1 Pure Premium Modeling Using Generalized Linear Models 1
Ernesto Schirmacher
1.1 Introduction 1
1.2 Data Characteristics 3
1.3 Exploratory Data Analysis 6
1.4 Frequency Modeling 12
1.5 Severity Modeling 23
1.6 Pure Premium 30
1.7 Validation 34
1.8 Conclusions 37
References 38

2 Applying Generalized Linear Models to Insurance Data: Frequency/Severity versus Pure Premium Modeling 39
Dan Tevet
2.1 Introduction 39
2.2 Comparing Model Forms 40
2.3 The Dataset and Model Forms 44
2.4 Results 47
Appendix 2.A Proof of Equivalence between Pure Premium Model Forms 55
Conclusion 57
Appendix 2.B The Gini Index 57
References 58
### Contents

3 Generalized Linear Models as Predictive Claim Models 60
   Greg Taylor and James Sullivan
   3.1 Review of Loss Reserving 60
   3.2 Additional Notation 63
   3.3 GLM Background 64
   3.4 Advantages of GLMs 66
   3.5 Diagnostics 68
   3.6 Example 73
   3.7 Conclusion 97
   References 98

4 Frameworks for General Insurance Ratemaking: Beyond the Generalized Linear Model 100
   Peng Shi and James Guszcza
   4.1 Introduction 100
   4.2 Data 102
   4.3 Univariate Ratemaking Framework 104
   4.4 Multivariate Ratemaking Frameworks 113
   4.5 Model Comparisons 122
   4.6 Conclusion 123
   References 124

5 Using Multilevel Modeling for Group Health Insurance Ratemaking: A Case Study from the Egyptian Market 126
   Mona S. A. Hammad and Galal A. H. Harby
   5.1 Motivation and Background 126
   5.2 Data 130
   5.3 Methods and Models 141
   5.4 Results 144
   5.5 Conclusions 146
   Acknowledgments 147
   Appendix 147
   References 157

6 Clustering in General Insurance Pricing 159
   Ji Yao
   6.1 Introduction 159
   6.2 Overview of Clustering 160
   6.3 Dataset for Case Study 161
   6.4 Clustering Methods 163
   6.5 Exposure-Adjusted Hybrid (EAH) Clustering Method 168
Contents ix

6.6 Results of Case Study 171
6.7 Other Considerations 177
6.8 Conclusions 178
References 179

7 Application of Two Unsupervised Learning Techniques to Questionable Claims: PRIDIT and Random Forest 180
Louise A. Francis
7.1 Introduction 180
7.2 Unsupervised Learning 181
7.3 Simulated Automobile PIP Questionable Claims Data and the Fraud Issue 182
7.4 The Questionable Claims Dependent Variable Problem 185
7.5 The PRIDIT Method 185
7.6 Processing the Questionable Claims Data for PRIDIT Analysis 187
7.7 Computing RIDITS and PRIDITS 187
7.8 PRIDIT Results for Simulated PIP Questionable Claims Data 188
7.9 How Good Is the PRIDIT Score? 189
7.10 Trees and Random Forests 192
7.11 Unsupervised Learning with Random Forest 194
7.12 Software for Random Forest Computation 195
7.13 Some Findings from the Brockett et al. Study 201
7.14 Random Forest Visualization via Multidimensional Scaling 202
7.15 Kohonen Neural Networks 204
7.16 Summary 205
References 206

8 The Predictive Distribution of Loss Reserve Estimates over a Finite Time Horizon 208
Glenn Meyers
8.1 Introduction 208
8.2 The CAS Loss Reserve Database 210
8.3 The Correlated Chain Ladder Model 212
8.4 The Predictive Distribution of Future Estimates 213
8.5 The Implications for Capital Management 216
8.6 Summary and Conclusions 223
References 223
Contents

9 Finite Mixture Model and Workers’ Compensation Large-Loss Regression Analysis 224
   Luyang Fu and Xianfang Liu
   9.1 Introduction 224
   9.2 DGLM and FMM 230
   9.3 Data 232
   9.4 Traditional Distribution Analysis 234
   9.5 Univariate and Correlation Analyses 239
   9.6 Regression Analysis 246
   9.7 Conclusions 257
   References 258

10 A Framework for Managing Claim Escalation Using Predictive Modeling 261
   Mohamad A. Hindawi and Claudine H. Modlin
   10.1 Introduction 261
   10.2 Loss Development Models 262
   10.3 Additional Data for Triage Models 267
   10.4 Factor Selection 271
   10.5 Modeling Method 274
   10.6 Conclusions 277
   10.7 Further Research Opportunities 277
   Appendix: Penalized Regression 280
   References 289

11 Predictive Modeling for Usage-Based Auto Insurance 290
   Udi Makov and Jim Weiss
   11.1 Introduction to Usage-Based Auto Insurance 290
   11.2 Poisson Model for Usage-Based Auto Insurance 294
   11.3 Classification Trees 301
   11.4 Implementing UBI Models with a Traditional Rating Plan 305
   11.5 Summary and Areas for Future Research 306
   Acknowledgments 307
   References 308
