Preface xi
Common symbols xiv

1 An overview: the realm of economic policy 1

Part I The classical theory of economic policy 15
2 Statics 17
3 Dynamics 45

Part II From the classical to the new theory of economic policy 81
4 The Lucas critique 83
5 Policy games: an introduction 95

Part III The new theory of economic policy: statics 123
6 A theory of strategic conflict: foundations 125
7 From individual players to system controllability 152
8 Conflicts and coordination among groups 170
9 Announcements as a coordination mechanism 197

Part IV The new theory of economic policy: dynamics 225
10 Controllability in a strategic dynamic setting 227

Figures

2.1 Fixed target approach  
2.2 Iso-loss curves  
2.3 Flexible target approach  
2.4 Losses and optimization  
3.1 A time line for dynamic policy problems  
3.2 Relations among state controllability (C), null controllability (NC) and stabilizability (S)  
3.3 A schematic view of the sequence of an optimal policy plan  
5.1 Best response function  
5.2 Quasi-reaction function  
5.3 Stackelberg equilibrium  
5.4 Nash equilibrium  
6.1 A monetary and fiscal policy game  
9.1 Announcement equilibrium vs. commitment  
9.2 Multiple Nash equilibria  
9.3 Announcement equilibria  
9.4 Market shares and Δt
Tables

3.1 Summary of policy models  
6.1 Properties of the model  
9.1 Monetary and fiscal announcements  
11.1 A complete taxonomy
