	Introduction	1
<b>1</b>	<b>Principal parts</b>	9
1.1	The traditional notion of principal parts	9
1.2	Principal parts in linguistic theory and in language typology	15
1.3	Some preliminary assumptions	25
<b>2</b>	<b>Plats</b>	40
2.1	Plats and their parts	40
2.2	The representation issue	51
<b>3</b>	<b>A typology of principal-part systems</b>	53
3.1	A typology of principal-part systems	53
3.2	Criterion A: How many principal parts are needed to determine a lexeme's IC membership?	54
3.3	Criterion B: How many dynamic principal parts are needed to determine a given cell in a lexeme's realized paradigm?	58
3.4	Criterion C: To what extent are particular realized cells favored as optimal static principal parts?	62
3.5	Summary	77
<b>4</b>	<b>Inflection-class transparency</b>	79
4.1	Introduction	79
4.2	Conjugation classes in Fur	84
		vii

Table of Contents

[More information](#)viii *Contents*

4.3	Deviations from maximal transparency in Fur verb paradigms	88
4.4	A first measure of IC transparency: IC predictability	94
4.5	A fourth criterion of IC transparency	99
4.6	A second measure of IC transparency: cell predictability	99
4.7	IC transparency and the No-Blur Principle	103
4.8	IC transparency as a dimension of typological variation	107
4.9	IC predictability, cell predictability, and entropy as measures of an inflection-class system's complexity	109
4.10	Conclusions	114
<b>5</b>	<b>Grammatically enhanced plats</b>	117
5.1	Sanskrit declension	118
5.2	Measuring the IC complexity of the hearer-oriented declensional plat	119
5.3	Grammatical disambiguation of distinguishers in the Sanskrit declensional plat	132
5.4	The effects of enhancing principal parts with gender specifications and/or stem demarcations	143
5.5	Conclusions	155
<b>6</b>	<b>Impostors and heteroclites</b>	165
6.1	Impostors and plat construction	165
6.2	Heteroclites and plat construction	175
<b>7</b>	<b>Stems as principal parts</b>	182
7.1	Principal parts can be indexed stems as well as realized cells	182
7.2	The morphology and phonology of French verbs	184
7.3	Themes, stems, and conjugation classes in French	192
7.4	Static principal-part analysis	202
7.5	Dynamic principal-part analysis	204
7.6	IC predictability and cell predictability	204
7.7	Cross-linguistic comparison	214
7.8	Stem referrals and principal parts	215
7.9	Conclusions	221
<b>8</b>	<b>The Marginal Detraction Hypothesis</b>	225
8.1	Introduction	225
8.2	Detraction from an IC's predictability	226

		<i>Contents</i>	ix
8.3	Conjugation classes in Icelandic		228
8.4	Plats and subplats		230
8.5	IC predictability and amassed vs singleton conjugation classes		233
8.6	The isomorphic ideal		237
8.7	Distillations and amassed vs singleton conjugations		243
8.8	Discussion		248
8.9	French evidence for the Marginal Detraction Hypothesis		254
<b>9</b>	<b>Inflection classes, implicative relations, and morphological theory</b>		<b>262</b>
9.1	Two kinds of lexical representation and two kinds of inflectional rule		262
9.2	Two canonical extremes for a theory of inflection		263
9.3	A hybrid conception of inflectional morphology		271
<b>10</b>	<b>Entropy, predictability, and predictiveness</b>		<b>295</b>
10.1	Definitions		295
10.2	Entropy applied to plats		297
10.3	The effect of type frequency		301
10.4	Static near-principal parts		305
10.5	Inflection-class entropy measures		311
10.6	Summary		313
<b>11</b>	<b>The complexity of inflection-class systems</b>		<b>314</b>
11.1	Implicative relations and the complexity of IC systems		314
11.2	Measurable correlates of an IC system's complexity		317
11.3	Complexity as a typological variable of IC systems		325
11.4	Conclusions		339
<b>12</b>	<b>Sensitivity to plat presentation</b>		<b>344</b>
12.1	Common features of each inflection class		344
12.2	Rules of sandhi		348
12.3	Multiple stem segments		350
12.4	Morphophonemes		351
12.5	More rules of sandhi		352
12.6	Morphophonological rules		353
12.7	Surface-form representation		356
12.8	Multiple stems		359

x *Contents*

12.9	Stem forms	361
12.10	Additional syntactic data	362
12.11	Dealing with impostors	363
12.12	Conclusions	366
<b>13</b>	<b>The Principal-Parts Analyzer</b>	<b>368</b>
13.1	Input format	368
13.2	Output sections	373
13.3	Algorithms	378
	<i>Glossary</i>	380
