Figures

3.1. Polythetic classification, showing the variable interrelationships among components	<i>page</i> 90
5.1. Regional distribution of ethnic groups, 2000	164
5.2. Urbanization rate by ethnic group and year	165
5.3. Rural poverty headcount, cases, and confidence interval bounds by ethnic group, CHIP 2002	172
5.4. National percent illiterate by ethnic group and year, adult population	180
5.5. National percent college-educated by ethnic group and year, adult population	181
5.6. Enrollment rates among seven- to sixteen-year-olds by year and ethnic category	189
5.7. Access to social insurance programs by ethnic category, 2005	194
6.1. Scheduled Tribe expenditures grew more rapidly at the higher end of the expenditure distribution between 1994 and 2005	216
6.2. Most Scheduled Tribe (ST) men in rural India are self-employed subsistence farmers: 2004–2005	219
6.3. Scheduled Tribe members earn more than non-Scheduled Tribe members when employed in high-paying, regular, urban jobs	220
6.4. No significant differences exist in earnings among casual, low-skilled workers	221
6.5. More Scheduled Tribe children are severely stunted and wasted within the first ten months of their birth	226
6.6. More Schedule Tribe members now have some education, but gaps are still large after primary level	232
6.7. Scheduled Tribe women are at a significant disadvantage compared to non-Scheduled Tribe women and Scheduled Tribe men: They are in school for fewer years	234

xii	<i>Tables</i>	
5.16.	Reported health status by ethnic group, adult population (percent)	192
5.17.	Village health facilities in minority and nonminority villages (two definitions)	193
5.18.	Access to social insurance programs by ethnic group and residence status, adult population, excluding students, 2005 (percent)	195
6.1.	Share of Scheduled Tribes in total population, 1951–2001	210
6.2.	Basic demographic characteristics, Scheduled Tribes and total population, 1993–2005	211
6.3.	Trends in poverty incidence (Headcount Index), 1983–2005 – Scheduled Tribes are poorer than other social groups	212
6.4.	Trends in poverty gap (FGT P ₁ Index), India, 1983–2005 – slower decline in poverty gap for Scheduled Tribes	212
6.5.	Trends in poverty severity (FGT P ₂ Index), India, 1983–2005 – slower decline in poverty severity for Scheduled Tribes	213
6.6.	Distribution of Scheduled Tribes across deciles (Wealth Index), 1993–2005: Scheduled Tribes are concentrated in the poorest wealth deciles	214
6.7.	Poverty incidence is higher in states with a high proportion of Scheduled Tribes (percent)	215
6.8.	Sample means: Urban and rural ST households differ, particularly in characteristics of the household head (HH)	218
6.9.	Infant mortality rates are similar across the population, but by age five, ST children are at significantly greater risk of dying	224
6.10.	Under-five mortality is higher in states with high proportion of Scheduled Tribe members	225
6.11.	The gap between Scheduled Tribes and others persists in immunization outcomes, as well	227
6.12.	Scheduled Tribe children are less likely to be treated for illnesses (percent)	229
6.13.	Despite gains, maternal health indicators for ST women remain below par (percent)	230
6.14.	Educational attainment (1983–2005): Scheduled Tribes still lag far behind the rest (percent)	231
6.15.	Age-grade distortion is higher among Scheduled Tribe children (percent)	233
7.1.	Poverty by ethnicity, urban/rural, and elevation	254
