

## Index

- $Q$ -factor, 118  
 $n : m$  phase synchronization, 48
- active–passive decomposition, 38  
 adjacency matrix, 185, 209  
 Adler equation, 28, 138  
 Aizawa model, 170, 173, 174  
 all-to-all coupling, 125, 202  
 amplitude death, 169  
 analog–digital converter, 231  
 Andronov–Hopf bifurcation, 15, 16, 125, 168  
 anticipating synchronization, 33, 60, 89, 102, 104  
 antiphase synchronization, 47, 103, 110, 235  
 Arnold tongue, 33  
 artificial intelligence, 231  
 attractor, 1, 5, 6, 9, 79, 177, 229  
 auto-synchronization, 177  
 autonomous system, 4  
 auxiliary system method, 71
- backward diagram, 223  
 backward transition, 167  
 basin of attraction, 9, 10, 84, 231  
 Bellerophon, 124, 166  
 Belousov–Zhabotinsky reaction, 160  
 bidirectional coupling, 35  
 bifurcation, 14  
 bifurcation diagram, 15, 84, 128, 130  
 bimodal distribution, 167  
 block-triangular matrix, 208  
 brain, 47  
 Brownian motion, 60  
 bursting, 101, 103
- Cauchy principal value, 49  
 chain-recurrent set, 159  
 chaos control, 177  
 chaos regularization, 103  
 chaos synchronization, 112  
 chaotic map, 154  
 chaotic modulation, 115  
 chaotic oscillators, 52
- chaotic system, 5, 14  
 chaotic time series, 50  
 chemical oscillator, 160  
 Chimera, 124  
 chimera, 147, 150, 163  
   experimental, 160  
 chimera death, 175  
 circulant matrix, 196, 210  
 classical chimera, 148, 153  
 cluster, 128, 130, 134, 135, 144, 154, 155, 159  
 clustering coefficient, 199, 200  
 coherence enhancement, 41, 64  
 coherence resonance, 66  
 collective behavior, 124  
 collective state, 95  
 commodity scheme, 233, 236  
 communication, 114  
 complement network, 219  
 complete synchronization, 33, 34, 120, 121, 157, 231  
 complex network, 185  
 conditional Lyapunov exponents, 37, 39, 45, 71, 94  
 conditional probability, 55  
 connected component, 203, 208  
 connectivity, 207  
 connectivity matrix, 232  
 conservative system, 4  
 continuous limit, 135  
 continuous system, 2  
 control, 80  
 control matrix, 184  
 convex set, 209  
 cosine kernel, 166  
 coupled pendula, 47  
 coupling, 23  
   bidirectional, 24  
   diffusive, 24  
   master–slave configuration, 24  
   unidirectional, 24  
 coupling kernel, 146  
 coupling topology, 144  
 Courant theorem, 206  
 crisis, 20

- critical exponent, 89  
 cross-correlation, 35, 62, 121  
 crowd  
   behavior, 98  
   diffuse, 96  
   quiet, 96  
 crowd behavior, 78  
 crowd formation, 92  
 cryptography, 112  
 cycle, 210
- degenerate eigenvalues, 210  
 degree, 186, 196, 202, 204, 207, 220  
 degree distribution, 203  
 degrees, 202  
 delay time, 104, 177  
 delay vector, 73  
 delayed feedback, 77  
 deterministic system, 2  
 diagonal coupling, 181  
 diameter, 214, 220  
 diffusion, 146  
 diffusive coupling, 35, 147, 186  
 digital–analog converter, 231  
 direct coupling, 147  
 directed weighted graph, 208  
 discrete system, 2  
 dissipative system, 4, 77  
 Dyson’s equation, 201
- edge, 185  
 edge connectivity, 207, 208, 214, 220, 221  
 eigenratio, 194, 203, 222  
 eigenvalue bound, 204  
 electronic oscillator, 164, 179  
 embedding dimension, 73  
 emergence, 95  
 ensemble, 126, 167, 173  
 entrainment, 80  
 equilibrium point, 3, 82  
 error dynamics, 75  
 Escherichia coli, 25  
 Euler method, 152  
 evolutionary network, 144  
 explosive synchronization, 168, 223  
 external forcing, 92  
 eye diagram, 119  
 eyelet intermittency, 59
- feedback, 74, 102  
 Feigenbaum scenario, 16  
 Floquet multiplier, 45, 180, 184  
 focus, 13, 83, 84  
 forward transition, 168  
 Fourier mode, 53  
 Fourier transform, 8, 49, 152, 196  
 frequency entrainment, *see* phase-locking  
 frequency locking, 26, 92, 104  
 frequency mismatch, 90  
 frequency spectrum, *see* power spectrum  
 frequency-splitting bifurcation, 31  
 Frobenius norm, 46  
 Fujisaka–Yamada scheme, 38  
 fundamental matrix, 180
- generalized chimera, 153  
 generalized synchronization, 68, 74, 80, 90, 94, 101, 121  
 geometric phase, 48  
 global coupling, 146, 154  
 global synchronization, 36, 76  
 graph, 204, 208  
 graph Laplacian, 187  
 graph sampling, 203
- harmonic number, 202  
 harmonic oscillator, 5  
 Hebbian learning, 141  
 heterogeneity, 204  
 hierarchical populations, 155  
 Hilbert transform, 48  
 Hodgkin–Huxley neuron, 102, 107, 111  
 homoclinic chaos, 84  
 homoclinic orbit, 84  
 homoclinic tangencies, 77  
 homogeneous coupling, 147, 153  
 homogeneous driving configuration, 37  
 hub, 224  
 hyperbolic equilibrium, 12  
 hysteresis, 130, 223
- identical synchronization, *see* complete synchronization  
 imperfect phase-locking, 60  
 improper cycle, 210  
 in-phase synchronization, 110  
 incommensurate frequencies, 18  
 indistinguishable oscillators, 157  
 infinite network, 204  
 informational scheme, 233, 236  
 initial conditions, 150  
 instantaneous phase, 47  
 intermittency, 10, 18, 59, 85, 88, 89, 92, 231, 235  
 intermittency route to chaos, 18  
 intermittent phase synchronization, 58, 87, 90  
 intermittent phase-locking, 60  
 interpeak interval, 65  
 irreducible matrix, 208  
 isochron, 50, 52  
 isotropic coupling, 147  
 iterative map, 2
- Jacobian matrix, 12, 82, 170, 180, 189  
 Jacobian operator, 189
- kernel, 149, 151, 166

- Kuramoto model, 27, 124, 129, 130, 133, 134, 141, 147, 154, 167, 169, 174  
 Kuramoto transition, 141, 165
- lag synchronization, 33, 60, 102, 104, 112  
 Lambert function, 182  
 laminar phase, 18, 59, 88, 89  
 Laplace operator, 146  
 Laplacian, 187, 203, 208, 214, 219, 221, 225  
 large-amplitude attractor, 229  
 light modulator, 161  
 limit cycle, 9, 50, 84, 125, 170  
 linear system, 2  
 link weights, 142  
 liquid-crystal, 161  
 local coupling, 146  
 local dynamics, 146  
 loop, 209  
 Lorentz distribution, 167  
 Lorenz oscillator, 72, 79, 183  
 low-dimensional systems, 21  
 lower bound, 214  
 Lyapunov exponent, 1, 13, 16, 63, 68, 100, 192  
 Lyapunov function, 46
- manifold, 80  
 marginal stability, 12  
 masking, 116  
 Master Stability Function, 188, 192, 222, 224, 229  
 master–slave configuration, 37  
 maximally synchronizable networks, 194  
 measure of irreducibility, 207, 209, 212, 213  
 mechanical oscillator, 162  
 memory, 102  
 metastability, 10  
 metronome, 162  
 multilayer network, 185, 224, 226  
 multistability, 10, 77, 130, 174, 229  
 multistate intermittency, 85
- network, 102, 106, 162, 214  
 network diameter, 204  
 network motifs, 25  
 network topology, 225  
 neuron, 77, 101, 103, 104, 109, 141  
 neuron dynamics, 78  
 node strength, 186  
 node-balanced network, 233  
 noise, 10, 60, 89  
 noise-induced intermittency, 60  
 nonautonomous system, 4  
 nonhyperbolic equilibrium, 12  
 noninvasive control, 179  
 nonlinear dynamical system, 3  
 nonlinear dynamics, 1  
 nonlinear interdependencies, 72  
 nonlocal coupling, 146, 152, 153  
 nonnegative matrix, 210
- normalized standard deviation, 65  
 number of edges, 216
- Odd number limitation, 182  
 on-off intermittency, 89  
 order parameter, 130, 140, 164, 167, 224  
 ordinary differential equations, 2, 145  
 oscillation death, 64, 169, 173  
 oscillation quenching, 168  
 oscillator density, 136, 137  
 other parameter, 133  
 output function, 186
- paradox of heterogeneity, 204  
 parameter mismatch, 121  
 partial differential equation, 146  
 pattern recognition, 78  
 period-doubling, 92  
 period-doubling route to chaos, 16, 84  
 periodic boundary conditions, 148  
 periodic orbit, 9, 66, 178  
 periodic perturbation, 50  
 periodically forced system, 92  
 perturbation, 51  
 phase coordinate, 50  
 phase difference, 85, 108  
 phase lag, 149  
 phase locking, 104  
 phase map, 109  
 phase oscillator, 26–28, 31, 153  
   uniform, 27  
 phase portrait, 8, 92  
 phase response curve, 106, 110  
 phase shift, 49, 104, 110  
 phase slip, 29, 49  
 phase snapshot, 134  
 phase space, 3, 6, 126  
 phase synchronization, 47, 52, 60, 86, 103, 128, 159, 235  
   imperfect, 62  
   intermittent, 56, 62  
   permanent, 57  
 phase velocity, 149  
 phase-coherence, 52  
 phase-coherent system, 48  
 phase-locking, 29, 33, 52, 89, 110, 128, 144, 150  
 phase-slip, 149  
 phase-space reconstruction, 73  
 phase-synchronization, 142  
 pitchfork bifurcation, 15, 175  
 Poincaré map, 10  
 Poincaré section, 10, 48, 50  
 Pomeau–Manneville scenario, 18  
 postsynaptic, 109  
 power law, 202  
 power spectrum, 8, 81, 91  
 power-law exponent, 202, 220  
 power-law tail, 203

- preferential attachment, 202
- preferential attachment network, 207, 220
- preferential direction, 185
- presynaptic, 109
- probability density, 135
- probability density function, 132
- probability distribution, 138
- Pyragas control, 179
- Python, 150
- quasiperiodicity route to chaos, 16
- Rössler oscillator, 6, 8, 10, 11, 16, 41, 44, 54, 55, 57, 62, 67, 70, 72, 76, 79, 81, 84, 94, 98, 194, 229, 234
- random graph, 199
- random walk, 60
- repeller, 59
- resolvent, 201
- resonance, 106
- resting state, 101
- riddled basins, 11
- ring, 62, 66, 148, 153, 176
- ring lattice, 195
- route to chaos, 15
