Anders Åslund is known for making bold predictions that initially arouse controversy but become common wisdom a few years later. He foresaw the collapse of the Soviet Union in his book *Gorbachev’s Struggle for Economic Reform* (1989). He depicted the success of Russia’s market transformation in *How Russia Became a Market Economy* (1995), when others saw little but chaos. After Russia’s financial crisis of 1998, Åslund insisted that Russia had no choice but to adjust to the world market (*Building Capitalism*, 2002), although most observers declared the market economic experiment a failure.

- Why did Russia not choose Chinese gradual reforms?
- Why are the former Soviet countries growing much faster than the Central European economies?
- How did the oligarchs arise?
- Where are the postcommunist countries heading?

These are just some of the questions answered in this book, *How Capitalism Was Built*, which tells the story of how all but three of twenty-one former communist countries were transformed into market economies from 1989 to 2011, but fewer than half of them became democracies.

Anybody who wants to understand the often confusing dramas unfolding in the region and to obtain an early insight into the future will find this book useful and intellectually stimulating.

Anders Åslund is a leading specialist on postcommunist economic transformation with more than thirty years of experience in the field. The author of twelve books, he also has worked as an economic advisor to the Russian government, to the Ukrainian government, and to the president of the Kyrgyz Republic.

Dr. Åslund joined the Peterson Institute for International Economics in Washington, DC, in 2006. Before that he was the director of the Russian and Eurasian Program at the Carnegie Endowment for International Peace. He teaches at Georgetown University. He was the founding director of the Stockholm Institute of Transition Economics and professor at the Stockholm School of Economics. Dr. Åslund was born in Sweden and has served as a Swedish diplomat in Moscow, Geneva, and Kuwait. He earned a Ph.D. from Oxford University.

Introduction: A World Transformed 1
Overview of the Arguments of This Book 4

1. Communism and Its Demise 14
   Real Socialism 14
   Decline and Fall of Socialism 19
   The Demise of Communism in Central Europe 27
   The Collapse of the Soviet Union 30

2. Radical Reform versus Gradualism 36
   The Radical Reform Program: A Big Bang 38
   Gradual Reform Programs 44
   Rent Seeking: The Scourge of Transition 55
   Criticism of Radical Reform after the Russian Financial Crash 60

3. Output: From Slump to Recovery and Boom 65
   Sharp Decline in Recorded Output and Varied Recovery 67
   Exaggeration of the Slump 70
   Radical Reform: Least Decline and Early Recovery 77
   Late Reformers: Boom from 1999 until 2008 84

4. Liberalization: The Creation of a Market Economy 92
   Two Strategies of Deregulation 93
   Liberalization of Foreign Trade 100
   Labor Market Policy 102
Contents

5. From Hyperinflation to Financial Stability
   High and Persistent Inflation 116
   Establishing National Currencies 119
   Radical Fiscal Adjustment Was Key 123
   Monetary Policy: From Loose to Strict 128
   Exchange Rates: Currency Board or Free Float 133
   Tax Policy: From Social Democratic to Liberal 137
   Dramas of Financial Stabilization 141
   The Russian Financial Crash of 1998 147
   International Assistance: Insufficient but Crucial 152
   Major Lessons from Postcommunist Stabilization 159

6. Privatization: The Establishment of Private Property Rights
   Differing Aims of Privatization 166
   Small-Scale Privatization: If Started, Swiftly Done 176
   Large-Scale Privatization: The Biggest Headache 177
   Privatization of Land, Real Estate, and Housing 186
   New Enterprise Development: The Ultimate Success 187
   Great Achievements of Privatization 190
   The Economic Role of Oligarchs 201
   Are Oligarchs Economically Efficient? 206
   Vital: Speed and Legitimacy of Property Rights 211

7. The Social System
   Incomes: Differentiation and Poverty 216
   Life and Health 221
   Education Adjusting to Demand 227
   Social Transfers and Pension Reform 230
   Three Alternative Social Models 237

8. The Politics of Transition
   Democratic Breakthrough and Consolidation: Critical for Successful Transformation 240
   The Political Economy of Policy Reform 248
   An Underreform Trap 252
   The Politics of Oligarchy 258
   Putin's Alternative: Consolidation of Authoritarian Power 260
   Renewed Democratization: Colored Revolutions 264
   Ideology, Parties, Electoral Rules, and Constitutions 267
Contents

How to Tame the Leviathan: Reform of the Communist State 275
Why Has Democracy Building Done So Poorly? 277

9. From Crime Toward Law 283
   An Explosion of Crime 284
   Attempts at Building a Legal System 287
   Corruption: The Bane of Transition 292

10. The Importance of the European Union 301
    The Dream of Europe 303
    Western Failure to Act in the East 307
    The Persistent Failure of the CIS 313
    Trade Policy: A Gulf between the EU and the CIS 318
    European Neighborhood Policy and Eastern Partnership 323

    Success Bred Overheating 327
    Exchange-Rate Dilemmas 332
    Crisis Resolution 336
    Banking Crisis 339
    Outcome of the Crisis Resolution 345
    The EU Countries Suffered More But Reformed More 353

12. Conclusions: A World Transformed 358
    A Broadening Divide between the EU and the Post-Soviet World 358
    Achievements and Revelations 361

Bibliography 367
Index 401

Acknowledgments

This book is a revised and updated second edition of my book How Capitalism Was Built (Cambridge University Press, 2007). That book was, in turn, partly a sequel and partly an updating and revision of my book Building Capitalism: The Transformation of the Former Soviet Bloc (Cambridge University Press, 2002). As time passes, the perspectives on how capitalism was built have become much clearer, allowing me to paint the picture in stronger colors and focus on its main features. The two major financial crises, the Russian financial crash of 1998 and the global financial crisis starting in 2007, have done much to clarify the case. Therefore, I have reduced various details that in hindsight appear less relevant.

The Peter G. Peterson Institute for International Economics and its director, C. Fred Bergsten, have graciously permitted me to write this book in the course of 2006 and again in 2011. Julija Remeikaite and Natalia Aivazova have offered me wonderful research assistance. Discussions at the Peterson Institute have been most stimulating, and I am grateful to many colleagues, especially Morris Goldstein, Simon Johnson, Michael Mussa, John Williamson, and Edwin Truman.

Victor Pinchuk and Hans and Märit Rausing have provided generous financial support. I am deeply indebted to them also for their intellectual input.

This is the fifth book I am doing with Cambridge University Press, and I want once again to thank Scott Parris for his expediency and kindheartedness.

To understand what is going on in this wide region, reading is never sufficient. One also needs to travel extensively and talk to many people. I am grateful to a great many interlocutors. The gratitude that I expressed to many people in Building Capitalism remains valid also for this book. In addition, I thank a large number of people for their oral contribution to my

I have benefited greatly from comments on draft chapters by Simon Johnson, John Williamson, John Odling-Smee, Johannes Linn, Albert Jaeger, Andrea Schaechter, Julija Remeikaite, Natalia Aivazova, Mathew Gibson, Anna Åslund, and an anonymous reviewer. I also want to thank the many graduate students at the School of Foreign Service at Georgetown University, whom I have taught out of How Capitalism Was Built for several years, for all their feedback.

Most of all, I thank my understanding and supportive family, who have helped me to write this book in more ways than I can mention here.

The responsibility for any remaining faults rests with me.

Anders Åslund
