Language Dominance in Bilinguals

With contributions from leading scholars of bilingualism, *Language Dominance in Bilinguals* is the first publication to survey different approaches to language dominance, along with suggested avenues for further research. It illustrates how a critical approach to the notion of language dominance, as well as its operationalization and measurement, can provide new insights into this burgeoning area of research.

Drawing on adult and child data from a variety of language pairs, the chapters discuss how language dominance is to be conceptualized and distinguished from such related constructs as language proficiency and language competence. This volume is the first of its kind to present an overview of different approaches to language dominance from across the theoretical spectrum, as well as suggested avenues for further research.

Accessibly written, *Language Dominance in Bilinguals* is a valuable new addition to the field. Essential reading for students and scholars working in bilingualism, speech therapy and education.

CARMEN SILVA-CORVALÁN is Professor Emerita of Spanish and Portuguese at the University of Southern California.

JEANINE TREFERS-DALLER is Professor of Second Language Education, Institute of Education, University of Reading, UK.
Language Dominance in Bilinguals

Issues of Measurement and Operationalization

Edited by Carmen Silva-Corvalán and Jeanine Treffers-Daller
Contents

List of tables ix
List of editors and contributors xi

1 Digging into dominance: A closer look at language dominance in bilinguals 1
   Carmen Silva-Corvalán and Jeanine Treffers-Daller

2 Dominance and proficiency in early and late bilingualism 15
   Silvina Montrul

3 Related but different: The two concepts of language dominance and language proficiency 36
   Anika Schmeißer, Malin Hager, Laia Arnaus Gil, Veronika Jansen, Jasmin Geveler, Nadine Eichler, Marisa Patuto, and Natascha Müller

4 The Complementarity Principle and its impact on processing, acquisition, and dominance 66
   François Grosjean

5 Dominance in bilingualism: Foundations of measurement, with insights from the study of handedness 85
   David Birdsong

6 Using lexical diversity measures to operationalize language dominance in bilinguals 106
   Jeanine Treffers-Daller and Tomasz Korybski

7 Balance patterns in early bilingual acquisition: A longitudinal study of word comprehension and production 134
   Annick De Houwer and Marc H. Bornstein
Contents

8 Amount of exposure as a proxy for dominance in bilingual language acquisition
   SHARON UNSWORTH 156

9 The role of the childhood environment for language dominance:
   A study of adult simultaneous bilingual speakers of
   German and French
   TANJA KUPISCH AND JOOST VAN DE WEIJER 174

10 Assessing the relationship between input and strength of
    language development: A study on Italian–English
    bilingual children
    FRANCESCA LA MORGIA 195

11 Measuring language dominance in bilingual children:
    Implications for crosslinguistic influence
    ELENA NICOLADIS 219

12 Language dominance: The construct, its measurement, and
    operationalization
    JEANINE TREFFERS-DALLER 235

13 Conclusion
    JEANINE TREFFERS-DALLER 266

List of figures

3.14 Dominant and balanced children of the cross-sectional study raised according to OPOL and according to other methods 63

4.1 An illustration of the Complementarity Principle. The domains covered by languages a, b, and c are represented by the quadrilaterals 69

5.1 Four hypothetical examples of median splits, with symmetrical distributions on either side of the median 94

6.1 Frequency of usage of English, Polish, and other languages at home and at work (self-report, n = 26) 115

6.2 Indices of Language Dominance (z-scores) (n = 22) 124

6.3 Number of balanced bilinguals, English-dominant, and Polish-dominant bilinguals according to the four Indices of Language Dominance (n = 22) 125

6.4 Correlations between length of residence and the ILD4 127

6.5 Correlations between ILD1 and EngAtt 128

8.1 Relation between children’s MLUdiff scores, dominance groups, and current amount (%) of exposure to Dutch 166

8.2 Relation between children’s MLUdiff scores, dominance groups, and child’s average output at home in Dutch (%) 167

8.3 Relation between children’s VERBSdiff scores, dominance groups, and current amount (%) of exposure to Dutch 168

8.4 Relation between children’s VERBSdiff scores, dominance groups, and child’s average output at home in Dutch (%) 169

12.1 Typology of language dominance based on language proficiency 261
Tables

2.1 Profile of low-to-intermediate proficiency Spanish heritage speakers and L2 learners of Spanish in the United States  page 26
2.2 Input differences between heritage speakers and L2 learners  28
3.1 Overview of the longitudinal data analyzed in this study  47
3.2 Overview of the bilingual children in the cross-sectional study  48
3.3 Categorization of bilingual individuals according to MMLUD (adapted from Arencibia Guerra, 2008: 70)  51
3.4 Categorization of bilingual individuals according to MMLUD (adapted from Hager, 2014)  52
4.1 The distribution of languages according to topics for Bilingual 14 in Gasser’s study and the importance of each language expressed as a percentage  71
4.2 The distribution of languages according to activities for Bilingual 14 in Gasser’s study and the importance of each language expressed as a percentage  73
4.3 The distribution of languages according to topics for Bilingual 8 in Jaccard and Cividin’s study and the importance of each language expressed as a percentage  74
5.1 Comparison of dominance indices showing an increase in magnitude of simple ratio-derived indices as raw scores increase and as subtraction-derived indices remain constant  89
5.2 Comparison of dominance indices showing the stability of simple ratio-derived indices reflecting the constant percentage of LB scores with respect to LA scores  89
5.3 Comparison of dominance indices showing that as subtraction-derived indices increase, simple ratio-derived indices decrease  90
6.1 Mean length of the stories in English and Polish (lemmatized types and tokens)  121
6.2 Correlations between different Indices of Language Dominance  126
6.3 Correlations between Indices of Language Dominance and other variables  127
List of tables

7.1 Sample demographic characteristics (n = 31 bilingual families) 137
7.2 Comprehension and production scores 140
7.3 Balance patterns across time for 13- and 20-month production 144
7.4 Balance patterns compared contemporaneously for 13-month comprehension and production 145
7.5 Balance patterns across time for 13-month comprehension and 20-month production 145
8.1 Language experience variables 163
8.2 Language proficiency variables (absolute and relative scores) 164
9.1 Participants 183
9.2 Proficiency scores, comparing all tests and the two groups 188
10.1 Definite and indefinite articles in Italian 199
10.2 Percentage and number of articles produced in obligatory contexts 206
10.3 Percentage and number of verbs used with the correct inflection 208
10.4 Percentage and number of pragmatically correct use of subjects 209
10.5 Mean percentages achieved at stage 3 and age of the children 210
10.6 Input provided by the mothers in 10-minute interactions 211
12.1 Examples of the operationalization of balance and dominance in bilinguals 256
Editors and contributors

Editors

CARMEN SILVA-CORVALÁN, PhD, Professor Emerita of Spanish and Portuguese, Department of Spanish and Portuguese, University of Southern California, USA. Her publications include Language Variation and Change: Spanish in Los Angeles (1994), Sociolingüística y Pragmática del Español (2001), Bilingual Language Acquisition: Spanish and English in the first six years (2014), and articles in journals such as Language and Bilingualism: Language and Cognition.

JEANINE TREFFERS-DALLER, PhD, Professor of Second Language Education, Institute of Education, University of Reading, UK. Her publications include Mixing Two Languages: French–Dutch Contact in a Comparative Perspective (1994). She is a member of the Editorial Board of the International Journal of Bilingualism and of Bilingualism: Language and Cognition, and has published many articles in these and other journals about code-switching, transfer, and language dominance in bilinguals.

Contributors

LAIA ARNAUS GIL, PhD, Visiting Professor, Department of Romance Linguistics, Bergische Universität Wuppertal, Germany. She specializes in early language acquisition. Her publications include a recent monography on the early acquisition of copula and auxiliary systems in Romance and German by monolingual and multilingual children, and articles in journals such as Studia Linguistica.

DAVID BIRDSONG, PhD, Professor of French Linguistics and current chair of the Department of French and Italian, University of Texas at Austin, USA. He has published in such journals as Language, Journal of Memory & Language, Language Learning, and Studies in Second Language Acquisition.
List of editors and contributors

MARC H. BORNSTEIN, PhD, Senior Investigator and Head of Child and Family Research, the Eunice Kennedy Shriver National Institute of Child Health and Human Development, USA. Bornstein has published in experimental, methodological, comparative, developmental, and cultural science as well as neuroscience, pediatrics, and aesthetics.

ANNICK DE HOUWER, PhD, Professor of Language Acquisition and Multilingualism, Department of Linguistics, University of Erfurt, Germany. She has published widely on monolingual and bilingual acquisition, and is the author of the first textbook dedicated to how children acquire two languages from birth (Bilingual First Language Acquisition, 2009).

NADINE EICHLER, PhD, independent scholar, formerly of the Department of Romance Linguistics, Bergische Universität Wuppertal, Germany. She obtained her PhD in Linguistics in 2011 from the same university. Her main areas of interest are syntax, morphology, simultaneous bilingual first language acquisition, and psycholinguistics.

JASMIN GEVELER, MA, Research Assistant, Department of Romance Linguistics, Bergische Universität Wuppertal, Germany. Her research focuses on the monolingual and multilingual acquisition of syntactic structures. Her PhD thesis focuses on wh-questions in Romance monolingual and bilingual language acquisition.

FRANÇOIS GROSJEAN, PhD, Professor Emeritus of Psycholinguistics, and former Director of the Language and Speech Processing Laboratory, Neuchâtel University, Switzerland. His publications include nine books, among which are: Life with Two Languages: An Introduction to Bilingualism (1982), Studying Bilinguals (2008), Bilingual: Life and Reality (2010), and The Psycholinguistics of Bilingualism (with Ping Li; 2013). He is a Founding Editor of the journal Bilingualism: Language and Cognition.

MALIN HAGER, MA, independent scholar, formerly of the Department of Romance Linguistics, Bergische Universität Wuppertal, Germany. She is working on bilingual and trilingual language acquisition with a special focus on gender acquisition and language dominance.

VERONIKA JANSEN, MA, independent scholar, formerly of the Department of Romance Linguistics, Bergische Universität Wuppertal, Germany. Her PhD dissertation focuses on the acquisition of dislocations in French and German by monolingual and bilingual children.

TOMASZ KORYBSKI, PhD, Lecturer, Institute of Applied Linguistics, University of Warsaw and Division of Applied Linguistics, Marie Curie-Skłodowska University in Lublin, Poland. His research interests include code-switching
(particularly in Polish communities in the United Kingdom and other English-speaking countries), as well as simultaneous interpretation.

TANJA KUPISCH, PhD, Professor of Romance Linguistics, Department of General Linguistics, University of Konstanz, Germany. Her work focuses on language acquisition, including child and adult bilingualism, adult second language acquisition, and L3 acquisition. She has published in such journals as Bilingualism: Language and Cognition and Linguistic Aspects of Bilingualism.

FRANCESCA LA MORGIA, PhD, Lecturer in Clinical Speech and Language Studies, Trinity College, Dublin. Her main research interests are monolingual and bilingual child language development, the acquisition of syntax, language processing at interfaces, heritage language description, and Italian linguistics.

SILVINA MONTRUL, PhD, Professor of Spanish and Linguistics, University of Illinois at Urbana-Champaign, USA. She is co-editor of Second Language Research and author of The Acquisition of Spanish (2004), Incomplete Acquisition in Bilingualism (2008), El bilingüismo en el mundo hispanohablante (2013), and The Acquisition of Heritage Languages (2015).

NATASCHA MÜLLER, PhD, University Professor, Department of Romance Linguistics, Bergische Universität Wuppertal, Germany. Her research focuses on the syntax and morphology of Romance languages and their acquisition by monolingual and multilingual children, and by second language learners. In her research, she combines experimental and theoretical approaches.

ELENA NICOLADIS, PhD, Professor of Psychology, Department of Psychology, University of Alberta, Canada. Her research interests include bilingual first language acquisition and development, lexical and morphological acquisition and development, language and thought, gestures, and the impact of culture on language acquisition and development.

MARISA PATUTO, PhD, independent scholar, formerly of the Department of Romance Linguistics, Bergische Universität Wuppertal, Germany. She obtained her PhD from this university in 2012. Her research interests are in the fields of pragmatics and syntax in early bilingual language acquisition.

ANIKA SCHMEISSER, MA, Research Assistant, Department of Romance Linguistics, Bergische Universität Wuppertal, Germany. Her research focuses on the syntactic and discourse-pragmatic developments of Romance languages. In particular, she has been investigating the historical development of finite verb placement, the acquisition of tense by young children, and child bilingualism.
SHARON UNSWORTH, PhD, Associate Professor, Department of English Language and Culture and the Department of Linguistics, Radboud University Nijmegen, the Netherlands. Her research interests include child bilingualism and second language acquisition, both in naturalistic and instructed contexts. She is Associate Editor of *Linguistic Approaches to Bilingualism*.

JOOST VAN DE WEIJER, PhD, Researcher, Center of Languages and Literature, and Laboratory of the Humanities, both at Lund University, Sweden. He teaches courses in psycholinguistics and statistical analysis, and provides methodological support for research projects within various areas of linguistics. He is co-author of *Eye Tracking: A Comprehensive Guide to Methods and Measures* (2011).
