social wealth, four main categories, 195
socialists advocated state intervention without proof, 249
solution in real markets of the equations of exchange and production, 247
stability analysis of capital goods formation, 490
stability analysis of capital goods market, 286, 287, 292
stability analysis of markets for products, 483, 484
stability analysis of markets for services, 486
stability analysis, price changes destroy temporary partial equilibrium, 479
stability of capital formation process in real markets, 279
stability conditions for path independence, 161
stability of the monetary standard, 416
stability of multi-commodity exchange equilibrium probable, 143
stability in production, 239
stability of production model probable, 241
stability properties of a single market, 108
stability in a single market, how it occurs, 66
stability situation when new commodity introduced, 172
stability of tatonnement probable in production, 244
stable equilibrium in capital goods production, 287
stable equilibrium in real markets for new capital goods, 288
stable system, with production, 242
state as entrepreneur, 441
state intervention in regard to the distribution of wealth, 438
stationary state or equilibrium of the market, 44
stock exchange, functioning of, 43
stock exchange, the market for movable capital, 313
stocks, 193
supply and demand equality, 161
supply and demand equalization, marketplace solution of, 108
supply and demand equivalence, 160
supply and demand, fundamental law of economics, never demonstrated or formulated correctly, 155
supply curve of individual, shape of, 476
supply curves, partial, addition of, 478
supply of money, 382
supply of money equal to the existing quantity of money, 382
tableau économique of Quesnay, 331
tableau économique, criticism of, 333
tableau économique, critique of, 335
tatonnement by a monopolist, 444
tatonnement criticism refuted, 479
tatonnement finished, conditions, 280
tatonnement in a particular market, 44
tatonnement in a single market, 50
tatonnement in production, 243
taronnement in production by entrepreneurs shifting resources, 237
tatonnement in raising and lowering prices, 140
tatonnement is the practical market determination of the calculated prices, 161
tatonnement occurs naturally in the market for services, 242
tatonnement of production occurs automatically in the market, 237
tatonnement of quantities, non-virtual in disequilibrium, 233
tatonnement solves the system of equations, 140
tatonnement takes place under the regime of free competition, 244

tatonnement, if assumed that data do not change during, 229

tatonnement, in production of new capital goods, 280

tatonnement, mathematical, 285, 286

tatonnement, mathematical in new capital goods model, mirrors real market
tatonnement, non-virtual, leads production and prices closer to equilibrium amounts, 236
tatonnement, reprise of, in production, 229

tatonnements in the various markets take place simultaneously, 487

tatonnements lead prices of services to equilibrium, 281

tatonnements, a series of, 229

tatonnements, before finished start anew, 318

tax imposed directly on interest, 463

tax levied in perpetuity on State bonds, 465

tax on any type of capital good, effects of, 465

tax on consumption, incidence of, 466

tax on house rent, 465

tax on products, 466

tax on rent, direct, 460
taxation, indirect, 459

taxation, direct, 458

taxes ought to be levied only on the fund available for consumption, 457

taxes, effects of different kinds of, 456
taxes, levy only on incomes, 458

technical arts, 30

theorem of equivalent redistributions, 165

theorem of equivalent redistributions, 156

theory and practice ought to be of help to one another, 216

theory of exchange, mathematical, Walra's priority, iv

theory of marginal productivity, 509

theory of production and theory of capital formation, geometric demonstration of, 480

theory of production founded on reality, 213

theory of property, 36

theory of rareté, enunciated by Burlamaqui, 182

theory of the general equilibrium in exchange restated, 161

theory of value, Smith's, 180

total demand curve, 56

total quantity in existence supplied, xxxvi, 175

trading is suspended, 44

trading should be suspended if supply and demand unequal, 44

Transactions balances of money, 203

useful things, 22

useful things limited in quantity, characteristics of, 22

utility curves and the quantities possessed, elements for determination of the price, 110

utility curves discontinuous if commodities by their nature are consumed in integral units, 148

utility functions and asset holdings, effects of changes of, 252

utility theory, Menger on, 186

utility, assumed cardinally measurable, 80

utility, effective, geometrically, 472

utility, effects of changes of, 152

utility, extensive, 78, 98

utility, final degree of, 471

utility, indirect, 29

utility, intensive, 79

utility, intensive, unmeasurable, 80

value and wealth, measurable, 165

value in exchange, 20, 23

value in exchange, a relative fact, 113

value in exchange, defined, 42

value in exchange, measurable, 27

value in exchange, measured by rareté, 113

value in exchange, true character, 151

value is mathematical in character, 26

value of land and of land services rises constantly in a progressive society, 462, 463

value of money, problem of, 378

value, a fact, a natural phenomenon, 25

value, Gossen on, 184

value, origin of, different views, 179

value, reality of the facts of, 182

values in exchange, proportional to the raretés, 251

variations in utility and in the quantity possessed disturb the state of maximum satisfaction, 116

virtual model, only one tatonnement in, 500
Index

wages, English theory of, 362
wages, English theory of, invalid, 367
want (utility) curves, continuous and discontinuous, 91
wants, satisfaction of, see satisfaction, maximization of
wealth, social, defined, 20
