Index

Page numbers in bold type indicate definitions of terms, those in italics indicate figures and tables.

A priori modelling, 48
parameters, 247, 249
ABCD model, 90, 339, 342
Actual evaporation, 40, 321
Air temperature, 24
Allocation rule, 22
Analogue catchments, 252
Andrews curve, 114, 119
Annual FDCs (APFCs), 135
Annual runoff, 7, 14, 70, 280
variability, 70, 71, 72, 72
Anthropic effects, 43
See also Change
Aridity, 43
Baseflow, 54, 167
index, 145, 146, 164, 339–40
Bias, 25
Blind testing, 25, 28
Bottom-up approach, 55, 58, 64, 315
Budyko curve, 31, 73, 74, 77, 271
type model, 84, 85, 86, 274
Catchment characteristics, 11, 19, 334, 350
characterization, 41

grouping, 20, 79, 114, 145, 236
similarity, 18, 19, 113, 145, 169, 197, 230, 235, 238
storage, 74
Catena concept, 56
Change, 77, 110, 166, 194, 232, 350, 378
Change of runoff dynamics, 233
Channel routing, 231
Chernoff faces, 113
Classification, 21
Classification tree, 117
Climate classification, 19
forcing, 72, 105, 138
similarity, 18, 19, 112, 169, 197, 234
Cluster analysis, 82, 82, 114, 115, 146
Coefficient of determination, 27
Co-evolution, 11, 29, 55, 65–6, 212, 374, 376–7
Co-kriging, 121
Comparative analysis, 15, 380
assessment, 23, 28, 262, 361, 374
hydrology, 16, 17, 23, 27, 58–9, 376, 378
Complex systems, 12, 26
Computational units, 3
Concavity index, 143, 144
Conceptual model, 244, 246
Connectivity of flow paths, 54, 56
Constraining model parameters, 256, 262
Contiguous regions, 81, 115, 146
Continuous models, 23, 90, 124, 154
Correlation coefficients, 25
Cross-validation, 25, 303, 307, 346, 362, 380
Dams, 1, 43, 110, 195
Darby’s law, 58, 64
Darwinian approach, 17, 58, 362, 369, 377, 379
Data, 29, 385
availability, 24
scarcity, 30
Derived distribution methods, 23, 89, 123, 153, 179, 212
Dimensionless FDCs, 303
Distance measures, 21
Distributed (hydrological) models, 64, 245, 350
model intercomparison project (DMIP), 256
observations, 242
Dominant flow paths, 54
hydrologic processes, 232, 257
land cover characteristics, 261
runoff generation mechanism, 236
Donor, 252
Downscaling method, 125, 255
Downward or holistic approach, 9
Drainage area ratio method, 238
Drainage density, 19
Duration curve (precipitation), 145
Dynamic data, 256, 261
Dynamics of the runoff, 227
Ecological flow, 78
Environmental flow Elevation, 24
Emergent patterns, 13, 375
Empirical Cumulative Distribution Function (ECDF), 287
orthogonal function, 120
End Member Mixing Analysis, 60
Ensemble Kalman filter, 260
Ensembles, 346–7
Entropy characteristics, 280
Environmental change, 140, 142
flow, 135, 136, 163, 294, 297
Ephemeral rivers, 138, 317
Erosion marks, 249
Error propagation, 379–80
ERS Scatterometer, 261
Euclidean distance, 21
European Water Archive, 35
Evaporation, 40, 72
estimates, 261
Extrapolation, 29, 51, 53
Fast flow duration curve, 145, 154
Field campaigns, 29, 31–2, 41, 65, 249, 262, 315
Fixed regions, 81, 115, 146
Floods, 7, 14, 189, 309, 349
Attention by Reservoirs and Lakes index FARL, 307
frequency hydrology, 219, 226, 306, 310, 373
processes, 16, 191, 196
regime, 195, 197
Flow paths, 53, 271, 313, 357
processes, 53
regime, 103, 105, 106
Flow duration curve (FDC), 7, 14, 135, 136, 137, 271, 290, 295, 300, 339–40
slope, 141
Forest removal, 233
Fourier analysis, 118
Fragmentation in hydrology, 4, 361
Frequency of runoff, 317
Functional landscape unit, 236
Fu-Zhang model, 85
Gauging the ungauged catchments, 318, 385
Generalisations, 15
Generalised Likelihood Uncertainty Estimation, 223
Geology, 33, 57, 140, 141, 145, 164, 169, 198
Geostatistical methods, 22, 83, 88, 119, 151, 208, 239, 295
Glaciers, 106
Global data sets, 29, 31, 36
regressions, 12
Runoff Data Center (GRDC), 35
scale, 31
GRACE (Gravity Recovery and Climate Experiment), 261
Growth curve, 70, 87, 196, 206
Habitat duration curves, 136, 136
Hard unconventional hydrological information (hard data), 51, 262, 309, 323
Hierarchical clustering, 147, 147
data acquisition, 30, 44
Hillslope runoff mechanisms, 53, 229
Historic floods, 217, 306
Homogeneity, 21, 79
Horton Index, 76
Hortonian overland flows, 318
Human impacts. See Change
Hydraulic conductivity, 335
geometry, 248
potential, 53
Hydrodynamic modelling of ungauged basins, 249
Hydrogeology, 66
