Exploring Language and Linguistics

Exploring Language and Linguistics introduces the key concepts of linguistics and the application of these concepts to real-world settings. The first eight chapters cover the standard topics of introduction to linguistics courses, while subsequent chapters introduce students to applied topics such as media discourse, literary linguistics and psycholinguistics. Each chapter has been written by a subject expert and experienced teacher, ensuring that the text is both up-to-date and clearly presented. Numerous learning features provide extensive student support: exercises allow students to review their understanding of key topics; summaries encourage students to reflect on the main points of each chapter; figures, photos, tables and charts clarify complex topics; and annotated suggestions for further reading point students to resources for self-study. A companion website, with 170 self-test questions, suggested group exercises, audio files and links to additional web resources, completes the learning package.

NATALIE BRABER is a Senior Lecturer in Linguistics at Nottingham Trent University.

LOUISE CUMMINGS is Professor of Linguistics at Nottingham Trent University.

LIZ MORRISH is Subject Leader for Linguistics at Nottingham Trent University.

CONTRIBUTORS

KLAUS ABELS received his PhD in linguistics in 2003 from the University of Connecticut. He has held temporary appointments in Leipzig (Germany) and Tromsø (Norway) and has been at University College London since 2008, where he works as a reader in syntax. He is co-editor of the journal *Syntax*.

PATRICIA ASHBY, Emeritus Fellow of the University of Westminster and National Teaching Fellow of the UK Higher Education Academy, holds an MA and PhD in phonetics from University College London and a BA in English from the University of Lancaster. She has taught phonetics and phonology for over thirty years in countries all over the world, including Belgium, Poland, India, Germany and Japan. Her publications include *Speech Sounds* (1995, 2005) and *Understanding Phonetics* (2011). She has an international reputation in the field of phonetics pedagogy. Other research interests include English intonation. She is Examinations Secretary and a Member of Council of the International Phonetic Association, Director of the IPA Examination Strand on the UCL Summer Course in English Phonetics and a co-founder and organizer of the biennial Phonetics Teaching and Learning Conference.

ALLAN BELL is Professor of Language & Communication, and Director of the Institute of Culture, Discourse & Communication, at Auckland University of Technology, New Zealand. A dual career combining academic research with journalism and communications consultancy has led him to pioneering contributions on media language and discourse, as well as the theory of style (Audience Design) and New Zealand English. He is director of the World Internet Project New Zealand. He has published many papers and six books, including *The Language of News Media* (1991) and *Approaches to Media Discourse* (edited with Peter Garrett, 1998). His 2013 *Guidebook to Sociolinguistics* is a comprehensive, research-based map of the field. He is co-founder and editor of the *Journal of Sociolinguistics*.

ROGER BERRY is former Professor and Head of the Department of English at Lingnan University in Hong Kong where he taught courses in Applied Linguistics and English Grammar. His recent works include *Terminology in English Language Teaching* (2010) and *English Grammar: A Resource Book for Students* (2012). He was also editorial consultant for the *Collins Cobuild English Grammar* (3rd edition, 2011). His interests lie in language play, descriptive and pedagogic grammar, terminology and metalanguage. In his spare time he writes light verse about language, many pieces of which have been published.

NATALIE BRABER received her degree and PhD from the University of St Andrews. She first worked as a post-doctoral researcher and lecturer in Linguistics at the University of Manchester. Since 2005 she has worked at Nottingham Trent University as a Senior Lecturer in Linguistics. Her main research interest is language variation in the UK, specifically Glasgow and the East Midlands. She is also interested in identity and how this can influence a speaker's language usage as well as how emotion can affect language.

MICHAEL BURKE is Professor of Rhetoric at University College Roosevelt, a liberal arts and science honours college of Utrecht University. He has published articles on rhetoric, literary linguistics and cognitive poetics in numerous journals. His recent books include *Literary Reading, Cognition and Emotion: An Exploration of the Oceanic Mind* (2011), *Pedagogical Stylistics: Current Trends in Language, Literature and ELT* (edited with Csábi, Week and Zerkowitz, 2012) and *A Handbook of Stylistics* (edited, 2014). He is a former chair of the International Poetics and Linguistics Association (PALA).

CARMEN ROSA CALDAS-COULTHARD is Professor of English Language and Applied Linguistics at the Federal University of Santa Catarina, Brazil and was Senior Research Fellow in the English Department at the University of Birmingham, UK (1996 to 2012). She has published widely in the areas of critical discourse, media and gender studies. Her research interests are in social semiotics and gender representation, and visual communication. Her main publications are *Language and Sex* (1991), *News as Social Practice* (1997) and *Texts and Practices: Readings in CDA* (co-edited with Malcolm Coulthard, 1996). She is also co-editor of *The Writer's Craft, the Culture's Technology* (with Michael J. Toolan, 2005) and *Identity Trouble: Critical Discourse and Contested Identities* (with Rick Iedema, 2008). She is the co-editor (with Tommaso Milani) of *Gender and Language* (IGALA journal).

JONATHAN CULPEPER is Professor of English Language and Linguistics in the Department of Linguistics and English Language at Lancaster University, UK. His work spans pragmatics, stylistics and the history of English, and his major publications include *Language and Characterisation: People in Plays and Other Texts* (2001), *Early Modern English Dialogues: Spoken Interaction as Writing* (with Merja Kytö, Cambridge University Press, 2010) and *Impoliteness: Using Language to Cause Offence* (Cambridge University Press, 2011). He pursues research interests in historical pragmatics, especially historical politeness, and has written the textbook *History of English* (2nd edition, 2005). He is co-editor-in-chief of the *Journal of Pragmatics*.

LOUISE CUMMINGS is Professor of Linguistics at Nottingham Trent University. She teaches and conducts research in pragmatics and clinical linguistics. She is the author of several books: *Pragmatics: A Multidisciplinary Perspective* (2005), *Clinical Linguistics* (2008), *Clinical Pragmatics* (Cambridge University Press, 2009), *Communication Disorders* (2014), *Pragmatic Disorders* (2014), *The Communication Disorders Workbook* (Cambridge University Press, 2014) and *Pragmatic and Discourse Disorders: A Workbook* (Cambridge University Press, 2015). She has also edited *The Routledge Pragmatics Encyclopedia* (2010) and *The Cambridge Handbook of Communication Disorders* (Cambridge University Press, 2014).

JOHN FIELD is Senior Lecturer at the CRELLA research unit, University of Bedfordshire, where he advises on the cognitive processes elicited by tests of second language skills. He previously taught Psycholinguistics and Child Language at the University of Reading. He has long worked to make psycholinguistics accessible to readers with a non-specialist background; and has written several books on the subject, as well as numerous encyclopaedia and handbook entries. His main area of specialization is listening, particularly second language listening, on which he wrote his PhD at Cambridge. His *Listening in the Language Classroom* (Cambridge University Press, 2008) has become a standard text in that field.

HELEN GOODLUCK is Professor of Linguistics at the University of York. Her work has focused on language acquisition and on language processing, and the relationship between the two. Her research is primarily in syntax and has included studies of a range of languages, including Akan, Greek, Modern Irish and Serbian. She is the author of *Language Acquisition: A Linguistic Introduction* (1991) and has edited several volumes on language acquisition and adult psycholinguistics, as well as contributing articles to linguistics and psychology journals, including *Language*, *Cognition*, *Language Acquisition*, *Journal of Linguistics*, *Journal of Child Language* and *Journal of Psycholinguistic Research*.

S. J. HANNAHS is a Reader in Linguistics. He has worked over the past twenty years in theoretical phonology and morphology in the northeast of England, teaching at the University of Durham and currently at Newcastle University. His focus in recent years has been on the phonology of modern Welsh, leading to the publication of *The Phonology of Welsh* (2013). He is also the author of *Prosodic Structure and French Morphophonology* (1995) and co-author of *Introducing Phonetics and Phonology* (2010), and has published papers on Celtic and Romance phonology and morphology in various journals.

LESLEY JEFFRIES is Professor of English Language and Director of the Stylistics Research Centre at the University of Huddersfield. Her research has long straddled the twin topics of the stylistics of contemporary poetry and contemporary politics, though politics is currently the more time-consuming of the two. She has been working on a framework for critical stylistics for a number of years and is now working on integrating this into a general theory of language. Her work on the language of conflict includes the training of community mediators in language awareness and research into the language of war crimes tribunals.

DAN MCINTYRE is Professor of English Language and Linguistics at the University of Huddersfield, where he teaches stylistics, corpus linguistics and the history of the English Language. His major publications include *Stylistics* (with Lesley Jeffries, Cambridge University Press, 2010), *Language and Style* (co-edited with Beatrix Busse, 2010), *History of English: A Resource Book for Students* (2009) and *Point of View in Plays* (2006). He is reviews editor for the journal *Language and Literature*, series editor for *Advances in Stylistics and Perspectives on the English Language* and co-editor of *Babel: The Language Magazine* (www.babelzine.com).

LIZ MORRISH is Subject Leader for Linguistics at Nottingham Trent University. She teaches introductory courses in language and linguistics, and in phonetics. She also teaches a course in language, gender and sexuality, which is her primary research interest. At graduate level, she teaches and supervises work on language, gender, sexuality and Queer Theory. She is the author of *New Perspectives in Language and Sexual Identity* (with Helen Sauntson, 2007). She has also edited *Queering Paradigms: Queer Impact and Practices* (with Kathleen O'Mara, 2013).

JOHN SAEED is a Fellow of Trinity College Dublin, where he is a professor of linguistics. His doctorate was in African linguistics at London University's School of Oriental and African Studies and his first academic job was as a research fellow at the International African Institute. He is currently head of Trinity College's School of Linguistic, Speech and Communication Sciences. He has written on semantics and pragmatics in a number of languages, including Somali and Irish Sign Language, and is the author of *Semantics* (3rd edition, 2009) and *Irish Sign Language* (with Lorraine Leeson, 2012).

HANS-JÖRG SCHMID is Full Professor of Modern English Linguistics at Munich University, Germany. He is a graduate of the same university, where he also took his PhD (in 1992) and his *Habilitation* (in 1999). His research has been devoted to the fields of lexical semantics, cognitive linguistics, word-formation and pragmatics. His publications include: *English Abstract Nouns as Conceptual Shells: From Corpus to Cognition* (2000), *An Introduction to Cognitive Linguistics* (2nd edition, 2006), *English Morphology and Word-formation* (with Friedrich Ungerer, 2011) and *Cognitive Pragmatics* (edited, 2012).

PHILIPPA SMITH holds a number of positions at Auckland University of Technology, New Zealand. She is a senior lecturer in the School of Language and Culture, the research manager of the Institute of Culture, Discourse and Communication, and the executive director of the World Internet Project in New Zealand. Her research interests focus on media, national identity and discourse. She has published in a number of academic books and journals primarily examining discourse in reality television, animated sitcom, news stories and documentary programmes. In a recent project she used critical discourse analysis to compare constructions about New Zealand national identity in political documents, media texts and New Zealanders' online discussions during a period of increased multiculturalism.

PREFACE

Exploring Language and Linguistics is designed to meet the needs of undergraduate students approaching linguistics for the first time. As teachers of first-year linguistics courses ourselves, we have always welcomed students from a range of academic backgrounds. The key challenge for instructors on introductory-level linguistics/English language modules is to introduce a wide range of topics, approaches and concepts in an accessible manner to students with little or no prior experience of studying language. Meanwhile, the key challenge for students lies in their ability to understand and then apply their learning to real-world settings. Our volume seeks to address these challenges with writing which is concise, accessible and richly illustrated with examples. We make no assumptions about prior experience with grammar or with learning foreign languages. In this book, we aim to provide readers with a thorough grounding in the terminology and techniques of linguistic description, as well as taking them forward into more specialist fields in the subject.

Linguistics is a developing subject, and new areas of enquiry are opening up. This book features chapters on language and ideology, media discourse, including a discussion of the language of computer-mediated discourse in social media, and clinical linguistics. Such wide but detailed coverage of developing areas makes this book stand out from other textbooks in linguistics.

The textbook is aimed at readers who are likely to be first-year undergraduates taking their first course in linguistics. Our students have told us that what excites them about the subject are the many applications to real-world problems. Each of these chapters is written by an expert in the field and will contain introductory as well as more challenging material. The first eight chapters introduce readers to the different *levels* of linguistic analysis: sound (phonetics and phonology), grammar (morphology, grammar, syntax), meaning (semantics and pragmatics) and structure beyond the sentence (discourse analysis). These chapters will all be preparatory reading for approaching the subsequent chapters, as students will be required to bring this body of knowledge to the study of applications of linguistics. The order in which the chapters are presented suggests the order of reading, but they may be read in any order.

Some unique features of the book will aid students in developing their understanding of each topic. Each chapter has: frequent boxes summarizing key points, exercises (with answers provided at the end of the chapter) so that students can check understanding and online exercises, including some designed to facilitate group work. Students will find

themselves well prepared for second- and third-year undergraduate work in linguistics if they have worked through this book.

Most introductory textbooks in linguistics contain omissions in content which detract from their suitability, particularly as regards typical curricula in the UK. They also tend to discuss fewer applications of the theoretical concepts outlined. Also, in the UK strategies of teaching and learning in linguistics have evolved to the point where we wish to offer an approach which supports students' learning with both accessible content and interactive exercises. Most importantly, introductory textbooks tend to be written by generalists, that is, single authors or small groups of co-authors, who write about all the subdisciplines of linguistics in a general way. This textbook differs from the vast majority of competitor publications in that it features chapter contributions written by eminent experts in each of the subdisciplines of linguistics.

We have thought carefully about the features of a textbook which help students to learn, and we hope students will enjoy the following:

- An introduction to the fundamentals of the subject
- An introduction to a wide range of applications of the subject
- Key terms for each chapter
- A glossary which defines the key terms as well as specialist terminology
- A comprehensive index
- Chapters written by experts in the field
- Exercises to practise new skills and knowledge
- Online exercises which give feedback
- Tasks which stimulate group learning

As communication technologies continue to develop, there is likely to be a greater focus upon online learning, while at the same time encouraging interactivity and group work in the classroom. We include the in-text exercises in the expectation that instructors may choose to use these in classroom activities. Students may then follow up by doing the online questions independently.

ACKNOWLEDGEMENTS

We wish to acknowledge the kindness and support of individuals at Cambridge University Press who have worked with us on this volume. We extend our gratitude to Dr Andrew Winnard (Executive Publisher, English Language and Linguistics) for his positive response to the proposal of a textbook in Linguistics. We also gratefully acknowledge the assistance of Valerie Appleby (Development Editor, Social Sciences), Bethany Gaunt (Assistant Editor, Language and Linguistics), and David Mackenzie (Production Editor) who have guided us during the preparation of this volume. We have benefited enormously from their advice and support. The contribution of the reviewers of each of the chapters has been invaluable, and we have included their insights wherever possible. We would also like to offer our thanks to Dr Dean Hardman who worked with us in the early stages of this project. Dean made a valuable contribution to the development of the proposal for this textbook. We have also received the encouragement of family members and friends during this project. Although they are too numerous to mention individually, we are grateful to them for their kind words during our many months of work on this volume. Finally, this volume would not have been possible without the professionalism and commitment of its contributing authors. We have enjoyed the experience of working with all of them, and hope these productive collaborations can be maintained.
