<i>List of Illustrations</i>	<i>page</i> xi
<i>List of Tables</i>	xiii
<i>Preface</i>	xv
1 Introduction	1
1.1 Why Are Molecules Important in Astronomy?	1
1.2 A Very Brief History of the Discovery of Molecules in Space	3
1.3 Gas and Dust	9
1.4 What's in This Book	14
1.5 Further Reading	15
2 Spectra and Excitation of Interstellar Molecules	16
2.1 Molecular Spectroscopy	16
2.2 Radiative Transport in the Interstellar Medium	20
2.3 Determining the Level Populations	21
2.4 Further Reading	23
3 Astrochemical Processes	24
3.1 What Drives Cosmic Chemistry?	24
3.2 Chemistry Initiated by Electromagnetic Radiation	25
3.3 Chemistry Initiated by Cosmic Rays	30
3.4 Chemistry and Dust	37
3.5 Chemistry Initiated by Gas Dynamics	42
3.6 Isotopes in Interstellar Chemistry	46
3.7 Conclusions	48
3.8 Further Reading	48

Cambridge University Press

978-1-107-01816-7 - Observational Molecular Astronomy: Exploring the Universe
Using Molecular Line Emissions

David A. Williams and Serena Viti

Table of Contents

viii

Contents

4	Physical Processes in Different Astronomical Environments	50
4.1	Varying the Intensity of Electromagnetic Radiation	51
4.2	Varying the Cosmic Ray Ionisation Rate	53
4.3	Varying the Dust: Gas Ratio and the Metallicity	54
4.4	Varying Shock Speeds in Interstellar Gas	56
4.5	Timescales	57
4.6	Conclusions	58
4.7	Further Reading	61
5	Molecular Tracers in the Milky Way Galaxy	62
5.1	Molecular Clouds	62
5.2	Star-Forming Regions and Their Outflows	69
5.3	Formation of Low-Mass Stars	80
5.4	Formation of High-Mass Stars	85
5.5	Circumstellar Material	88
5.6	The Galactic Centre	95
5.7	Further Reading	98
6	Molecular Tracers in External Galaxies	99
6.1	Multicomponent Galaxies	101
6.2	Characterisation of Galaxies via Molecules	111
6.3	Recent Molecular Line Studies of Galaxies	115
6.4	Star Formation and the Initial Mass Function	123
6.5	Molecules in the Perseus Cluster of Galaxies	125
6.6	Conclusions	126
6.7	Further Reading	127
7	The Early Universe and the First Galaxies	128
7.1	The Pregalactic Era	128
7.2	Formation of the First Stars	132
7.3	Formation of the First Galaxies	134
7.4	Further Reading	140
8	Recipes for Molecular Submillimetre Astronomy	141
8.1	The Antenna Temperature	142
8.2	Local Thermodynamic Equilibrium	143
8.3	Non-LTE	149
8.4	Further Reading	151

Cambridge University Press

<i>Contents</i>		ix
9	Chemical and Radiative Transfer Models	152
9.1	Chemical Modelling	152
9.2	Radiative Transfer Modelling	158
9.3	Further Reading	164
10	Observations: Which Molecule, Which Transition?	165
10.1	Further Reading	167
	<i>Appendix: Acronyms</i>	169
	<i>Index</i>	171
