Introduction  1

Part I  Towards a theory of visual form

1  Borders of perception  9
   1.1 The stimulus  9
   1.2 Knowledge  16

2  Attributes of visual form  24
   2.1 Features  24
   2.2 Dimensions  27
   2.3 Transformations  34
   2.4 Gestalt properties  38

3  Process versus representation  45
   3.1 Process criteria  45
   3.2 Representation criteria  51

4  Models and principles  64
   4.1 Two representation models  64
   4.2 Two perception principles  74

5  Assumptions and foundations  83
   5.1 Visual information processing  83
   5.2 Mental and symbolic codes  86
   5.3 Theoretical foundations  91

Part II  Applications to visual form

6  Formal coding model  109
   6.1 Structural information  109
   6.2 Attributes of simplest codes  113
Contents

7 A perceptual coding manual 120
   7.1 Line drawings 121
   7.2 Surfaces 127
   7.3 Objects 134

8 Preference effects 147
   8.1 Occluding layers 148
   8.2 Translucent layers 156
   8.3 Rivalry 171

9 Time effects 181
   9.1 Induced temporal order 181
   9.2 Induced simultaneity 189

10 Hierarchy effects 198
   10.1 Superstructure dominance 198
   10.2 Mental rotation 204
   10.3 Orientation frames 216

Part III Extensions

11 Perception beyond SIT 224
   11.1 Metrical information 224
   11.2 Image versus mirror-image 234

12 SIT beyond perception 251
   12.1 Alphabetic letter series 251
   12.2 Evaluative pattern qualities 260

Overview 283
Conclusion 291
