# Contents

List of contributors

Forewords by Stephen W. Scherer and Peter M. Visscher

Preface

List of abbreviations

## Part I. Genome-wide association studies

1. Introduction to genome-wide association studies and personalized medicine
   Krishnarao Appasani and Raghu K. Appasani
   page 3

2. GWAS: a milestone in the road from genotypes to phenotypes
   Urko M. Marigorta, Juan Antonio Rodriguez and Arcadi Navarro
   page 12

3. Introduction to statistical methods in genome-wide association studies
   Can Yang, Cong Li, Dongjun Chung, Mengjie Chen, Joel Gelernter and Hongyu Zhao
   page 26

4. GWAS replicability across time and space
   Urko M. Marigorta, Juan Antonio Rodriguez and Arcadi Navarro
   page 53

## Part II. Genome-wide studies in disease biology

5. Genome-wide association studies of body mass index
   Tuomas O. Kilpeläinen
   page 69

6. Identification of myocardial infarction-susceptible genes and their functional analyses
   Kouichi Ozaki and Toshihiro Tanaka
   page 79

7. Admixture mapping for disease gene discovery
   Randall C. Johnson, Cheryl A. Winkler and Meredith Yeager
   page 89

8. Genome-wide association analysis in schizophrenia
   Sven Stringer, Dorien H. Nieman, René S. Kahn, and Eske M. Derks
   page 106

9. Epigenome-wide association studies in neurodevelopmental disorders
   Takeo Kubota, Kunio Miyake and Takae Hirasawa
   page 123

Part III. Single nucleotide polymorphisms, copy number variants, haplotypes and eQTLs 137

10. Finding SNPs that affect microRNA regulation in disease-associated genomic regions 139
Laurent F. Thomas and Pål Sætrom

11. From linkage to complex associations: the role of GABRA2 as a risk factor for alcohol use 151
Sandra M. Villafuerte, Elisa M. Trucco and Margit Burmeister

12. Copy number variation in monozygous twins 168
Erwin Brosens, K.G. Snoek, D. Veenma, H. Eussen, D. Tibboel, and A. de Klein

13. Haplotypes of CpG-related SNPs and associations with DNA methylation patterns 193
Yiyi Ma, Caren E. Smith, Yu-Chi Lee, Laurence D. Parnell, Chao-Qiang Lai and José M. Ordovás

14. eQTL mapping 208
Mengjie Chen, Can Yang, Cong Li and Hongyu Zhao

Part IV. Next-generation sequencing technology and pharmaco-genomics 229

15. Next-generation sequencing for rare diseases 231
Elena Bosch and Ferran Casals

16. Next-generation sequencing for complex disorders 243
Ferran Casals and Elena Bosch

17. Chromosomal breakpoints in breast cancer co-localize with differentially methylated regions 255
Man-Hung Eric Tang, Vinay Varadan, Sitharthan Kamalakaran, Michael Q. Zhang, James Hicks and Nevenka Dimitrova

18. Signaling network analysis of genomic alterations predicts breast cancer drug targets 269
Naif Zaman and Edwin Wang

19. Pharmacogenetic studies in pediatric acute myeloid leukemia 281
Neha S. Bhise, Lata Chauhan and Jatinder Kaur Lamba

20. Pharmaco-genomics of antiretroviral drugs 297
Chonlaphat Sukasem, Apichaya Puangpetch and Sadeep Medhasi

Part V. Population genetics and personalized medicine 313

Sheikh Nizamuddin, Rakesh Tamang and Kumarasamy Thangaraj

22. How to solve genetic disease on a population scale 341
Barry Merriman

23. Economics of personalized medicine 366
Katherine Payne and Martin Eden

Index 383

The colour plates are to be found between pages 222 and 223
