

## Contents

<i>Foreword</i>	<i>page</i> xi
<i>Preface</i>	xiii
<i>Figure Credits</i>	xv
1 Introduction to Coastal Groundwater Systems	1
1.1 Coastal Zones	1
1.2 Coastal Hydrogeology	3
1.3 Coastal Groundwater Systems	5
1.4 Coastal Groundwater Chemistry	9
1.5 Hydraulic Heads in Coastal Aquifers	13
1.6 Darcy's Law in Variable-Density Systems	17
2 Governing Equations for Variable-Density Flow	19
2.1 Governing Equations	19
2.2 Groundwater flow	23
2.3 Solute Transport	32
2.4 Boundary and Initial Conditions	36
2.5 Numerical Methods	39
2.6 Data Needs	45
3 Analytical Solutions for a Steady Freshwater–Saltwater Interface	47
3.1 Introduction	47
3.2 Historical Note on Freshwater–Saltwater Relations	48
3.3 Mathematical Relations between Freshwater and Saltwater	51
3.4 Analytical Solutions for the Water Level and Interface in Coastal Aquifers	57
3.5 Pumping-Induced Seawater Intrusion	66
3.6 Pumping-Induced Saltwater Up-Coning	70
4 Groundwater Tidal Dynamics	73
4.1 Introduction	73
4.2 Basics of Sea Tides	74
4.3 Historical Note on Studies of Groundwater Tides	77
	vii

viii	<i>Contents</i>	
	4.4 Tidal Efficiency and Loading Efficiency	80
	4.5 Equations for Tide-Induced Water Level Fluctuations	84
	4.6 A Brief Review of Other Analytical Solutions	94
	4.7 Estimation of the Amplitude Ratio and Time Lag	98
	4.8 Notes on the Theory and Practice of Tidal Methods	101
5	Hydrogeochemistry of Coastal Aquifer Systems	104
	5.1 Introduction	104
	5.2 Coastal Water Types	104
	5.3 Chemical Processes in Coastal Aquifers	110
	5.4 Chemical Evolution in Coastal Plain Aquifer Systems	115
	5.5 Chemical Data Analysis	118
	5.6 Chemical and Isotopic Indicators	127
	5.7 Selected Coastal Aquifer Hydrochemistry Topics	140
6	Seawater Intrusion	159
	6.1 A Closer Look at Seawater Intrusion	159
	6.2 Modes of Seawater Intrusion	161
	6.3 Reversibility of Seawater Intrusion	184
7	Submarine Groundwater Discharge	187
	7.1 Introduction	187
	7.2 Basic Concepts	187
	7.3 Driving Forces of SGD	189
	7.4 Submarine Springs	196
	7.5 Methods for Assessing SGD	200
	7.6 Limitations, Uncertainties and Future Research in SGD Estimation	210
8	Coastal Palaeo-Hydrogeology	215
	8.1 Introduction	215
	8.2 Sea Level Change on a Geological Timescale	215
	8.3 Reorganisation of Coastal Groundwater Systems	223
	8.4 Case Studies of Coastal Aquifer Evolution	232
	8.5 Offshore Palaeo-Groundwater	244
	8.6 Sea Level Change and Aquifer Development	252
9	Impact of Land Reclamation on Coastal Groundwater Systems	255
	9.1 Introduction	255
	9.2 Land Reclamation	255
	9.3 Analytical Solutions for Land Reclamation Effects	263
	9.4 Numerical Case Study of Groundwater Flow and Contaminant Transport after Land Reclamation	277
	9.5 Innovative Use of Land Reclamation Sites	280
	9.6 Guidelines of Hydrogeological Assessment of Land Reclamation	281

<i>Contents</i>		ix
10	Sea Level Change and Coastal Aquifers	283
10.1	Introduction	283
10.2	Climate Change and Sea Level Rise	284
10.3	Impact of Sea Level Rise on Coastal Zones	285
10.4	Impact of Sea Level Rise on Coastal Groundwater Systems	289
10.5	Management Approaches to Compensate for the Impact of Sea Level Rise	295
10.6	Groundwater Usage and Sea Level Rise	296
11	Tide-Induced Airflow in Unsaturated Zones	298
11.1	Introduction	298
11.2	Water-Confined, Air-Confined and Air-Unconfined Aquifers	299
11.3	Equations for Airflow in Unsaturated Zones	300
11.4	Spatial and Temporal Tide-Induced Pressure Fluctuations	303
11.5	Environmental, Engineering and Ecological Effects of Tide-Induced Airflow	307
11.6	Case Study of Hong Kong International Airport	308
12	Coastal Aquifer Management and Seawater Intrusion Control	314
12.1	Introduction	314
12.2	Measurement and Monitoring	315
12.3	Assessment of Coastal Aquifer Vulnerability	323
12.4	Seawater Intrusion Management	324
12.5	Desalination	344
12.6	Socio-Economic Aspects	346
	<i>References</i>	349
	<i>Index</i>	397
