How the War was Won

The Second World War is usually seen as a titanic land battle, decided by mass armies, most importantly those on the Eastern Front. Phillips O’Brien shows us the war in a completely different light. In this compelling new history of the Allied path to victory, he argues that in terms of production, technology and economic power, the war was far more a contest of air and sea supremacy. He shows how the Allies developed a predominance of air and sea power which put unbearable pressure on Germany and Japan’s entire war-fighting machine from Europe and the Mediterranean to the Pacific. Air and sea power dramatically expanded the area of battle and allowed the Allies to destroy over half of the Axis’s equipment before it had even reached the traditional “battlefield.” Battles such as El Alamein, Stalingrad and Kursk did not win World War II; air and sea power did.

Phillips Payson O’Brien is Director of the Scottish Centre for War Studies and Reader in History at the University of Glasgow.
The aim of this series is to publish outstanding works of research on warfare throughout the ages and throughout the world. Books in the series take a broad approach to military history, examining war in all its military, strategic, political and economic aspects. The series complements Studies in the Social and Cultural History of Modern Warfare by focusing on the “hard” military history of armies, tactics, strategy and warfare. Books in the series consist mainly of single author works – academically vigorous and groundbreaking – which are accessible to both academics and the interested general reader.

A full list of titles in the series can be found at: www.cambridge.org/militaryhistories

FIGURES

1  Japanese naval aircraft losses, 1943
2  German aircraft: non-operational lost and damaged, 1939–44
3  Development of the German HE-177 four-engine bomber (Bundesarchiv)
4  British men and women building Merlin aircraft engines (Imperial War Museum)
5  American B-24 production (Library of Congress)
6  Nosecones for American A-20 attack aircraft being assembled in Long Beach, California in 1942 (National Archives)
7  Production of the B-29 (Air Force Historical Research Agency)
8  A B-17 after the American strategic bombing attack on the Focke-Wulf assembly plant in Marienburg in 1943 (National Archives)
9  Germany: military deaths from all causes, 1939–45 (in thousands)
10 Germany: Panzer IVs accepted into service and lost, 1942–4, in six-month intervals
11 Germany: Panzer Vs accepted into service and lost, 1942–4, in six-month intervals
12 Germany: fighter deployment (all types) by percent and front, May 1943–November 1944
13 UK: defense spending 1929–38 (£ millions)
14 UK: defense spending as percentage of government expenditure, 1929–38 98
15 USA: defense spending, 1929–39 ($ millions) 98
16 USA: defense spending, as a percentage of government expenditure, 1929–39 99
17 Mitsubishi A-6M2 “Zero” fighters being prepared for launch from the aircraft carrier Shokaku during one of the battles off Guadalcanal in 1942 (National Archives/Naval History & Heritage Command) 113
18 Franklin D. Roosevelt’s inner circle, including Harry Hopkins and William Leahy, celebrating the President’s birthday with him in the air on January 31, 1945 (Library of Congress) 145
19 Churchill and his service chiefs (from left to right: Portal, Pound and Alanbrooke) meeting on the Queen Mary while traveling to the USA for the Trident Conference in May 1943 (Imperial War Museum) 158
20 Concrete German U-boat pens at Brest, France (Imperial War Museum) 187
21 The grand strategists at the first Quebec Conference (Quadrant), August 1943 (Imperial War Museum) 217
22 Admiral Karl Doenitz inspecting U-boat 94 in St Nazaire, France, 1941 (Bundesarchiv) 230
23 Allied merchant ships sunk by German submarines, 1939–45 233
24 Allied merchant ships sunk by German submarines, July 1941–June 1943 233
25 British, Allied and neutral merchant ships (all tonnages) lost through enemy action outside convoy, in convoy and straggling 242
26 German U-boat strength, total and operational, January 1942–July 1943 252
27 The Queen Mary liner carrying American troops back from Europe in 1945 (National Archives) 254
28 “Victory” ships laden with goods bound for American armed forces (National Archives) 257
29 A large Atlantic convoy organized in 1943 (Imperial War Museum) 258
ix / List of figures

30 The British forward-firing mortar, nicknamed Hedgehog (Imperial War Museum) 260
31 The Leigh-Light (Imperial War Museum) 260
32 A long-range B-24 Liberator of RAF Coastal Command attacks a U-boat during the Battle of the Atlantic (Imperial War Museum) 262
33 Arthur “Bomber” Harris (Imperial War Museum) 270
34 A B-24 attacking a target over Austria explodes into flames (Library of Congress) 275
35 A charred German corpse after the firebombing of Hamburg in 1943 (Bundesarchiv) 280
36 German finished munitions output, July 1942–July 1944 287
37 Luftwaffe aircraft deployment by front, December 1942–December 1943 290
38 Luftwaffe fighter deployment (all types), December 1942–December 1943 (percent) 291
39 USAF enlisted men doing bomb-spotting training, Roswell Army Flying School, Roswell, New Mexico (Air Force Historical Research Agency) 294
40 German aircraft lost and damaged on non-operational duties, 1939–43 296
41 German aircraft lost and damaged on non-operational duties, 1943, in six-month intervals 296
42 German aircraft construction (by unit), January 1943–July 1944 299
43 German fighter production (by unit), January 1943–July 1944 299
44 German quarterly indices of aircraft and naval production, 1943 and first quarter 1944 300
45 German quarterly indices of production (other types), 1943 and first quarter of 1944 300
46 The flak tower at Berlin Zoo (Bundesarchiv) 303
47 Hitler, Goering and Speer in 1943 (Bundesarchiv) 304
48 Speer with Erhard Milch and Professor Willy Messerschmitt (Bundesarchiv) 304
49 Major German AFV accepted into service and lost, June 1942–March 1943 312
x / List of figures

50 German munitions production, 1944
51 The first P-51 Mustang ever to land and be serviced on the east bank of the Rhine (Air Force Historical Research Agency)
52 German fighter deployment (all types), June 1943–December 1944 by front percentage
53 German single-engine fighter losses, 1944, by front
54 Production of the German ME-262 aircraft often took place in cramped underground facilities (Bundesarchiv)
55 An underground production facility for the V-1 cruise missile (Bundesarchiv)
56 Anglo-American bombs dropped on economic targets by quarter, 1943–4, in thousands of tons
57 USAAF strategic air forces, selected targets for bombing, 1943 and 1944 (first nine months), percentage
58 UK strategic air forces, selected targets for bombing, 1943 and 1944 (first nine months), percentage
59 German monthly production of aviation fuel, 1944, in thousands of tons
60 German monthly production of oil products (all sources), 1944, in thousands of tons
61 German monthly domestic and imported oil production, 1944, in thousands of tons
62 A formation of B-24s attacking Romanian oil production at Ploesti, May 1944. (Library of Congress)
63 German aircraft, lost and damaged on operational and non-operational duty, 1944
64 Thousands of bombs dropped in multiple attacks on a small target during 1944 as part of Operation Crossbow (Imperial War Museum)
65 A direct bomb hit on an ammunition train in a small railyard south of Hof, Germany (Air Force Historical Research Agency)
66 Oil-carrying train carriages blown on top of each other during an attack by P-47 Thunderbolts of the XIX Tactical Air Command, April 1945 (Air Force Historical Research Agency)

26 USA: USAAF aircraft outside continental USA (ready for combat), March 6, 1943 205
27 USA: USAAF air groups deployed and expected to be deployed, July 1943 to July 1944 206
28 Methods of U-boat sinkings, April and May 1943 264
29 Germany: aircraft average deployment and total losses by front, July–November 1943 292
30 German flak in all services deployed on November 1, 1943 306
31 German equipment destroyed (equivalencies) in 1943 314
32 Luftwaffe distribution on the Eastern Front, June 30, 1944 362
33 The costs of major warships during the assault on the Mariana Islands, June 1944 420
ACKNOWLEDGMENTS

This book was only made possible by the extraordinary support of my family and friends. Over the past few years they have been a source of companionship and comfort, there both to inspire and cajole me in equal measure. My parents, William and Nancy, have not only provided me a home and refuge, they imparted to me their love of ideas and discussion. My sisters, brothers and nephews, Elizabeth, Sarah, Bill, Jamie, Sam, Andrew, Sam and Ben, are rocks of support and wonderful friends, and have listened with great patience to what must have seemed to them endless reports of the process of writing this book. My Aunt Anne and Uncle Ray, who is missed constantly, were also great sources of comfort and happiness. I am more grateful to my family than they will ever know.

Throughout this process many colleagues at Glasgow University, past and present, have impressed me with their penetrating intellects and provided me with great cheer and companionship. Simon Ball, Evan Mawdsley, William Mulligan and Peter Jackson all possess a profound knowledge of World War II and have shared that with me with unstinting generosity. I was fortunate to have each one of them so close at hand during different parts of the writing process. They are all excellent historians and dear friends. I must also thank Matthew Strickland and Stuart Airlie for Kino Club – always a high point of the social calendar – and Cian O’Driscoll for countless morning coffees and breakfasts. Other excellent historians at Glasgow whom I have been privileged to have as colleagues (past and present) include Marina
Moskowitz, Simon Newman, Alex Marshall, Alex Bamji, Sonke Neitzel and Graham Cross. I must also say how blessed I have been with tremendous students over the years, many of whom provided intellectual sustenance at different times during the writing and many of whom have become close friends. Angela, Katherine, May (and Ed), Tony, Sibbjorn, Eilidh, Joe, Dani, Chris, Tim and Marzia – Thank You. Finally thanks very much to my special subject students of 2013–14, World War II devotees all.

In the greater Glasgow community there are some others upon whom I came to rely for their support. Roddy Neilson and Anne Parker know the meaning of friendship, and I am in their debt. Helen Ball, except for her preposterous decision to abscond to sunnier climes, always makes me smile. Maurizio and Esther have prepared more healthy and tasty meals for me than I can count. I am blessed to have some friends in Sicily whom I would like to visit even more than I do. Fabio, Simona and Marco – eating pasta norma with you has led to some of the happiest moments I experienced during this writing process. Vittoria, I cannot thank you enough for your friendship and for introducing me to your delightful (and growing) family in Catania. Even though I met Jon Parry many years ago in Cambridge, he has become Sicilian in my mind and during his visits I have learned many historical and epicurean truths. In America I must mention Randall, Alison, Alexander and Michael Heather. Your home in Yorktown Heights feels like my own when I am lucky enough to visit. Finally, thanks to Steve Fraidin and Lori Kramer who, though coming relatively late into this narrative, allowed me to share an excellent trip to the Highlands of Scotland and a number of New Year’s Eves with them.

I also received some important institutional support in the creation of this book. Glasgow University, as well as providing an intellectual home, was generous in its allocation of research leave and research funding. The Carnegie Fund for the Universities of Scotland and the Naval Historical and Heritage Center in Washington, DC both provided research grants which allowed me to press on more quickly with the research. I would also like to thank the National Institute of Defense Studies in Japan for hosting me twice and allowing me to develop some of the early ideas for this book. Finally, many thanks go to Michael Watson, Rosalyn Scott and everyone at Cambridge...
University Press for their effort and professionalism. I hope they are pleased with the final product.

Finally, I must always thank Zara Steiner, who through her patience many years ago imparted a wisdom and integrity about historical writing that I try my best to live up to today.
