Islamabad and the Politics of International Development in Pakistan

This is a highly original account of the design and development of Pakistan's capital city: one of the most iconic and ambitious urban reconstruction projects of the twentieth century. Balancing archival research with fresh, theoretical insights, Markus Daechsel surveys the successes and failures of Greek urbanist Constantinos A. Doxiadis's most ambitious endeavour, Islamabad, analysing how the project not only changed the international order, but also the way in which the Pakistani state operated in the 1950s and 1960s. In dissecting Doxiadis's fraught relationship with Pakistani policy makers, bureaucrats and ordinary citizens, the book offers an unprecedented account of Islamabad's place in post-war international development. Daechsel provides new insights into this period and explores the history of development as a charged, transnational encounter between foreign consultants and donors on the one side, and the post-colonial nation state on the other.

MARKUS DAECHSEL is Senior Lecturer in Modern South Asian History at Royal Holloway, University of London.

Acknowledgements

This book has been long in the making, and it is impossible to mention everybody who has helped to make it possible either in a professional or personal capacity.

However, I would like to record my specific thanks to the following:

Alexandros Kyrtsis, who started it all when out of the blue he invited me to speak at the C. A. Doxiadis conference in Athens in December 2006, and opened my way into the Doxiadis Archive, not to mention offering me his hospitality and expert advice on numerous matters relating to this book. A very big ‘thank you’ also to Giota Pavlidou, librarian and archivist at the Doxiadis Archive, who in her capacity has quite simply been the best professional help any historian could ever hope for.

In Pakistan, Fatima Kaniz Yusuf, Rafay Alam, Sayid Qazi and family, Kamil Khan Mumtaz (and many others) for sharing their expertise with me. Likewise the staff of the National Documentation Centre and CDA Library, Islamabad, for their unfailing professionalism.

Everyone who was available for an oral history interview (see list in Bibliography). Gustav Papanek, Doxiadis’s contemporary in Pakistan in the 1950s, for responding to an e-mail enquiry about Doxiadis.

Academic colleagues past and present: Crispin Bates, Paul Nugent, Gajendra Singh, Ashok Malhotra in Edinburgh; Sarah and Humayun Ansari, Dan Haines, Elisabeth Leake, Ali Usman Qasmi, Sandra Halperin at Royal Holloway; elsewhere and through many workshops and conferences: Stephen Legg, Matthew Hull, Stephan Miescher, Will Gould, Ravi Ahuja, Henrike Donner, David Arnold, David Hardiman, Prashant Kidambi, Projit Mukherjee, Jahnavi Phalkey and many others for comments and inspiration along the way. Francis Robinson, Florian Schui and Julia Gallagher for reading parts of the draft.

The Carnegie Endowment for Scottish Universities and the British Academy for awarding me for this project funding as part of the Small Research Grant scheme.

The anonymous readers of the manuscript (as well as of the associated articles listed in the Bibliography). Marigold Acland, Lucy Rhymer and
Amanda George at Cambridge University Press who kept their faith in me despite long delays.

Finally, three children have accompanied this book: Adam – born almost simultaneously with the start of the project and veteran companion on research travels around the world at a very young age, Leo – keeping me company during the writing-up phase, and Amira – recent reminder that it was now really time to finish. To them – and to Yasmin for her never failing patience and love throughout those years – do I dedicate this book.

Note on spelling: In order to avoid anachronisms, the spelling of place names used in the book reflects the usage of the 1950s and 1960s and ignores recent indigenization, e.g. ‘Calcutta’ instead of ‘Kolkata’, ‘Bombay’ instead of ‘Mumbai’, ‘Dacca’ instead of ‘Dhaka’.
