English in the Caribbean

This book presents an in-depth study of English as spoken in two major anglophone Caribbean territories, Jamaica and Trinidad. Based on data from the International Corpus of English, it focuses on variation at the morphological and syntactic level between the educated standard and more informal educated spoken usage. Dagmar Deuber combines quantitative analyses across several text categories with qualitative analyses of transcribed text passages that are grounded in interactional sociolinguistics and recent approaches to linguistic style and identity. The discussion is situated in the context of variation in the Caribbean and the wider context of world Englishes, and the sociolinguistic background of Jamaica and Trinidad is also explored. This volume will be of interest to students and researchers interested in the fields of sociolinguistics, world Englishes and language contact.

DAGMAR DEUBER is Professor in the Department of English at the University of Münster, Germany, where she holds the Chair of Variation Linguistics. She has also taught and conducted research at the University of the West Indies in St Augustine, Trinidad.
The aim of this series is to provide a framework for original studies of English, both present-day and past. All books are based securely on empirical research, and represent theoretical and descriptive contributions to our knowledge of national and international varieties of English, both written and spoken. The series covers a broad range of topics and approaches, including syntax, phonology, grammar, vocabulary, discourse, pragmatics and sociolinguistics, and is aimed at an international readership.

1 Introduction  1
  1.1 Variation, style and standards in Jamaica and Trinidad: introductory examples  1
  1.2 What is English in the Caribbean? Approaches to the Creole continuum  3
  1.3 Standards in English in the Caribbean  11
  1.4 Style in English in the Caribbean  15
  1.5 Aims and structure of the study  19

2 The background and context of English in Jamaica and Trinidad  22
  2.1 The Creoles of Jamaica and Trinidad in the context of varieties of Caribbean English Creole  22
    2.1.1 The linguistic geography of the anglo-Creolophone Caribbean  22
    2.1.2 Selected morphological and syntactic features of Jamaican and Trinidadian Creole  23
  2.2 The historical background  25
    2.2.1 Historical aspects of language contact in the Caribbean  25
    2.2.2 Brief sketch of the linguistic histories of Jamaica and Trinidad  27
  2.3 The social context  29
  2.4 The sociolinguistic context  30
    2.4.1 Language attitudes and language functions  30
    2.4.2 Language-in-education and language planning  37
  2.5 A note on Tobago  43
Contents

3 The sociolinguistics of style and the Creole continuum
   3.1 Approaches to style in sociolinguistics
   3.2 Related research paradigms
      3.2.1 Sociolinguistic research on code-switching
      3.2.2 Corpus-based register studies
   3.3 Approaches to style in Caribbean Creole continua and related research

4 Data and methodology
   4.1 Data
   4.2 Methodology

5 Style in Jamaican English: analysis of conversations
   5.1 Quantitative analyses of morphological and syntactic variables
      5.1.1 Syntax of direct wh-questions
      5.1.2 Copula forms
      5.1.3 Past marking
      5.1.4 Agreement marking on verbs
      5.1.5 Main verb negation
      5.1.6 Noun morphology
      5.1.7 Pronoun morphology
      5.1.8 Summary
   5.2 Inter- and intratextual variation in ICE-Jamaica StA-001 to 040
      5.2.1 Intertextual variation
      5.2.2 Intratextual variation
      5.2.3 Summary
   5.3 Discussion
   5.4 Conclusion

6 Style and standard in Trinidadian English: analysis of four text categories
   6.1 Quantitative analyses of morphological and syntactic variables across four text categories
      6.1.1 Syntax of direct wh-questions
      6.1.2 Copula forms
      6.1.3 Past marking
      6.1.4 Agreement marking on verbs
      6.1.5 Main verb negation and negation in copula environments
      6.1.6 A note on does
      6.1.7 Noun morphology
Contents ix

6.1.8 Pronoun morphology 163
6.1.9 Summary 164
6.2 Inter- and intratextual variation in four text categories 166
6.2.1 Broadcast news 166
6.2.2 Unscripted speeches 169
6.2.3 Class lessons 173
6.2.4 Conversations 183
6.2.5 Summary 198
6.3 Discussion 199
6.4 Conclusion 200

7 The modal verbs can/could and will/would in Caribbean
and other varieties of English 202
7.1 Background and previous research 203
7.1.1 Caribbean varieties of English 203
7.1.2 Other varieties of English 206
7.2 Notes on methodology and data 210
7.3 Can/could 211
7.4 Will/would 222
7.5 Conclusion 236

8 Conclusion 238
8.1 Variation, style and standards in English in the
Caribbean 238
8.1.1 Style in spoken English in the Caribbean 238
8.1.2 Reinterpreting the Creole continuum 241
8.1.3 Style and the construction of identities in
discourse 243
8.1.4 Standards in English in the Caribbean 244
8.2 Comparison with other New Englishes and
implications 245
8.2.1 ‘Angloversals’ and language contact in the
New Englishes 245
8.2.2 Style and social meaning in the New Englishes 249

Acknowledgements

This book would not be what it is without the inspiration and support of two people in particular: Christian Mair at the University of Freiburg and Valerie Youssef at the University of the West Indies, St Augustine, Trinidad. By employing me as a member of the ICE-Jamaica team, Christian raised my interest in Jamaican English many years before I embarked on the present work, and he has provided much valuable advice and support for this project; Valerie facilitated my stay at the University of the West Indies, St Augustine, during the academic year 2006–7 and not only collaborated with me then but has continued to do so since. I extend my sincere thanks and appreciation to both of them. Any shortcomings in this book are of course my own responsibility.

My work on English in Jamaica has also been inspired by Lars Hinrichs’ research on Jamaican computer-mediated communication and has benefited from our joint studies and the discussions we have had on the subject of variation in spoken and written English in Jamaica. I am further grateful to all those who commented on the conference papers and articles in which parts of this work were first presented.

My research on English in Trinidad at the University of the West Indies, St Augustine, was made possible by a post-doctoral fellowship from the German Academic Exchange Service (DAAD), which is gratefully acknowledged. I would also like to acknowledge financial support from the German Research Foundation for the work on Jamaican English carried out in Freiburg in the period 2005–8 (grant DFG MA 1652/4, to Christian Mair) and a grant from the Campus Research and Publication Fund, University of the West Indies, St Augustine (to Valerie Youssef and myself, 2007–9). Finally, in 2009–10 my work was supported by the Ministry of Science, Research and the Arts Baden-Württemberg and the European Social Fund within the Schlieben-Lange-Programm.

I would like to give special mention to those who in the last few years have contributed to the compilation of the corpora that are the source of the data on which the present study is based: ICE-Jamaica and ICE-Trinidad & Tobago. It was a pleasure to work with Ingrid Rosenfelder, Susanne Jantos and Nicole Höhn on the completion of ICE-Jamaica. Hubert Devonish, Karen Carpenter
Acknowledgements

and students working under their supervision at the University of the West Indies, Mona, provided the recordings needed to complete the corpus – in particular, a large number of conversations – and helped proofread the transcriptions. Lars Hinrichs and Joseph Farquharson helped us solve a good number of transcription problems as well. ICE-Trinidad & Tobago has made much progress since its initiation in 2006 thanks especially to the efforts of research assistants at the University of the West Indies, St Augustine, as well as the Universities of Freiburg and Münster. I mention here those who helped to transcribe the data analysed in the present study (some of them also helped in data analyses): Janielle Garcia, Ryan Durgasingh, Christine Wender, Samuel Harding, Luminita Trasca and Johanna Wulfert. The first set of data to become part of ICE-T&T, which consisted of class lessons and conversations among teachers, was collected and transcribed by the students in the class LING 3099 at the University of the West Indies in the academic year 2006–7 (taught jointly by Valerie Youssef and me), from whom I also learned a great deal about Trinidadian English and Creole as well as sociolinguistic issues in education in Trinidad. My great appreciation is of course also due to all those in Jamaica and Trinidad who allowed us to record their speech.

There are many people, apart from Valerie Youssef, who helped make my stay in Trinidad both pleasant and successful by being kind and helpful. I can mention only a few of them here: Kathy-Ann Drayton, Giselle Rampaul, Saadiqa Khan, Keisha Evans, Adel Bain, Radica Mahase and Glenda Leung. Glenda joined the Department of English at the University of Freiburg in 2008 and became a welcome source of information on matters of Trinidadian language use.

Since 2010, at Münster, Guyanne Wilson has been my main native-speaker informant, while Carla Postmeier has provided expert secretarial support, and Judith Evers, Eva Canan Hänel, Friederike Hahn as well as Jane Philip diligent proofreading.

In revising the manuscript for publication I have benefited from the helpful comments of Merja Kytö, the series editor, and two reviewers. At Cambridge University Press, I am especially grateful to Helen Barton for her interest, encouragement and support. I would also like to thank the copy editor, Kay McKechnie, the production team, and Sarah Green as well as Helena Dowson, who gave advice on several details including the cover photographs. In connection with the latter, I am furthermore grateful for the help of Friederike Hahn, Maria Huggins and Patrice Quammie.

To my family, I owe the greatest thanks for their support throughout the journey of this project.
