The Cambridge Handbook of Areal Linguistics

Providing a contemporary and comprehensive view of the topical field of areal linguistics, this book looks systematically at different regions of the world whilst presenting a focused and informed overview of the theory behind research into areal linguistics and language contact. The topicality of areal linguistics is thoroughly documented by a wealth of case studies from all major regions of the world and, with chapters from scholars with a broad spectrum of language expertise, it offers insights into the mechanisms of external language change. With no book currently like this in the market, The Cambridge Handbook of Areal Linguistics will be welcomed by students and scholars working on the history of language families, documentation and classification, and will help readers to understand the key field of areal linguistics within a broader linguistic context.

Genuinely broad in scope, each handbook in this series provides a complete state-of-the-field overview of a major sub-discipline within language study and research. Grouped into broad thematic areas, the chapters in each volume encompass the most important issues and topics within each subject, offering a coherent picture of the latest theories and findings. Together, the volumes will build into an integrated overview of the discipline in its entirety.

**Published titles**

*The Cambridge Handbook of Phonology*, edited by Paul de Lacy
*The Cambridge Handbook of Endangered Languages*, edited by Peter K. Austin and Julia Sallabank
*The Cambridge Handbook of Sociolinguistics*, edited by Rajend Mesthrie
*The Cambridge Handbook of Pragmatics*, edited by Keith Allan and Kasia M. Jaszczolt
*The Cambridge Handbook of Language Policy*, edited by Bernard Spolsky
*The Cambridge Handbook of Second Language Acquisition*, edited by Julia Herschensohn and Martha Young-Scholten
*The Cambridge Handbook of Biolinguistics*, edited by Cedric Boeckx and Kleanthes K. Grohmann
*The Cambridge Handbook of Generative Syntax*, edited by Marcel den Dikken
*The Cambridge Handbook of Communication Disorders*, edited by Louise Cummings
*The Cambridge Handbook of Stylistics*, edited by Peter Stockwell and Sara Whiteley
*The Cambridge Handbook of Linguistic Anthropology*, edited by N.J. Enfield, Paul Kockelman and Jack Sidnell
*The Cambridge Handbook of English Corpus Linguistics*, edited by Douglas Biber and Randi Reppen
*The Cambridge Handbook of Bilingual Processing*, edited by John W. Schwieter
*The Cambridge Handbook of Learner Corpus Research*, edited by Sylviane Granger, Gaëtanelle Gilquin and Fanny Meunier
*The Cambridge Handbook of English Historical Linguistics*, edited by Merja Kytö and Päivi Pahta
*The Cambridge Handbook of Linguistic Multicompetence*, edited by Li Wei and Vivian Cook

**Forthcoming**

*The Cambridge Handbook of Formal Semantics*, edited by Maria Aloni and Paul Dekker
The Cambridge Handbook of Areal Linguistics

1 Areas, Areal Features and Areality  
*Raymond Hickey*  

### Part I  
Issues in Areal Linguistics

1 Why is it so Hard to Define a Linguistic Area?  
*Lyle Campbell*  

2 Areas and Universals  
*Balthasar Bickel*  

3 Reassessing Sprachbunds: A View from the Balkans  
*Victor A. Friedman and Brian D. Joseph*  

4 Areal Sound Patterns: From Perceptual Magnets to Stone Soup  
*Juliette Blevins*  

5 Convergence and Divergence in the Phonology of the Languages of Europe  
*Thomas Stolz and Nataliya Levkovich*  

6 Word Prominence and Areal Linguistics  
*Harry van der Hulst, Rob Goedemans and Keren Rice*  

7 Semantic Patterns from an Areal Perspective  
*Maria Koptjevskaja-Tamm and Henrik Liljegren*  

### Part II  
Case Studies for Areal Linguistics

9 The Germanic Languages and Areal Linguistics  
*Johan van der Auwera and Daniel Van Olmen*  

10 Britain and Ireland  
*Raymond Hickey*  

11 Varieties of English  
*Bernd Kortmann and Verena Schröter*  

12 Slavic Languages  
*Alan Timberlake*  

13 The Caucasus  
*Sven Grawunder*  

14 Western Asia: East Anatolia as a Transition Zone  
*Geoffrey Haig*

Figures

1.1 Increase in areality due to close contact  
1.2 Increase in areality due to language shift  
1.3 Feature development: decrease in areality  
1.4 Feature development: (coincidental) increase in areality  
1.5 Levels of language and borrowing  
8.1 The process of polysemy copying: Spanish *verde* and Acatec *yaasˇ* in the speech of Acatec–Spanish bilinguals (after Smith-Stark 1994)  
8.2 Lexico-constructional parallels: Mandarin *chí yán* and Singlish *eat salt*  
8.3 Palula spatial pro-forms  
11.1 NeighborNet diagram: typological and areal clusters of 76 varieties, pidgins and creoles in eWAVE 2.0  
11.2 Areal distinctiveness: strength of the geographical signal  
13.1 Sub-inventory sizes and vowel/consonant ratio  
16.1 Subclassification of Nilo-Saharan languages  
16.2 Subclassification of Eastern Sudanic languages  
21.1 Typological ecology and contact output  
22.1 Family tree of the Transeurasian languages  
27.1 Innovations in pronoun paradigms most likely reflecting shared inheritance  
27.2 Innovations in first person singular pronoun, proximal and distal demonstratives, and the levelling of irregular verbs  
27.3 Innovation of accusative alignment, passive voice, and switch-reference in subordinate clauses  
31.1 Borrowability  
32.1 NeighborNet representation of grammatical structures in languages of the northwest Amazon, divided into four groups  
33.1 Bird versus water distance  
33.2 Bird versus NP distance  
33.3 Water versus NP distance
Maps

5.1 Pre-glottalization in a micro-area of central Taiwan  page 90
5.2 Areas on the Australian continent lacking contrastive retroflexion 91
5.3 Glottalized consonants as an areal feature, arrow pointing to Yurok 93
5.4 Final obstruent devoicing in Europe 95
5.5 Ejectives of the Caucasus region including Ossetic and Eastern Armenian 102
5.6 General area of consonant retroflexion in South Asia 104
5.7 Front rounded vowels in Central and Western Europe, including ‘edge’ languages Breton (NW), Souletin Basque (SW), Albanian (SE), Finnish (NE) 106
5.8 Principal locations of pre- and post-aspiration in Scandinavia and the North Atlantic (Helgason 2002: 3) 108
5.9a The modern distribution of Chamic languages (Thurgood 1999) 110
5.9b The modern distribution of Cham and Mon-Khmer languages (Thurgood 1999) 111
5.10 Tone as an areal feature of Sub-Saharan Africa, Southeast Asia and New Guinea (Maddieson 2013d) 114
6.1 Absence of trills in European languages 131
6.2 Absence of affricates in European languages 133
6.3 Attested minority configurations (place of articulation, Table 6.6) 135
6.4 Absence of majority configurations (place of articulation, Table 6.6) 136
6.5 Absence of voice correlation with bilabials 141
6.6 Absence of voice correlation with uvulars 142
6.7 Absence of voice correlation with alveo-palatals/palatals/velars 142
6.8 Absence of voice correlation with labio-dentals 143
6.9 Absence of voice correlation with palato-alveolars 143
List of Maps

6.10 Phonemic secondary articulation 145
6.11 Presence of ranks 42–76 (Table 6.14) 149
6.12 Absence of ranks 1–10 (Table 6.13) 150
6.13 Attestation of minority configurations (ranks 42–76) and absence of majority configurations (ranks 1–10) in combination 151
7.1 Arnhem Land area with P, I and hybrids 192
13.1 The language families of the Caucasus, showing the main branches 359
13.2 Types of phonation contrasts in obstruent series (N = 85) 371
13.3 Presence of common contrastive features: uvular place of articulation, labialization, glottalic initiation (ejectives), pharyngealization 373
13.4 Areal pockets (subareas) including the features of palatalization, nasalization, gemination, pharyngealization 379
13.5 A type frequency account of glottalic uvular stops in wordlist sample (N = 86) of Nakh-Dagestanian languages 384
13.6 Relative measures for F0 of the following vowel of a stop (lower panel); relative measures for voice onset time with pulmonic, i.e. aspirated, versus ejective stops (upper panel) 386
14.1 Approximate locations of the language varieties of East Anatolia 400
15.1 Phonological zones in Africa according to Clements and Rialland (2008) 426
15.2 The Macro-Sudan Belt: labial–velar consonants according to Güldemann (2008) 429
16.1 Nilo-Saharan languages 448
16.2 The Central Sudanic–Ubangi contact zone 449
16.3 The typological dichotomy within Northeastern Nilo-Saharan languages 454
16.4 Languages with split ergativity 461
17.1 Distribution of major African language groups 472
17.2 Distribution of Niger-Congo languages 473
20.1 Jharkhand and its neighbours 552
20.2 The major Indo-Aryan and Munda languages of eastern-central South Asia and their general relative positions 554
20.3 The IA–Munda contact area: convergence patterns of the investigated traits 569
25.1 Greater Mainland Southeast Asia: present-day Cambodia, Laos, Peninsular Malaysia, Thailand, Myanmar and Vietnam, along with China south of the Yangzi River, Northeast India and Insular Southeast Asia 678
25.2 Core Mainland Southeast Asia: present-day Cambodia, Laos, Vietnam, Thailand, and neighbouring parts of China, Malaysia and Myanmar 679
List of Maps

27.1 Geographical extent of Pama-Nyungan and non-Pama-Nyungan languages 734
27.2 The Pilbara: approximate locations of languages and classification following O’Grady et al. (1966) 739
28.1 The New Guinea Region 760
28.2 Sunda and Sahul 40,000 years ago 761
28.3 Papuan lineages of East Nusantara and mainland New Guinea 766
28.4 Papuan lineages of northwest island Melanesia 767
28.5 Microgroups within the Trans New Guinea family 772
28.6 Verb/object and adposition/NP in New Guinea Region languages 787
28.7 Positions of verbal subject and object indices in New Guinea Region languages 790
28.8 Clause-final negators in declarative realis verbal clauses in New Guinea Region languages 793
28.9 Clause-chaining with and without switch-reference in New Guinea Region languages 796
28.10 Possessum/possessor order in New Guinea Region languages 798
28.11 Alignment of argument indices in New Guinea Region languages 800
28.12 Tense- and mood-prominence in New Guinea Region languages 803
29.1 The three main geographical areas of the Pacific 825
30.1 Micronesia area of the Western Pacific 853
31.1 Culture areas of North America (Sturtevant 1988: ix) 879
31.2 Northwest Coast (Suttles 1990b: ix) 884
31.3 Plateau (Walker 1998: iii) 885
31.4 Northern and Central California (Heizer 1978: ix) 886
31.5 The Southeast of North America, sixteenth to eighteenth centuries (Fogelson 2004a: ix) 888
31.6 The Southwest culture area: Ortiz (1983: ix) 889
32.1 Lowland South American contact zones 937
33.1 Ecological zones of South America: smaller regions considered in the present study 979
33.2 River data and language locations in South America 980
33.3 The river path between the languages Hixkaryána and Nhengatu 981
Tables

3.1 Mean estimated diachronic biases of NP order in families with right-branching versus left-branching VPs, inside versus outside Eurasia  page 49
4.1 Distribution of infinitival markers  76
5.1 Radical phonological change in two Chamic languages: Rade of South Vietnam, and Tsat of Hainan Island (based on Thurgood 1999)  112
6.1 Unity and diversity with regard to airstream mechanism  129
6.2 Diversity in the realm of rhotics  131
6.3 Unity and diversity in the realm of laterals  132
6.4 Unity versus diversity with major places of articulation (tongue positions)  134
6.5 Unity versus diversity with major places of articulation (non-tongue positions)  134
6.6 Unity versus diversity with places of articulation (primary subdivisions)  135
6.7 Unity versus diversity in the realm of phonation (manner of articulation)  139
6.8 Unity versus diversity in the realm of phonation (place of articulation)  140
6.9 Genetic affiliation of languages with phonemic secondary articulations  144
6.10 Types of phonemic secondary articulations (statistics)  145
6.11 Secondary articulations and manner of articulation  146
6.12 Secondary articulations and place of articulation  146
6.13 Statistics of phonemic primary articulations which occur in more than half of the sample languages  147
6.14 Statistics of phonemic primary articulations which occur in less than half of the sample languages  148
6.15 Diversity within language families (manner of articulation)  151
6.16 Diversity within language families (place of articulation)  152

Contributors

**Gregory D. S. Anderson** is Lead Scientist and President at the Living Tongues Institute for Endangered Languages and Research Fellow at the University of South Africa (UNISA). His main research interests are linguistic typology and historical linguistics, with particular focus on the languages of Siberia, Papua New Guinea, Africa, and the Munda and Tibeto-Burman languages of India. Recent publications include his monograph on Auxiliary Verb Constructions, as well as articles on Indian linguistics, language and education, and studies on African linguistics, linguistic typology and Oceanic linguistics. Current research projects include descriptive grammars with text collections and dictionaries for the Munda language Gta’ of India and the Turkic language Xyzyl of Siberia, a monograph on language extinction, electronic online dictionaries and ethno-biological compendia for several languages of Papua New Guinea.

**Umberto Ansaldo** is Professor of Linguistics at The University of Hong Kong. His interests include contact linguistics, linguistic typology and language evolution. He specializes in languages of East, South and Southeast Asia as well as pidgin and creole studies. His most recent publication is *Languages in Contact* (with Lisa Lim, 2015).

**Johan van der Auwera** is Professor of English and General Linguistics at the University of Antwerp in Belgium. His main research interests are the grammar and the semantics of modality, mood, negation and indefiniteness, both from language-specific, areal and typological as well as synchronic and diachronic perspectives. Publications relevant to this chapter include *The Germanic Languages* (with Ekkehard König, 1994), 'English *do*: on the convergence of languages and linguists' (with Inge Genee, *English Language and Linguistics* 6, 283–307, 2002), *The Languages and Linguistics of Europe: A Comprehensive Guide* (with Bernd Kortmann, 2011) and 'Modality and mood in Standard Average
Balthasar Bickel holds the Chair of General Linguistics at the University of Zurich. Before this, he was a postdoctoral researcher at the University of California, Berkeley, and then a professor of general linguistics at the University of Leipzig. His core interests are the regional and universal factors shaping the distribution of linguistic diversity over time. For this, Bickel applies methods ranging from the statistical analysis of typological databases and corpora to ethnolinguistic fieldwork and experimental methods. A special focus area is the Himalayas, where Bickel has been engaged in interdisciplinary projects on endangered languages and developing and analysing corpora of them. He has been editor of the journal Studies of Language and co-edited the volume Language Typology and Historical Contingency (2013).

Juliette Blevins is Professor of Linguistics at The Graduate Center, City University of New York, and was previously a senior research scientist at the Max Planck Institute for Evolutionary Anthropology in Leipzig. Her main research interests are sound patterns and sound change, with a special focus on phonological typology, as detailed in her chapter ‘Evolutionary Phonology: A holistic approach to sound change typology’, in The Oxford Handbook of Historical Phonology (2015). She is currently working on a new reconstruction of Proto-Basque.

Marc Brunelle is Associate Professor in Linguistics at the University of Ottawa. His main research interests are the phonetics and phonology of Southeast Asian languages, with a special emphasis on tones and prosody. His research mostly focuses on Vietnamese and Eastern Cham. His work has been published in a variety of journals including Journal of Phonetics, Phonetica, Journal of the Acoustical Society of America, Diachronica and The Linguistic Review.

Lyle Campbell (PhD, University of California, Los Angeles), Professor of Linguistics, University of Hawai‘i, Mānoa, has held appointments in anthropology, behavioural research, Latin American studies, linguistics, and Spanish, and has taught in Australia, Brazil, Canada, Finland, Germany, Mexico, New Zealand and Spain. His specializations are: language documentation, historical linguistics, American Indian languages, and typology. He has published 20 books and about 200 articles, and won the Linguistic Society of America’s ‘Leonard Bloomfield Book Award’ twice, for American Indian Languages (1997) and Historical Syntax in Cross-linguistic Perspective (with Alice Harris, 1995). His current projects include the Catalogue of Endangered Languages (www.endangeredlanguages.com) and documentation of several indigenous languages of Latin America.

Hilary Chappell holds a Research Chair as Professor in Linguistic Typology of East Asian Languages at the Ecole des Hautes Etudes en Sciences Sociales in Paris, an appointment she took up in 2005 after
teaching in the Linguistics Department at La Trobe University in Melbourne for 18 years. She was originally awarded her doctoral degree in 1984 by the Australian National University in Canberra for her thesis, *A Semantic Analysis of Passive, Causative and Dative Constructions in Standard Chinese*, and has over 60 publications on Chinese linguistics and typology, with a book, *A Grammar and Lexicon of Hakka* (with Christine Lamarr), and four edited volumes, including *The Grammar of Inalienability* (with William McGregor, 1996), *Sinitic Grammar: Synchronic and Diachronic Perspectives* (2001) and *Diversity in Sinitic Languages* (2015). Her main research interests are (1) rethinking the typological profile of Sinitic languages on the basis of in-depth explorations of their diversity, and (2) studying the diachronic grammar of the Southern Min or Hokkien dialect, using a corpus of late sixteenth and early seventeenth century materials.

**Alan Dench** is Pro Vice-Chancellor of Humanities at Curtin University, Western Australia. His principal area of expertise lies in the documentation and grammatical description of Australian Aboriginal languages, especially those of Western Australia. He has written grammars of three languages of the Pilbara – Panyijima, Martuthunira and Yingkarta – and is working towards a description of Nyamal. In addition to primary grammatical description he has made contributions to the historical and comparative analysis of Australian languages, and has written in the general area of ethnolinguistics. His work also includes contributions to studies of language contact.

**Gerrit J. Dimmendaal** is Professor of African Studies at the University of Cologne. His main research interests are the comparative study of African languages, language typology and anthropological linguistics. Recent publications include *Historical Linguistics and the Comparative Study of African Languages* (2011), *Number: Constructions and Semantics. Case Studies from Africa, Amazonia, India and Oceania* (with Anne Storch, 2014) and *The Leopard’s Spots: Essays on Language, Cognition and Culture* (2015).

**N. J. Enfield** is Professor and Chair of Linguistics at the University of Sydney, and a Research Associate at the Max Planck Institute for Psycholinguistics in Nijmegen, the Netherlands. His research on language and cognition in social and cultural context is based on long-term field work in Mainland Southeast Asia, especially Laos. His books include *A Grammar of Lao* (2007), *Dynamics of Human Diversity: The Case of Mainland Southeast Asia* (2011), *The Cambridge Handbook of Linguistic Anthropology* (with Paul Kockelman and Jack Sidnell, 2014) and *Mainland Southeast Asian Languages: The State of the Art* (with Bernard Comrie, 2015).

**Patience Epps** is Professor of Linguistics at the University of Texas at Austin. Her research focuses on indigenous languages of Amazonia, particularly involving description/documentation and the study of
language contact and change. Recent publications include

Anne-Maria Fehn holds a PhD in African Studies from the University of Cologne. She is currently affiliated to the Goethe University of Frankfurt and the Max Planck Institute for the Science of Human History, Jena. She was part of the multidisciplinary research projects ‘Kalahari Basin Area’ (Humboldt University of Berlin) and ‘Towards a multidisciplinary population profiling of southern Angola’ (CIBIO-InBIO, Porto). Her research interests include language documentation and areal linguistics. She is currently working on ‘Khoisan’ languages of Botswana and Angola, and on varieties of Himba and Kuvale spoken in southwestern Angola.

Victor A. Friedman (PhD, University of Chicago, 1975) is Andrew W. Mellon Distinguished Service Professor Emeritus in the Department of Linguistics at the University of Chicago and is president of the US National Committee of the International Association for Southeast European Studies. He has held Guggenheim, Fulbright-Hays, ACLS, IREX, NEH and other fellowships. His publications include The Grammatical Categories of the Macedonian Indicative (1977; second revised edition, 2014), Turkish in Macedonia and Beyond (2003), Studies in Albanian and Other Balkan Languages (2004), Očerki lakskogo jazyka (2011) and Makedonistički studi 1, II (2011, 2015), as well as more than 200 scholarly articles. His main research interests are grammatical categories and sociolinguistic issues related to contact, standardization, ideology and identity in the languages of the Balkans and the Caucasus.

Paul Geraghty graduated from Cambridge with an MA in Modern Languages (French and German), and earned his PhD from the University of Hawai‘i with a dissertation on the history of the Fijian languages. He was Director of the Institute of Fijian Language and Culture in Suva from 1986 to 2001, and is currently Associate Professor in Linguistics at the University of the South Pacific and Adjunct Associate Professor at the University of New England in Australia. He is author and editor of several books, including The History of the Fijian Languages (1983), Fijian Phrasebook (1994), Borrowing: A Pacific Perspective (with Jan Tent, 2004) and The Macquarie Dictionary of English for the Fiji Islands (2006), and numerous articles in professional journals and newspapers on Fijian and Pacific languages, culture and history. He is also well known in Fiji as a newspaper columnist and radio and TV presenter.

Rik van Gijn is postdoctoral researcher at the University of Zurich. His main research interests are South American languages, areal typology, morphology and complex sentences. Recent publications include co-edited volumes Subordination Strategies in Native South American Languages...

Rob Goedemans is presently employed as Information Manager at the Humanities Faculty of Leiden University. He is associated with the Leiden University Centre for Linguistics as a guest researcher. His main research interests are the phonology, phonetics and typology of stress and accent. He is currently involved in a research project, funded by the National Science Foundation, with Harry van der Hulst (University of Connecticut) and Jeff Heinz (University of Delaware). The goal of this project is to merge and enhance two large databases on stress to facilitate the advance of research in stress typology.

Jeff Good is Associate Professor of Linguistics at the University at Buffalo. His research interests centre around comparative Benue-Congo linguistics, morphosyntactic typology, and the documentation of underdescribed Bantoid languages. His recent publications include The Linguistic Typology of Templates (2015) and articles in Language, Morphology, Diachronica, Studies in Language, the Journal of Pidgin and Creole Languages, and Language Documentation and Conservation. He is currently heading a research project investigating the relationship between multilingualism and language change in rural areas of the Cameroonian Grassfields.

Anthony P. Grant is Professor of Historical Linguistics and Language Contact at Edge Hill University, having studied at York under Robert Le Page, defending his PhD at the University of Bradford in 1995 on Agglutinated Nominals in Creole French, and having previously worked at the Universities of Manchester, Sheffield, Southampton and St Andrews. A native Bradfordian and author of over four dozen books, articles and chapters, his special research interests are Native North American languages, Austronesian languages, Romani, creoles and pidgins, and issues in language documentation. He is editor of the forthcoming Oxford Handbook of Language Contact, and is completing a monograph on intimate language contact.

Sven Grawunder has been working since 2005 as a postdoctorate researcher at the Max Planck Institute for Evolutionary Anthropology in Leipzig. His main research topics are phonetic motivations of sound change with an areal perspective, and voice (production and perception) from an evolutionary perspective. Current projects involve the assessment of phonetic speaker variability in processes of neutralization as well as areal phonetic typology of glottalization, ejective stops, germination, palatalization and pharyngealization (mainly) in languages of the Caucasus.

Tom Güldemann is Professor of African Linguistics at the Department of African Studies of the Humboldt University of Berlin. His main research
interests are language description and typology as well as historical and areal linguistics. Major publications include *Quotative Indexes in African Languages: A Synchronic and Diachronic Survey* (2008) and *Beyond "Khoisan": Historical Relations in the Kalahari Basin* (with Anne-Maria Fehn, 2014). Current research projects deal with macro-areal linguistics in Africa in general and the linguistic and population history of southern Africa in particular.

**Geoffrey Haig** is Professor of General Linguistics at the Institute for Oriental Studies at the University of Bamberg. His main areas of research are the languages of the Middle East with a focus on Iranian languages, areal linguistics, documentary linguistics, and language typology, in particular corpus-based typology.

**Harald Hammarström** studied Computer Science and Linguistics at the University of Uppsala (1997–2003). He then went on to do a PhD in Computational Linguistics at Chalmers University (2004–2009), focusing on computational models that cater to diverse kinds of languages. In his postdoctoral work he started documentation of the endangered language isolate Mor in Papua, Indonesia. At present he is research staff at the Max Planck Institute for Psycholinguistics in Nijmegen, where he is engaged in empirical and computational approaches to linguistic diversity, genealogical/areal relationships and language universals.

List of Contributors

Harry van der Hulst is Professor in Linguistics at the University of Connecticut. His main area of research is phonology (of both spoken and sign languages). He is the author of Syllable Structure and Stress in Dutch (1984) and The Phonological Structure of Words: An Introduction (with Colin Ewen, 2001) as well as some 30 edited books and 160 articles/book chapters. He is also the editor-in-chief of The Linguistic Review (since 1990).

Brian D. Joseph is Distinguished University Professor of Linguistics and The Kenneth E. Naylor Professor of South Slavic Linguistics at The Ohio State University, where he has taught since 1979. He received his PhD from Harvard University in 1978, writing his dissertation on syntactic change between Medieval and Modern Greek. Brian Joseph specializes in historical linguistics, Greek linguistics, and Balkan linguistics, and has published extensively in these areas, including the monograph The Synchrony and Diachrony of the Balkan Infinitive: A Study in Areal, General, and Historical Linguistics (1983). He served as editor of Diachronica from 1999 to 2001 and as editor of Language from 2002 to 2008.

Simon van de Kerke is a retired senior lecturer at Leiden University and a specialist in the indigenous languages of Bolivia. He wrote his thesis on the morphological structure of the verb in Bolivian Quechua. Currently he is working on Pukina and Leko in particular. He wrote the grammatical sketches of these languages for the first volume of the Lenguas de Bolivia series (edited by Emily Irene Crevels and Pieter Muysken; the sketch of Pukina with Willem Adelaar as co-author).

James Kirby is a Reader in Phonetics at the University of Edinburgh. His research is on the phonetics and phonological underpinnings of sound change, with particular attention to tonogenesis and the phonetic mechanisms involved in the production and perception of tone and voice quality.

Maria Koptjevskaja-Tamm is Professor of Linguistics at Stockholm University. She has published extensively on various aspects of semantically oriented typology, combining synchronic and diachronic approaches across many languages. A large portion of her work focuses on the interplay between lexical and grammatical semantics. An important direction in her work has been areal typology, with the main focus on the European and, particularly, the circum-Baltic languages: see The Circum-Baltic Languages: Typology and Contact (with Östen Dahl, 2001). More recent publications include New Directions in Lexical Typology (special issue of Linguistics, 2013, co-edited with Martine Vanhove) and The Linguistics of Temperature (2015).

Bernd Kortmann is Full Professor in English Language and Linguistics at the University of Freiburg, Germany, and Director of the Freiburg...
Institute for Advanced Studies. His main research interests include the areal typology of Europe, grammaticalization, language complexity, and grammatical variation across non-standard varieties of English. His publications include four monographs, nine edited volumes, two handbooks, one print and one open-access online atlas on grammatical variation in the Anglophone world (2012/2013), and about 90 research articles and reviews in journals and collective volumes. He is co-editor of the journal *English Language and Linguistics* and co-editor of two international book series.

**Olga Krasnoukhova** received her PhD at the Centre for Language Studies of Radboud University Nijmegen, the Netherlands. From 2017, she is postdoctoral researcher at the University of Antwerp in Belgium. Her research interests include South American languages, areal typology and morphology. She has publications on noun phrase structure, demonstratives and attributive possession in South American languages. Her current research focus is negation in South American languages.

**Nataliya Levkovych** is Senior Researcher in General Linguistics at the University of Bremen. Her main research interests are language contact, areal linguistics and typology. Recent publications include *Po-russki in Deutschland: Russisch und Deutsch als Konkurrenten in der Kommunikation mehrsprachiger Gruppen von Personen mit postsowjetischem Hintergrund in Deutschland* (2012).

**Henrik Liljegren** is Associate Professor in Linguistics at Stockholm University. He is a co-founder of Forum for Language Initiatives, a resource and training centre for the many language communities in Pakistan’s mountainous north, where he carried out linguistic fieldwork, primarily in the Indo-Aryan Palula community. His main research interests are areal-linguistic typology, Indo-Iranian languages (in particular in the northwest of the Indian subcontinent), case alignment, phonology and lexicography. He has also been engaged in revitalization efforts, mentoring language activists in local communities. He is presently leading a Swedish Research Council project, investigating language contact and relatedness in the Hindu Kush region.

List of Contributors

Luisa Miceli is an Associate Lecturer in Linguistics at the University of Western Australia. Her research interests include methodological issues in historical linguistics, the role of bilingualism in language change, and Australian languages (in particular Pama-Nyungan languages). She is currently collaborating on a research project investigating bilingual-led form differentiation in language contact.

Lev Michael is Associate Professor of Linguistics at the University of California, Berkeley. With a methodological grounding in language documentation, his research focuses on the sociocultural dimensions of grammar and language use, typology, language contact in South America, and the historical linguistics of Arawak, Tupi-Guarani, and Zaparoan languages. His recent publications include Evidentiality in Interaction (with Janis Nuckolls, 2012) and Negation in Arawak Languages (with Tania Granadillo, 2014).

Marianne Mithun is Professor of Linguistics at the University of California, Santa Barbara. Her main research interests are morphology, syntax, discourse, prosody, and their interrelations; language contact and language change; typology and universals; language documentation; North American Indian linguistics; and Austronesian linguistics. Among her major publications is The Languages of Native North America (1999).

Pieter Muysken is Professor of Linguistics at Radboud University Nijmegen, the Netherlands. His main research interests are language contact, Andean linguistics, and Creole studies. Recent publications include The Native Languages of South America: Origins, Development, Typology (with Loretta O’Connor, 2014) and Surviving Middle Passage: The West Africa–Surinam Sprachbund (with Norval Smith, 2014). Earlier books include The Languages of the Andes (Willem Adelaar with Pieter Muysken 2004).

John Peterson is Professor in General Linguistics at the University of Kiel in Germany. His areas of specialization include language description, especially with respect to the Munda and Indo-Aryan languages of eastern-central India, multilingualism and linguistic theory. He is editor of the series Brill’s Studies in South and Southwestern Asian Languages (BSSAL) and is a member of the editorial board of the Journal of South Asian Languages and Linguistics.

Keren Rice is University Professor and Canada Research Chair in Linguistics and Aboriginal Studies at the University of Toronto. Her major research interests are in phonology (with a focus on markedness), morphology, indigenous languages of North America (in particular Dene [Athabaskan] languages), and fieldwork. Recent publications include papers on accent systems in North American indigenous languages, accent and language contact in North America, derivational morphology in Athabaskan languages, and sounds in grammar writing. She is one of the co-editors of the Blackwell Companion to Phonology.
Martine Robbeets is Associate Professor of Japanese Linguistics at Leiden University. Her main research interests are historical comparative linguistics, areal linguistics, diachronic typology, grammaticalization theory, morphology and interdisciplinary research of linguistic prehistory. Recent publications include *Diachrony of Verb Morphology: Japanese and the Other Transescursian Languages* (2015) and various edited volumes such as *Copies versus Cognates in Bound Morphology* (with Lars Johanson, 2012), *Shared Grammaticalization* (with Hubert Cuyckens, 2013) and *Paradigm Change* (with Walter Bisang, 2014). Since September 2015 she has been conducting an interdisciplinary research project on the dispersal of the Transeurasian languages, funded by a Consolidator Grant from the European Research Council.

Malcolm Ross is Emeritus Professor in Linguistics at the Australian National University, where he held various positions from 1986 until his retirement in 2007. His main research interests are the histories of the languages of New Guinea and the Pacific, the study of language contact, and the methodologies of historical linguistics. Recent articles have appeared in *Oceanic Linguistics*, the *Journal of Historical Linguistics* and the *Journal of Language Contact*. He is co-editor with Andrew Pawley and Meredith Osmond of the volumes (four to date) of *The Lexicon of Proto Oceanic*. Current research projects include the Oceanic Lexicon Project (reconstructing the lexicon of the language ancestral to the Oceanic group of Austronesian languages) and reconstructing the history of the Trans New Guinea family of Papuan languages.

Verena Schröter studied English language and literature and philosophy at the University of Freiburg, and completed her MA in 2010. She is a part-time lecturer at the English Department of the University of Freiburg, and is currently working on her PhD, exploring morphosyntactic variation in Southeast Asian varieties of English.

Thomas Stolz is Full Professor of General and Comparative Linguistics at the University of Bremen (Germany). His main research interests are areal linguistics, language contact, morphology and language typology. Recent publications include *Competing Comparative Constructions in Europe* (2013), *The Crosslinguistics of Zero-marking of Spatial Relations* (with Sander Lestrade and Christel Stolz, 2014), and articles in *Linguistics, Studies in Language*, and *Sprachtypologie und Universalforschung*. Current research projects include the areal linguistics and typology of spatial interrogatives as well as the morphosyntax of place names in cross-linguistic perspective.

Alan Timberlake is Professor of Slavic Linguistics and Director of the East Central European Center at Columbia University. A long-term research concern of his is the integration of sociolinguistic/communicative approaches and structural analysis. Recent publications include two articles on historical syntax for the volume on Slavic languages in the
List of Contributors

Daníel Van Olmen is lecturer in historical linguistics and linguistic typology at Lancaster University. His main research interests are tense, mood, modality and pragmatic markers from a West Germanic, Standard Average European and typological perspective.
