Contents

Preface  page xi

PART I Basics

1. Writing a scientific article and getting it published  3
   The standard scientific article  4
       Title  7
       Summary or abstract or (rarely) synopsis, and keywords  10
       Symbols and abbreviations  12
       Introduction  12
       Materials, study area, and methods  16
       Results  18
       Discussion  21
       Conclusions  23
       Acknowledgments  23
       References (or literature cited)  24
       Tables and figures  25
       Supplementary materials  26
   Latin names of organisms  26
   What journal should I choose, and how many articles should I write?  28
   How long does it take to write and publish an article?  37
## Some advice
- After choosing a target journal, and up to the first public draft
- Revision of the first public draft
- Submission to your target journal
- The editor and the publishing process
- The editor’s duties
- Proof correcting
- Intellectual property: copyright and patents
- The digital electronic future

### 2. Speaking about your work
- Writing a summary
- Preparing what to say
- Visual aids
  - Slide order and design
- Practising and refining
- On the day but before your talk
- The performance itself

### 3. Making and displaying a scientific poster
- The title and summary
- Preparing the poster content
- Designing and laying out the poster
- Before leaving for the meeting
- Setting up and tending the poster

### 4. Scientific authorship
- How many authors does it take to write an article?
- Who qualifies as an author?

### PART II Improving

#### 5. Style in writing
- The arrangement of ideas and words
- ‘Proper words in proper places’
  - Guidelines

CONTENTS

Imprecision and bias 214
Measurement error, material variation and error, and randomisation 218

Measures of dispersion and imprecision 221
Dispersion and describing: standard deviation (SD) and quantiles 221
(Im)precision and testing: standard error of the mean (SEM) 226

Significant digits 230
Combining errors 237
Examples 240

9. Data interrelations 243
Interpreting P values 243
Are two means significantly different? 246
Correlation, regression, and functional analysis 250
Correlation 250
Regression 251
Functional relations and analysis 253
A better way? 257
‘Significance’ and ‘importance’ 260
‘Common sense’ 260

10. Tables and figures: the evidence 261
Tables 263
Table heading 265
Table layout 266
Table furniture 270
Data items in a table 271
Figures: graphs 273
Design: general 275
Arrangement of multiple graphs 278
Design elements 278
Types of graph 290
Figures: other line diagrams 294
Figures: images 294
What image manipulations are acceptable? 294
## Appendix to Chapter 10: colour modes, resolution, and file formats

297
- Colour modes 297
- File formats and image resolution 300

### 11. Citing and referencing 305

| Citations | 306 |
| Author-date system | 306 |
| Citation-number and reference-number system | 307 |

| References | 308 |
| Abbreviated titles of journals | 312 |
