

INDEX

Page numbers in italics represent figures or tables.

- 1840 census, 94–96, 99
- abandonment
 of fields, 40–41
 of island, 149–150, 152
- abundance, patterns of scarcity and, 79
- academics, as inhabitants of island, 213–216
- acquisition, off-island, 79–82
- activity areas on Antikythera, 220, 221
- Aegila, 133–134, 150, 199
- African red-slipped bowls, 71
- agency theory, 3–7
- aggregate current map, 229–230
- Agios Myronas church, 150, 205
- agriculture
 cash-croppers, 196–198
 cereal crops, 91, 92, 93, 94, 180
 commodity specialisation, 196–197
 field systems, 178–182, 183
 olive groves, 91–92, 149, 177
 processing installations, 97
 production, 91–94
 wheat, 92, 197, 244n2
- Alexander the Great, 190
- amphorae, 69, 70, 76–77
- Anagnostakis, Andreas, 165–166, 203
- animal life, 41–44, 152–153
- annual demands on human labour, 164, 165, 166–167
- Antikythera
 animal life, 41–44
 currents, 31–34
- erosion, 38–41
 general discussion, 1–2
 geology, 24–26
 harbours, 34–36
 hydrology, 34–36
 lithics, 36–38
 maps of, 167–168, 275
 maritime neighbourhood of, 168, 169
 in Mediterranean context, 217–221
 movement on, 161–163
 other names for, 86–87, 150
 plant life, 41–44
 population of, 90–91
 Roman name for, 133
 short- and long-term climates, 26–31
 soils, 36–38
 surface survey coverage, 17
 tectonics, 24–26
 topography, 24–26
 watercolour depiction of, 161
 wave patterns, 31–34
 wind patterns, 31–34
- apiculture, 67, 197–198
- Apollo, statue base dedicated to, 190–191
- Apollo temple, 140, 145
- archival research, 19
- artefacts. *See also* material culture
 collection of, 16
 dating, 53–54
 diagnostic uncertainty, 50–56
 diagnosticity of, 99
 number found on island, 47–48
 study of, 18–19
- surface patterning, 99–111
 visibility, 48–49
- ashlar masonry, 175–176
- barrels, 76
- bayonets, 78
- bedrock mapping program, 20
- bedrock units, 25
- beekeeping, 67, 197–198
- behavioural themes
 abundance and scarcity, 79
 conflict and coercion, 77–79
 cooking, eating and drinking, 73–75
 maintenance and recycling, 82–83
 production and acquisition, 79–82
 transport and storage, 75–77
- bifaces, 58–60, 63
- bird species, 42–43, 200
- Boone, John, 88, 212
- British administration, 91, 165–166, 176, 179–180
- Bronze Age
 mortuary landscape, 132
 sherds from, 254
 tombs, 270
 transport and storage, 76
- bullets, lead, 78
- Buondelmonti, Cristoforo, 152, 203, 212
- Byzantine period
 coin of Leo IV, 150
 culinary habits, 75
 surface artefact patterning, 153–156
 transport and storage, 76

 soldiers, 202–203
 southeasterlies, 32
 Sparta, 133–134
 specialisation, 166. *See also* central roles in island life
 sperm whales, 44
 Sphakiot families, 244n1
 springs, 35–36, 108–109
 St. Theodore of Kythera, 204
 stage-one survey, 13–16, 47–48, 99
 stage-two survey, 16–18
 standing remains
 first to seventh century AD, 141–144
 Hellenistic period, 133–135
 Recent period, 96–98
 statistical and computational methods
 aggregate current map, 229–230
 centrality, 229
 definition of locations, 225–226
 erosion models, 223
 K functions, 224–225
 kernel density of semi-variance, 230
 multivariate logistic regression, 226
 nonmetric multidimensional scaling, 226–228
 overlapping least cost paths, 229
 overview, 21
 pairwise shared temporal uncertainty, 224
 visibility analysis, 228–229
 steamships, 173–174
 Stephen of Byzantium, 142, 167
 stone resources, 83, 175–176
 storage, 75–77
 submarine topography, 27
 surface artefact patterning
 earlier prehistory, 114–122
 eighth to seventeenth century AD, 149–156
 first millennium BC, 135–141
 first to seventh century AD, 141–149
 Recent period, 99–111
 third and second millennium BC, 123–132
 surface survey coverage, 17
 surface visibility, relationship to
 artefact density, 48–49
- tanged projectiles, 61–62
 tectonics, 24–26
 telegraph services, 174
 temperature variation, 27, 29
 terraces
 abandonment and recolonising
 vegetation, 185
 construction styles, 276
 impact on erosion, 277
 landscape investment, 178–182, 183
 number of, 98
 third and second millennium BC,
 artefact patterning from,
 122–132
 Third Palace period, 67, 128, 255
 threshing floors, 98
 tiles, 69–70, 80–81
 tombs
 Bronze Age, 132, 270
 landscape investment, 176
 Late Roman period, 143–144, 149
 near Kastro, 140
 tools
 earlier prehistory, 58
 production and acquisition of,
 80
 topographic centrality, 161–162
 topography, 24–26
 tourists, 213–216
 tracts, 14
 trade, 81, 170
 tramping, 170
 transport, 75–77
 travel beyond Antikythera, 163–175
 Trevisan, Domenico, 152
 tuna, 43–44, 200
- UK National Archives, 19
 USPED (Unit Stream Power-based
 Erosion Deposition), 39–40
- vacuum circles, 18
 vegetation
 communities, 42
 recolonising, 182–184, 185
 Venetian periods
 culinary habits, 75
 piracy during, 153
 surface artefact patterning,
 153–156
 transport and storage, 76

INDEX

- Venetian possession of island,
151–152
- vineyards, 177
- visibility analysis, 159–161, 228–229,
273
- visibility of artefacts, 47–50
- visits to island
by hunters, 198–201
during Late Neolithic, reasons for,
113
by others, 213–216
- sanitary stations, 168, 170, 203
- tourists, 213–216
- Voyage to a Dark Island*, 214,
246n1
- watercolour depiction of Antikythera,
161
- watersheds, 35, 36
- wave patterns, 31–34
- weaponry, 78, 263
- weaving artefacts, 66–67
- wells, 35–36
- whales, 44
- wheat, 92, 197, 244n2
- wind patterns, 31–34
- wine, 74, 98, 177
- World War II, 78–79, 90, 263
- Xeropotamos beach, 140, 145
- Zervos-Iakovatos, Ilias, 88–90,
210
