The Cambridge Handbook of Meeting Science

This first volume to analyze the science of meetings offers a unique perspective on an integral part of contemporary work life. More than just a tool for improving individual and organizational effectiveness and well-being, meetings provide a window into the very essence of organizations and employees’ experiences with the organization. The average employee attends at least three meetings per week, and managers spend the majority of their time in meetings. Meetings can raise individuals, teams, and organizations to tremendous levels of achievement. However, they can also undermine effectiveness and well-being. The Cambridge Handbook of Meeting Science assembles leading authors in industrial and organizational psychology, management, marketing, organizational behavior, anthropology, sociology, and communication to explore the meeting itself, including premeeting and postmeeting activities. It provides a comprehensive overview of research in the field and will serve as an invaluable starting point for scholars who seek to understand and improve meetings.

JOSEPH A. ALLEN is an Assistant Professor of Industrial and Organizational Psychology at the University of Nebraska at Omaha.

NALE LEHMANN-WILENBRICK is an Assistant Professor of Social and Organizational Psychology at VU University Amsterdam, the Netherlands.

STEVEN G. ROGELBERG is University Professor of Psychology and Management and the director of the Organizational Science program at the University of North Carolina at Charlotte.
The Cambridge Handbook of Meeting Science

Edited by
Joseph A. Allen
Nale Lehmann-Willenbrock
Steven G. Rogelberg
Joe: To Joy, Karen, Rachel, Alice, and Julia.
Nale: To Sören.
Steven: To Sandy, Sasha, and Gordon.

Part I. Introduction

1 An Introduction to The Cambridge Handbook of Meeting Science: Why Now? 3
   JOSEPH A. ALLEN, NALE LEHMANN-WILLENBROCK, AND STEVEN G. ROGELBERG

2 Exploring Meeting Science: Key Questions and Answers 12
   JESSIE LYNN OLIEEN, STEVEN G. ROGELBERG, NALE LEHMANN-WILLENBROCK, AND JOSEPH A. ALLEN

3 Five Theoretical Lenses for Conceptualizing the Role of Meetings in Organizational Life 20
   CLIFF SCOTT, JOSEPH A. ALLEN, STEVEN G. ROGELBERG, AND ALEX KELLO

Part II. Premeeting Activities and Context

Meeting Setup

4 Meeting Preparation and Design Characteristics 49
   ISABELLE ODERMATT, CORNELIUS J. KÖNIG, AND MARTIN KLEINMANN

5 Meeting Training: A Suggestion 69
   FERAH AKSOY-BURKERT AND CORNELIUS J. KÖNIG

Meeting Composition

6 How Differences Make a Difference: The Role of Team Diversity in Meeting Processes and Outcomes 93
   FABIOLA GERPOTT AND NALE LEHMANN-WILLENBROCK

3.1 Meeting metaphors

5.1 Training day 1
5.2 Training day 2
5.3 Module 4 worksheet, using absenteeism as an example
5.4 Follow-up event
7.1 Published papers on meetings across cultures
7.2 Cultural differences in meeting processes and expectations
8.1 Premeeting talk types
8.2 How to use small talk before meetings
9.1 Means, standard deviations, and correlations
9.2 Overview of research results
10.1 Purposes of organizational meetings discussed in the literature
10.2 Meeting orientation scale items
11.1 Summary of the dataset
12.1 Transcription symbols
15.1 Basic steps in interaction process analysis
15.2 Act4teams coding scheme for verbal interaction behaviors in meetings (adapted from Kauffeld & Lehmann-Willenbrock, 2012)
15.3 Sample utterances (sense units) coded with act4teams
15.4 Average distribution of meeting behaviors across the first and second halves of the meetings (Wilcoxon signed-rank test)
16.1 Relational social network measures of ties
16.2 Social network measures for individual actors
16.3 Social network measures for subgroups
16.4 Social network measures for entire networks
16.5 Benefits and research questions for meeting research
17.1 Definitions and examples of video-observed leader behaviors
17.2 Differences between actual vs. employees’ and students’ estimates of effective leader behaviors
17.3 Confirmatory factor analysis: loadings on the leader-behavioral description items
17.4 Correlations between the duration of actual leader behaviors in staff meetings and recalled ratings of these behaviors

Page numbers are included for each table entry.

Figures

4.1 The considerations that meeting leaders (N = 180) made during their meeting preparation (Odermatt et al., 2013) page 61
4.2 Percentage of meeting leaders (N = 180) using design characteristics (Odermatt et al., 2013) 61
6.1 Conceptual model linking diversity as a defining input factor, interactions, and outcomes in meetings 103
9.1 Overview of study variables 179
9.2 Average meeting size in the GLOBE clusters 187
9.3 Meeting length in the GLOBE clusters 187
9.4 Number of meetings per week in the GLOBE clusters 188
9.5 Percentage of time spent in meetings in the GLOBE clusters 189
9.6 Agenda use in the GLOBE clusters 190
9.7 Use of action points in the GLOBE clusters 191
9.8 Late start in the GLOBE clusters 191
9.9 Late end in the GLOBE clusters 191
10.1 A conceptual model of meeting orientation 207
11.1 An organizational river of discourse 226
11.2 Prehensive and retrospective sensemaking 227
11.3 Conceptual framework for collective minding 229
11.4 Meeting trans-participants 231
11.5 Systemic meetings model 234
11.6 Meeting flows 239
12.1 Moving to meeting structure 255
12.2 Seating arrangements of the reviewers 265
13.1 Meeting interaction including the contextual surroundings: paper documents, pencils, computers, coffee cups, meeting table, and whiteboard 278
13.2 Two-party strategy meeting including a laptop (in the lower right corner), to which the participant on the right has access. The computer screen is projected onto the whiteboard in front of the participants 290
15.1 Stream of meeting behavior coded with the act4teams coding scheme using Interact software (Mangold, 2010) 336
15.2 Time line chart of one meeting coded with the act4teams coding scheme. The upper line (1) shows the flow of
interaction in the first half of the meeting, and the lower line (2) shows the flow of interaction in the second half of the meeting

16.1 Weighted graph of meeting interaction in a complete team meeting. Nodes display participants; arcs display participants’ responses

16.2 Weighted graph of meeting interaction in a complete team meeting. Nodes display participants; arcs display participants’ responses

18.1 Step-by-step procedure for analyzing the change processes in meetings

18.2 Software implementation of coding scheme

18.3 Temporal dynamics of R for three simulated meetings

18.4 The transtheoretical model of change and its relation to the R-index in meetings

19.1 Proposed conceptual model of status and emotion regulation in workplace meetings

20.1 Illustration of expressed affective states (i.e., pleasantness) of individual team members over the course of one particular meeting of a team

20.2 Illustration of the variance of team affective states (i.e., expressed pleasantness) over the course of the meeting interaction process for a sample team

21.1 Process model for the workshops. This figure illustrates the steps to achieve the goal; the key shows what each component of the figure means

22.1 Linear meeting process model (based on Newell & Simon, 1972)

22.2 A model designed for complex meeting processes

22.3 The complex meeting model (CMM)

22.4 Continuum showing preferred methods of problem solving, including some of the many dichotomous identification labels developed by theorists, such as Kirton (2003) and Hayes and Allinson (1998)

27.1 Input-process-output framework for after-action review meetings

Acknowledgments

A special thank you goes out to our editorial board members for their diligence and helpful feedback in crafting this volume: Ben Baran (Northern Kentucky University), Steve Beck (North Dakota State University), John Kello (Davidson College), Cornelius König (Saarland University), Alexandra Luong (University of Minnesota at Duluth), Gerardo Okhuysen (University of California at Irvine), Roni Reiter-Palmon (University of Nebraska at Omaha), Cliff Scott (University of North Carolina at Charlotte), Marissa Shuffler (Clemson University), and Karen Tracy (University of Colorado at Boulder). We are grateful to John Crowe, Verena Grießer, and Michael Yoerger for their assistance in assembling the final volume. We appreciate our universities’ support: VU University Amsterdam, the University of Nebraska at Omaha, and the University of North Carolina at Charlotte. Our collaboration was supported, in part, by a Faculty Research International (FRI) grant awarded by the University of Nebraska at Omaha.
