- 2001: A Space Travesty*, 135
 Advanced Cell Technology, Inc. (ACT), 19
Alien: Resurrection, 148
 Andrews, Lori, 112
 animal cloning
 cell type, 11, 12–13
 chemical activators, 11
 culture media, 11
 genotype, 12–13
 gestation, role of, 35–36
 placenta, 11, 12, 17–18, 24–25, 61
 reconstruction of eggs, methods of, 11
 trichostatin A (TSA), 15
Animal Cloning: A Risk Assessment, 20–23
 animals born through cloning
 aging, 38–41, 155, 159–60
 birth and development, 19, 21, 22, 38, 57, 58, 62, 108, 138, 147, 155, 157
 cats, 7, 34, 35, 36, 39, 48, 54, 156
 cattle, 7, 8, 9–12, 15, 16, 17, 19, 20, 21, 24, 35, 36–37, 39, 40, 53, 54, 61, 154
 death, 19, 20, 21, 24
 goats, 7, 20, 22
 individuality, 33–37, 61, 88, 92, 145, 147, 162, 171
 lifespan, 40–41, 57, 62, 147, 155, 157, 171
 mice, 7, 8, 12–15, 18, 19, 20, 24, 34, 39–40, 41, 57, 61, 62
 normalcy, 18–20, 21–24, 58, 61, 108, 114, 118, 171
 offspring, 20, 21, 22, 23, 35
 sheep, 7, 9, 16, 17, 20, 36, 54, 61
 species cloned, 7–8
 swine, 7, 8, 15, 17, 20, 21, 22, 35, 36, 39
 telomeres, 38–40, 57, 62, 155, 157
 transgenic, 8
Anna to the Infinite Power, 121, 148, 150–51
 Annas, George, 112
 artifact fallacy, 16, 25, 44, 61, 62, 63, 64, 66, 103, 108, 109, 111, 112, 114, 115, 116, 117, 118, 122, 123, 165, 166, 171, 172, 175, 178, 182, 183, 184, 185, 187, 188, 189, 190, 196, 197, 207, 208, 214, 215, 216, 218, 223, 226, 227
 defined, 16, 103
 asexual reproduction, cloning as, 3, 25, 46, 47, 58, 112–14, 118–19, 166, 182, 197, 213
 assisted reproductive technologies, 192, 194
 Atran, Scott, 73, 74, 95, 108

 Barrett, H. Clark, 105
 Big Bertha, 35, 36
Big Business, 136–37
 biometrics, 137, 139
 Biotechnology Industry Organization, 179
 Bloom, Paul, 104
Boys from Brazil, The, 120–21, 148, 150, 153
 Bush, George W., 85, 112
 Buss, David, 84

 California Advisory Committee on Human Cloning, 85, 112, 139, 156, 187, 226

- California Report, 85, 86, 91–92, 93, 112, 115, 139, 140, 141, 142, 156, 157, 187–88, 196, 229
- California State Legislature, 85, 112, 139, 187, 188
- Campbell, Keith, 1, 3, 7, 9, 19, 43, 223
- Carey, Susan, 104, 105, 106
- Cc, 35, 36, 54, 156
- Center for Veterinary Medicine (CVM), 20–23
- civil rights legislation, 88, 117, 123, 222, 229
- Clinton, Bill, 84, 85, 112
- clone, meaning of term, 77–78, 97–98
- Clones, The*, 131
- Council Report, 85, 86, 87, 112, 113, 114–15, 156, 157, 182, 196
- Cumulina, 41
- Cyagra, Inc., 21
- DeGette, Diana, 184
- design stance, 104, 105, 106, 119, 189
- Deutsch, Ted, 204
- Dolly, 1–4, 7, 9, 27, 81, 85, 155, 159, 223
- arthritis, 4, 155
- death, 4, 39, 155, 159
- lung disease, 4, 39
- offspring, 3
- telomeres, 3–4, 38–39, 155
- Dutch Hunger Winter, 52
- egalitarianism, 172, 175, 194–98, 199, 216, 228
- embryo, cloned human
- clonote, as alternative term, 205–6, 213
- moral status of, 204–6, 211, 216
- embryonic stem cell research, 161, 200–1
- Dickey-Wicker Amendment, 208
- egg donors, 200, 211
- federal funding of, 208–9, 212
- morality of, 162, 200, 211
- National Institutes of Health guidelines, 208
- objectification of human life, 200, 211
- environmental influences, 32–33, 36–37, 54–55
- epigenetic factors, defined, 10
- eugenics, 86, 89–90, 93, 187, 191, 196
- families and cloning, 85, 86, 90–92, 113, 182
- Feinstein, Dianne, 180
- Foley, Elizabeth Price, 88, 229
- folk biology, 73–74, 94–96, 97, 99, 108, 118, 122, 168, 189
- folk sociology, 74–75, 96–97, 99, 168, 189
- Food and Drug Administration (FDA)
- approval of food products, 20
- ban on human reproductive cloning, 56, 179–80, 191, 227
- regulation of IVF, 192
- Frankenstein*, 16
- Future Shock*, 78, 82, 101
- Gelman, Susan, 70, 71, 76, 104, 106, 126, 168
- genes
- copy number variations, 48–49
- defined, 2, 28
- epigenetic modifications of, 29–31, 35–36, 50–53
- imprinted, 16–17, 29
- mutations, 10, 33–34, 48
- reprogramming of, 2, 10–11, 12, 13, 15, 17, 23, 24
- genetic diversity, 86, 90
- genetic engineering, 89
- Godsend*, 149
- Great Chinese Famine, 52
- Greenwood, James, 183, 204
- Haslam, Nick, 107, 108, 121, 122, 213
- Hirschfeld, Lawrence, 74, 75, 96
- Hopkins, Patrick D., 82, 139, 177
- Human Genome Project, 43
- human reproductive cloning
- defined, 46, 63, 171, 175
- fertility treatment, as alternative, 46, 177, 191, 192–95, 224, 226
- gestation, role of, 51–53
- human research cloning
- defined, 44, 171, 199
- egg donors, 201, 211
- experiments, 45–46, 62, 180, 201
- lack of federal funding, 209

INDEX

305

- morality of, 162, 185, 201, 204–6, 211
 objectification of human life, 201, 206,
 211–12, 213, 214
 slippery slope, as, 199, 201, 207–8, 210,
 212, 214, 215, 216, 218, 220
 therapies based on, 44–45, 158, 161
 humans born through cloning
 aging, 157, 196
 birth and development, 57, 62, 92, 138,
 147, 167
 dehumanization of, 121–22, 172, 216,
 218
 human beings, as, 57–59, 62, 108, 114,
 122, 152, 171
 individuality, 47–56, 62, 88, 91, 92, 93,
 115, 138–39, 140, 144, 147, 150, 151,
 162, 166, 167, 171
 lifespan, 57, 62, 171
 normalcy, 57–58, 62
 open future, 116, 120, 121, 122,
 140, 187
 organ donors, as, 151–53, 160–61, 178
 parental expectations, 90–91, 92, 101,
 115–16, 156, 157, 197, 224, 228
 psychological damage to, 85, 86, 101
 replacements for loved ones, as, 149,
 154–57, 159, 160, 163, 188, 197, 224
 stigma, 92, 116, 197, 198, 217, 219, 222,
 226, 228
 telomeres, 157
 threat to individuality of donor, as, 125,
 139–40, 141–42, 144, 167, 188, 190,
 197, 229
 Hunt, Mark, 56, 154, 159

 identity fallacy, 27, 43, 61, 62, 63, 64, 66,
 69, 77, 78, 81, 84, 86, 88, 90, 91, 92, 93,
 94, 98, 100, 103, 109, 120, 123, 126,
 142, 143, 145, 147, 165, 166, 167, 171,
 172, 175, 176, 177, 178, 179, 182, 183,
 184, 187, 188, 189, 190, 196, 197, 207,
 208, 214, 215, 216, 218, 223, 226, 227
 defined, 27, 69, 77
 impostor fallacy, 64, 66, 125, 126, 131, 133,
 139, 140, 144, 145, 148, 165, 166, 171,
 172, 175, 178, 183, 184, 188, 190, 196,
 197, 208, 214, 223, 226, 227
 defined, 64

 in vitro fertilization (IVF), 45, 153, 186,
 190, 192, 193, 206, 213
 induced pluripotent stem cells (iPSC),
 201–3
 informed consent, 91, 115, 123, 140, 142,
 144, 145, 156, 163, 173, 229
 International Human Epigenome
 Consortium, 44
Invasion of the Body Snatchers, The, 132
Island, The, 111, 132–33, 152, 161, 162

 Jackson-Lee, Sheila, 184
 Jaenisch, Rudolf, 18, 85, 205

 Kass, Leon, 122
 Kelemen, Deborah, 104, 105, 106
 Kennedy, Teddy, 180
 Kunich, John Charles, 193

 large offspring syndrome (LOS), 16–18, 61
 defined, 16
 law of cloning
 federal, 179–85, 203–9, 211–12, 214
 state, 185–88, 210–11, 212, 214, 215, 217
 law of embryonic stem cell research
 federal, 203–9
 state, 209–11
 Lohan, Lindsay, 136, 137
 Lott, Trent, 180
 Lucas, George, 78, 84

 McHugh, Paul, 205, 206, 213
 Medin, Douglas, 69, 70, 73, 77
 Midler, Bette, 136, 137
 mitochondria, 28, 50
 mitochondrial DNA
 cloning, role in, 33, 50
 defined, 28
 influence on phenotype, 28
 monozygotic multiples
 triplets and higher order, 83–84, 93,
 119, 166
 twins, 49, 51, 52, 53, 54–55, 83, 87, 93,
 119, 135–38, 165
Multiplicity, 131

 National Bioethics Advisory Commission
 (NBAC), 85, 94, 95, 112, 155, 225

- NBAC Report, 85, 86, 94, 97, 100, 112, 115, 156, 157
- Never Let Me Go*, 152, 161, 162
- Niemela, Jussi, 118, 122, 123
- non-consensual cloning, 125, 141–42, 144, 183, 230
- prohibition of, 142, 145, 230
- nuclear DNA
- cloning, role in, 1–3, 33
- defined, 1, 28
- Obama, Barack, 208, 222
- Ortony, Andrew, 69, 70, 73, 77
- Parent Trap, The*, 136, 137
- pets, cloning of, 36–37, 147, 154, 159, 160, 163
- President's Council on Bioethics, 85, 89, 91, 112, 122, 155, 182, 192, 193, 205, 206, 225
- Price, David, 183
- psychological counseling
- for children, 88, 116, 123, 144, 173, 229
- for donors, 140, 145, 173, 229
- for parents, 91–92, 101, 115, 123, 144, 145, 156, 163, 168, 173, 228, 229
- psychological essentialism
- artifacts, 66, 103–6, 119, 120, 121, 122, 123, 166, 168, 189, 213, 223
- clone kind, 95, 97, 142, 143, 166
- defined, 64, 69, 104
- elements of, 70–71
- evolutionary origin of, 73–77, 105–6, 130–31
- historical path, 126–27, 129, 130, 133–35, 136, 138, 144, 159, 166
- human kinds, 70, 74, 75, 94, 96, 98, 189, 213, 221, 223
- individuals, 66, 100, 126–31, 143, 148, 158–59, 166, 168, 189, 223
- living kinds, 65, 70, 71, 73, 74, 76, 94, 95, 97, 98, 103, 104, 105, 106, 109, 118, 119, 122, 123, 166, 189, 212, 213, 221
- natural kinds, 70, 74, 104
- occupational kinds, 65, 75, 96, 97, 189, 221
- organ transplants, 127–30, 134, 158, 166, 189
- philosophical essentialism, distinguished from, 64–65
- racial and ethnic groups, 65, 71, 73, 74–75, 94, 96, 108, 221
- stereotyping, 73
- public education, 88, 101, 117, 123, 142, 144, 145, 156, 163, 168, 173, 226, 230
- public opinion polls, 175–79, 190, 196, 203, 225
- Repli-Kate*, 134
- reproductive freedom, 113, 172, 175, 191–94, 198, 228
- resurrection fallacy, 27, 37–38, 43, 57, 62, 63, 64, 66, 147–48, 153, 155, 156, 158, 159, 163, 165, 167, 171, 172, 175, 178, 183, 184, 188, 190, 197, 208, 214, 223, 226, 227
- defined, 27, 147
- Resurrection of Zachary Wheeler, The*, 152
- Robertson, John, 91, 228
- scientific freedom, 172, 199, 218, 225, 228
- Second Chance, 36–37, 54, 154
- Seed, Richard, 179
- Segal, Nancy, 83, 87, 95
- Silver, Lee, 77, 78
- Sixth Day, The*, 109, 151
- Skinner v. Oklahoma*, 191
- Sleeper*, 153
- Smith, Christopher, 185
- somatic cell nuclear transfer, defined, 3
- Space, Zachary, 184
- Star Trek III: The Search for Spock*, 109, 151, 160
- Star Trek Next Generation*, 151
- Rightful Heir*, 151
- Star Wars II: Attack of the Clones*, 78–81, 94–97, 98, 99, 109, 111
- Starman*, 100
- Stemagen, 45
- Sylvia, Claire, 127–29
- telomeres, defined, 3, 38
- Tiny Tina, 36
- Toffler, Alvin, 78, 82, 83, 84
- Tomlin, Lily, 136, 137
