Planetary seismology: High risk, high return 1
B. Mosser

A bright outlook for helio- and asteroseismology 5
J. Christensen-Dalsgaard

Part I Observation and space missions

1 Asteroseismology observations and space missions 11
T. Appourchaux and F. Grundahl

2 Helioseismology: Observations and space missions 25
P. L. Pallé, T. Appourchaux, J. Christensen-Dalsgaard, and R. A. García

3 Planetary seismometry 36
P. Lognonné and W. T. Pike

Part II Data and physical parameters

4 Asteroseismology: From the telescope to the modeler’s desk 51
S. D. Kawaler

5 Global helioseismology and asteroseismology of solar-type stars 63
R. Howe and W. J. Chaplin

6 Measurements with local helioseismology 77
D. C. Braun

7 Planetary seismology: Early observational results 91
Y. Nakamura
Contents

Part III Modeling approaches

8 Modeling approaches in asteroseismology 109
  C. AERTS

9 Modeling approaches in helioseismology 123
  S. P. RAJAGURU

10 Modeling approaches in planetary seismology 140
  R. C. WEBER, M. KNAPMeyer, M. PANNING, AND N. SCHMERR

Part IV Discoveries of physical structures and processes

11 Asteroseismology of red giant stars 159
  R. A. GARCÍA AND D. STELLO

12 A helioseismic view of the Sun's internal structure and dynamics 170
  S. BASU AND M. J. THOMPSON

13 Recent discoveries of structures and physical processes in local helioseismology 180
  T. SEKII AND H. SHIBAHASHI

14 Seismology of giant planets 189
  P. GAULME, B. MOSSTER, F.-X. SCHMIDER, AND T. GUILLOT

15 Seismicity and interior structure of the Moon 203
  M. KNAPMeyer AND R. C. WEBER

Part V Interdisciplinary research involving planetary and astrophysical sciences

16 Diskoseismology of accretion disks 227
  S. CHATY

17 Numerical simulations of magnetoconvection and helioseismology 238
  I. N. KITIAShVILI

18 Impact seismology on terrestrial and giant planets 250
  P. LOGNONNÉ AND T. KAWAMURA

19 Angular momentum transport in stars: From short to long time scales 264
  A. S. BRUN AND S. MATHIS

20 From the Sun to the distant stars, and back: Future research directions 276
  J. CHRISTENSEN-DALSGAARD

21 Stellar dynamics: Rotation, convection, and magnetic fields 294
  S. MATHUR, J. BALLOT, AND R. A. GARCÍA
