

Greek word index

This index contains a selection of Greek words used in *Mixtures*, with their English translations, referenced by page and line number of Helmreich's edition (e.g. 36,13 = page 36, line 13; 38,6.14 = page 38, lines 6 and 14). (Helmreich's edition itself contains only a very selective *Index vocabulorum memorabilium*.) It is intended to be of help in finding both the translation and the occurrences of technical terminology or otherwise interesting vocabulary. The list of instances is usually comprehensive, but for words with very large numbers of instances, only a few are given (followed by 'etc.'). or in some cases the instances selected reflect passages with particularly important discussion. Numbers in bold indicate passages with discussion focused closely on the definition or technical understanding of the term. In some cases, a continuous passage is cited in which a specific word is used a number of times and where the passage as a whole is illuminating for the meaning of the word (e.g. γῆρας 45,1–47,2, or νοεῖν 54,22–55,2).

General index

This index is intended mainly to enable the reader to locate discussions in the translators' introduction and notes. For occurrences of specific Greek terms in Galen's text, the Greek word index may be consulted; and for proper names mentioned directly by Galen, the Index of names. References to precise passages in texts of ancient authors – as opposed to discursive or general references to these texts, which appear here – will be found rather in the Index of passages cited.
