicholas Smith: *Change in Contemporary English: A Grammatical Study*

Jonathan Culpeper and Merja Kytö: *Early Modern English Dialogues: Spoken Interaction as Writing*

Daniel Schreier, Peter Trudgill, Edgar Schneider and Jeffrey Williams: *The Lesser-Known Varieties of English: An Introduction*

Hilde Hasselgård: *Adjunct Adverbials in English*

Raymond Hickey: *Eighteenth-Century English: Ideology and Change*

Charles Boberg: *The English Language in Canada: Status, History and Comparative Analysis*

Thomas Hoffmann: *Preposition Placement in English: A Usage-based Approach*

Claudia Claridge: *Hyperbole in English: A Corpus-based Study of Exaggeration*

Päivi Pahta and Andreas H. Jucker (eds.): *Communicating Early English Manuscripts*

Irma Taavitsainen and Päivi Pahta (eds.): *Medical Writing in Early Modern English*

Colette Moore: *Quoting Speech in Early English*

David Denison, Ricardo Bermúdez-Otero, Chris McCully and Emma Moore (eds.): *Analysing Older English*

Jim Feast: *Premodifiers in English: Their Structure and Significance*

Steven Jones, M. Lynne Murphy, Carita Paradis and Caroline Willners: *Antonyms in English: Construals, Constructions and Canonicity*

<i>List of figures</i>	<i>page</i> x
<i>List of tables</i>	xii
<i>Acknowledgments</i>	xiii
<b>1 Introduction</b>	<b>1</b>
1.1 Constructions and language change	1
1.1.1 Construction Grammar, applied to diachrony	2
1.1.2 Studying constructions in language change	4
1.2 Defining constructional change	8
1.2.1 Where constructional change goes beyond grammaticalization	9
1.2.2 Where grammaticalization goes beyond constructional change	10
1.2.3 Constructional change vis-à-vis language change	13
1.2.4 A definition of constructional change	16
1.3 Aims and scope of the present work	17
1.4 Outline of the following chapters	20
<b>2 Data and methodology</b>	<b>26</b>
2.1 Sources of data	26
2.1.1 Why these corpora?	29
2.2 Detecting and analyzing trends	30
2.3 Variability-based neighbor clustering	32
2.3.1 VNC on the basis of single frequency values	35
2.3.2 VNC on the basis of multiple measurements	38
2.3.3 Detection of outliers with VNC	42
2.3.4 VNC and constructional change	44
2.4 Binary logistic regression	45
2.4.1 Input data for a binary logistic regression	45
2.4.2 Interpreting the output of a binary logistic regression	47
2.4.3 Assessing the quality of a binary logistic regression	49

## viii Contents

2.4.4	Applying binary logistic regression to diachronic data	50
2.4.5	Mixed-effects modeling	52
2.4.6	Binary logistic regression and constructional change	54
2.5	Hierarchical Configural Frequency Analysis (HCFA)	55
2.5.1	The goals of a HCFA	56
2.5.2	Applying HCFA to constructional change: the case of preposition stranding	57
2.5.3	Input data for a HCFA	58
2.5.4	Analyzing the results of a HCFA	62
2.5.5	HCFA and constructional change	65
2.6	Multidimensional scaling	66
2.6.1	Applying MDS to diachronic corpus data	67
2.6.2	Interpreting a diachronic series of MDS plots	72
2.6.3	MDS and constructional change	73
2.7	Concluding remarks	74
3	Constructional change in allomorphy	75
3.1	From <i>mine/thine</i> to <i>my/thy</i>	79
3.2	Data collection and analysis	82
3.2.1	Data retrieval	82
3.2.2	VNC	83
3.3	Variables and hypotheses	87
3.3.1	Effects across time	89
3.3.2	Effects across first and second person forms	94
3.4	Results	97
3.5	Comparison with the PCEEC	102
3.6	Discussion	106
4	Constructional change in word formation	110
4.1	The <i>V-ment</i> construction	115
4.2	Data collection	124
4.3	Measures of productivity and their diachronic application	127
4.4	Determining developmental stages in the history of the <i>V-ment</i> construction	133
4.5	Variables and hypotheses	134
4.5.1	Etymological source	135
4.5.2	Stem type	136
4.5.3	Branching structure	138
4.5.4	Transitivity	141
4.5.5	Semantic types	143

## Contents ix

4.6	Analyzing the stages	148
4.6.1	Period 1 (1250–1299)	149
4.6.2	Period 2 (1300–1399)	149
4.6.3	Period 3 (1400–1649)	150
4.6.4	Period 4 (1650–1899)	151
4.6.5	Period 5 (1900–2000)	152
4.7	Discussion and concluding remarks	152
5	Constructional change in syntax	155
5.1	Defining concessivity	159
5.2	The development of concessive constructions	167
5.3	Concessive parentheticals	171
5.3.1	What is a parenthetical structure?	171
5.3.2	Parameters of constructional variation in concessive parentheticals	176
5.3.3	Differences between concessive parentheticals and full concessive clauses	179
5.4	The emergence of concessive parentheticals: synchronic evidence	180
5.4.1	Data collection	181
5.4.2	Results	184
5.4.3	Discussion	190
5.5	The development of concessive parentheticals: diachronic evidence	191
5.5.1	Data collection and annotation	192
5.5.2	Analysis and results	193
5.5.3	Discussion	198
5.6	Conclusions	199
6	Conclusions	204
6.1	Constructional change and grammaticalization	204
6.2	Constructional change and language change	205
6.3	Frequency and the role of quantitative methodology	207
6.4	The ‘right’ level of abstraction for a construction	208
6.5	Constructions, the speaker, and the hearer	209
6.6	Final remarks	211
	<i>Appendix: a logistic regression model of mine and my</i>	213
	<i>References</i>	214
	<i>Index</i>	229

## Acknowledgments

---

I was given the opportunity to write this book while staying at the Freiburg Institute for Advanced Studies (FRIAS) as a Junior Fellow. Besides providing generous financial support, which is duly acknowledged here, the FRIAS offered an extraordinary academic environment that was in equal measures stimulating and nurturing. I have had wonderful colleagues and visiting guests to spend my time with, and, quite literally, there was something new to learn every day. Looking back now, I find that many ideas in this book originated with discussions in hallways, questions after colloquium talks, or comments that kept me thinking while on my way home. I hope that the book captures aspects of that intellectual spirit. As is needless to say, all shortcomings in it are my own responsibility.

My special gratitude goes to several people who have been mentoring me in different ways. I am first of all thankful to Christian Mair for giving his time and support to the present project. Peter Auer helped me transform a collection of ideas into a more coherent outline of a book, and he provided helpful comments on the manuscript. Bernd Kortmann and Stefan Pfänder both offered important advice in the early stages of this project.

Numerous colleagues and friends have been exchanging ideas with me over the past years, so that I need to thank those who have, in one way or another, shaped the way I think about language. These include Antti Arppe, Heike Behrens, Joan Bresnan, Hubert Cuyckens, Mark Davies, Holger Diesel, Gabriele Diewald, Nick Ellis, Gosia Fabiszak, Dylan Glynn, Stefan Th. Gries, Paul Hopper, Daniel Jacob, Suzanne Kemmer, Lars Konieczny, Christian Lang, Alexander Lasch, Arne Lohmann, Jan-Ola Östman, Florent Perek, Peter Petré, Christopher Shank, Jeff Siegel, Hendrik de Smet, Elena Smirnova, Anatol Stefanowitsch, Anja Stukenbrock, Benedikt Szmrecsanyi, Whitney Tabor, Elizabeth Traugott, Graeme Trousdale, Ruprecht von Waldenfels, Daniel Wiechmann, Steffi Wulff, Arne Zeschel, Alexander Ziem, and doubtlessly many more. I also would like to thank the Ph.D. students of the GRK-1624 *Frequency Effects in Language* for many stimulating discussions. As the FRIAS is an interdisciplinary institute, many of my coffee breaks were actually spent talking to historians, literary scholars,

#### xiv Acknowledgments

physicists, and biologists. I really enjoyed these conversations and wish to thank those that were present.

I would further like to thank Merja Kytö for taking on the present project as a contribution to the *Studies in English Language* series. Another round of thanks goes to Helen Barton, my commissioning editor, and to the technical staff at Cambridge University Press.

Most importantly of course, I need to thank my family, nuclear and extended. This book is dedicated to Ning, Carla, Hugo, and Hans, for showing me what matters most.
