----------------------	------------------

Part 1

The issues of plant science and food security	1
--	----------

Introduction	1
--------------	---

DAVID BAULCOMBE	
-----------------	--

1 Reaping the benefits of plant science for food security	5
---	---

DAVID BAULCOMBE	
-----------------	--

2 Global population growth, food security and food and farming for the future	23
---	----

JIM M. DUNWELL	
----------------	--

3 New genetic crops in a global context	39
---	----

GORDON CONWAY AND KATY WILSON	
-------------------------------	--

4 The economic and environmental impact of first-generation biotech crops	61
---	----

GRAHAM BROOKES	
----------------	--

5 Germplasm diversity and genetics to drive plant breeding for Africa	82
---	----

WAYNE POWELL AND TINA BARSBY	
------------------------------	--

6 Using molecular breeding to improve orphan crops for emerging economies	95
---	----

IAN GRAHAM	
------------	--

Contents

	Part 2	
	New genetic crops across the emerging world	107
	Introduction	107
	CHRISTOPHER J. LEAVER	
7	Status of crop biotechnology and biosafety in Africa	115
	DIRAN MAKINDE	
8	Transforming agriculture in Argentina: the role of genetically modified (GM) crops	134
	EDUARDO J. TRIGO AND EUGENIO J. CAP	
9	China: earlier experiences and future prospects	150
	LU BAO-RONG	
10	Genetically engineered crops would ensure food security in India	167
	CHAVALI KAMESWARA RAO	
11	Plant genetic improvement and sustainable agriculture	184
	PAMELA RONALD	
12	Nutritional enhancement by biofortification of staple crops	199
	ADRIAN DUBOCK	
13	Transforming the cowpea, an African orphan staple crop grown predominantly by women	221
	LARRY MURDOCK, IDAH SITHOLE-NIANG AND T. J. V. HIGGINS	
14	Transgenic marine algae for aquaculture: a coupled solution for protein sufficiency	233
	JONATHAN GRESSEL	
	Part 3	
	Lessons learned about implementing new genetics crops in policy	247
	Introduction	247
	BRIAN HEAP	
15	Enabling factors for an innovation-ready agricultural landscape in African countries	251
	SAMUEL BURCKHARDT, CLAUDIA CANALES-HOLZEIS, JULIAN GRAY AND BRIAN HEAP	
16	Regulatory systems and agricultural biotechnology	267
	MARK F. CANTLEY AND DREW. L. KERSHEN

	Contents	vii
17	Biotechnology research for innovation and sustainability in agriculture in the European Union	283
	ALFREDO AGUILAR, DANUTA CICHOCKA, JENS HÖGEL, PIERO VENTURI AND IOANNIS ECONOMIDIS	
18	Europe, GM crops and food: understanding the past, looking to the future	298
	MARTIN PORTER	
19	US international engagement in agricultural research and trade	313
	JACK A. BOBO AND ROGER BEACHY	
	Part 4	
	Social, legal, ethical and political issues	325
	Introduction	325
	DAVID J. BENNETT	
20	Have GM crops and food a future in Europe?	331
	GEORGE GASKELL, SALLY STARES AND CLAUDE FISCHLER	
21	Dealing with challenges and societal expectations: the industry's response	348
	NATHALIE MOLL AND CAREL DU MARCHIE SARVAAS	
22	Media and GM: a journalist's challenge	364
	TIM RADFORD	
23	The environmental movement's earlier and current viewpoints and positions	375
	PIET SCHENKELAARS	
24	Social and ethical issues raised by NGOs and how they can be understood	386
	RICHARD C. JENNINGS	
25	Advancing the cause in emerging economies	400
	KLAUS AMMANN	
	Index	418
