INDEX

1/f noise, see noise
ABCD parameters, 229
F
4/QPSK, see modulation
μ-law, see companding
A-law, see companding
absorption
atmospheric, 93–94, 590
ionospheric, 96
acquisition, of phase, 124
active mixer, see mixer
adaptive differential PCM (ADPCM), 142
adjacent channel power ratio (ACPR), 541
admittance (Y) parameters, 229
advanced wireless services (AWS), 587
alias (aliasing), see analog-to-digital converter
AM broadcasting, 3, 58, 482, 516, 583–584
AM–PM conversion, 348–349
ampliphase, 537
amplitude modulation (AM), see modulation
analog modulation, see modulation
analog-to-digital converter (ADC), 11, 446–458
alias (aliasing), 449
aperture uncertainty, 458
dynamic range, 453–457
effective number of bits (ENOB), 457
flash, 447, 448
lowpass sampling, 451
Nyquist zone, 449
pipeline, 448
sigma-delta (∑–Δ), 448
signal-to-noise ratio, see quantization
subranging, 448
successive approximation, 448
timing jitter, see timing jitter
undersampling, see undersampling
angle modulation, see modulation
antenna, 9, 17–58
array, 54–55
beam, 53
beam antenna, 49–51
cell phone, 382
current distribution, 35
dipole, 35–43, 221, 255, 381, 391
dipole, 5/8 λ, 39
dipole, batwing, 43
dipole, bowtie, 42
dipole, electrically-short (ESD), 20
dipole, folded, 42, 55
dipole, full-wave (FWD), 39
dipole, half-wave (HWD), 20, 37, 49
dipole, off-center-fed, 39, 40
dipole, planar, 41
dipole, sleeve, 41
discone, 382
electrically-small (ESA), 382–390
equivalent circuit, 40
feed, 51, 56, 224
helix, axial-mode, 57
helix, normal-mode, 57
horn, 56, 92, 224, 381
impedance matching, see impedance matching, antennas
integration, 33–35, 363–396
isotropic, 30
log-periodic beam, 382
loopstick, 58
monopole, 43–46, 56, 255, 391, 392
monopole, 5/8 λ, 45
monopole, electrically-short (ESM), 44
monopole, quarter-wave (QWM), 44, 45, 366, 376
patch, 46–48, 55, 381
planar inverted-F antenna (PIFA), 47, 386, 389
receiving, 25, 31, 363–375
reflector, 51–53, 56, 224–226
resonant, 381
temperature, 108, 208, 364
transmitting, 21, 29
tuner, 389–390
turnstile, 43
WiFi, 382
Yagi, 49
antenna temperature, see antenna
APCO P25, see land mobile radio
aperture efficiency, 52
aperture uncertainty, see analog-to-digital converter
application-specific integrated circuit (ASIC), 576
arcing, 109
array (antenna), see antenna
array factor, 54
ASK, see modulation
atmospheric absorption, see absorption, atmospheric
atmospheric noise, see noise
ATSC, see television
attenuation constant, 93, 234
attenuation rate, 478, 479
fast, 136, 478
slow, 478, 479
automatic gain control (AGC), 87, 122, 138, 154, 179, 182, 188, 195, 462, 478–480
fast, 136, 478
slow, 478, 479
available gain circle, 307
available gain design method, 306–309
available power, 240, 365
axial-mode helix, see antenna
backhaul, 5, 214–216
backlobe, 48
balanced circuit, see differential circuit
balun, 35, 256–257, 390–396
λ/2 transmission line, 394
coxial choke, 392–394
ferrite choke, 394
folded, 394
Guanella, 256
LC, 257, 392
Marchand, 395
Ruthroff, 256
sleeve, 393
transformer, 256, 392
transmission line, 257, 256–257
band-edge tracking, 188, 574
bandwidth, 1
amplifiers, 332
analog filters, 398–399
analog-to-digital conversion, 447–451
coherence, 77–80, 86, 88, 96, 173, 197, 199
decreasing, 271–273
first null (FNBW), 148, 151
fractional, 380, 398
fundamental limit, 271
half-power, 266
impedance matching, 266–268
increasing, 268–271
noise, 100, 127
noise-equivalent, 153, 158
quality factor, 266–268, 401
resolution, 359
unity-gain, see transistor
Barkhausen criteria, 489, 492
baseband modulation, see modulation
baseband representation, 115
batwing (antenna), see antenna
BCH (Bose, Chaudhuri, and Hocquenghem) coding, 177
beam (antenna), see antenna
beamforming, 54, 183
beamwidth
half-power (HPBW), 36, 37, 48, 52, 216
beat frequency, 347
beat product, 347
Beidou (GNSS), 594
bias tee, 305, 325, 327
biasing, see transistor
BiCMOS, 287
bilaterial (two-port), 238
bilaterial design, 302–310
binomial approximation, 72
bipolar junction transistor (BJT), see transistor
birdie, 471, 473
bit error rate (BER), 160
block code, 177
blocking dynamic range, see dynamic range
Bluetooth, 503, 592
Boltzmann’s Constant, 100, 286
bowtie (antenna), see antenna
BPSK, see modulation
branch, 182
branch line coupler, 548
breakpoint, 70, 73, 90
brightness temperature, 109, 110
broadband over power line (BPL), 109
broadcast (link), 6
broadcasting, 3, 55, 463, 523, 538, 583–585
buffer, 334, 499, 539
C-band, 3
C4FM, see modulation
cable driver, 301
capacitor, digital step, 506
capacity, 174
capture threshold, 137
carrier, 81
carrier aggregation, 220, 588
carrier frequency estimation, 155, 188–189, 574
carrier phase estimation, 154, 169, 189
carrier sense multiple access with collision avoidance (CSMA/CA), 8, 589
Carson’s Rule, 133
terrestrial feedback linearization, 545
cascaded integrator comb (CIC), see filter, digital
CB radio, 3, 517, 586
cell, 8
cellular, 3, 5, 6, 75, 142, 184, 197–200, 216–220, 345, 472, 479, 483, 484, 502, 517, 540, 586–589
central processing unit (CPU), 513, 574
channel coding, 139, 176–179, 219
channel impulse response (CIR), 74–80, 185–186
characteristic curve, see transistor
characteristic impedance, see transmission line
charge pump, see synthesizer (frequency) checksum, 177
chip, 196
Chipex, 537
Citizen’s Band, see CB radio
Clapp, see oscillator
Class A, 132, 145, 524, 526–529
Class AB, 132, 145, 524, 533–534
Class B, 524, 526, 530–533
Class C, 132, 145, 524, 526, 534–535
Class D, 524, 526, 535–536
Class E, 524, 536
Class F, 524, 536
Class G, 536
Class H, 536
Class S, 536
clocking (ADC), 448, 460
coaxial choke balun, see balun
code division multiple access (CDMA), 5, 8, 196–199, 220, 345, 478, 479, 484, 503, 534, 540, 541, 543, 587
code excited linear prediction (CELP), 142
code rate, 177
codec, 143
codeword, 177
coding gain, 178
coefficient, reflection, 64
coherence bandwidth, see bandwidth, coherence
cohesence distance, 87
cohesence time, 84, 87, 90, 121, 193, 478
coherent demodulation of AM, 122–125
digital modulations, 154–155, 187
sensitivity, 125
cooler efficiency, see power amplifier, efficiency
collector feedback stabilization, 292
color dot, see land mobile radio
Colpitts oscillator, see oscillator
common mode interference, 255
commutator, 561
companding, 142
complementary code keying (CCK), see modulation
complementary error function, 159
complementary metal–oxide semiconductor (CMOS), 287, 333–334
complex baseband representation, 115–118, 440
compression (of data), 139, 141
compression point, 1 dB, 342–343, 346–347
decoding angle, 524, 533
conductivity, 64
constant modulus (CM), 524, 534
constellation diagram, 144
continuous wave (CW), 139
continously-variable slope delta modulation (CVSDM), 142
convolution coding, 178
CORDIC, 513
correlation receiver, 156, 172, 196
cosmic microwave background (CMB), 110, 111
COST231 model, see path loss
Costas loop, 124, 189
crest factor, 540
crystal, 426, 482, 504, 514
cumulative distribution function (CDF), 82
current mode, 35, 253
current moment, 18
current source array, 519
cutoff frequency, see filter, analog
cylic prefix, 200
dBm/Hz, 357
DC current gain, 286
decimation, 561–564
decision feedback equalization, see equalization
decision metric, 154, 156, 168, 182, 186
decision rule, 158, 163
decision threshold, 158, 163
DECT, 172, 503
DECT1800, 172
DECT900, 172
deemphasis, 136
delay filter, see filter, digital
delay spread, 76–77, 86, 88, 96, 185, 198
delay spread, root mean square (RMS), 77
delay-locked loop (DLL), 573
derotation, 123, 125, 169, 179, 182, 188
despeading, 196
device-to-device (D2D) communications, 589
dhbt, 144
differential amplifier, 333
differential BPSK (DBPSK), 169
differential circuit, 35, 253–257
impedance matching, 274
in ADC, 457
in DAC, 519
in phase-switching mixer, 436
differential coding, 168
differential detection, 167–170
differential PCM (DPCM), 142
differential QPSK (DQPSK), 169, 592
diffraction, 52, 67, 88
Digital Enhanced Cordless Telecommunications, see DECT
digital modulation, see modulation
Digital Radio Mondiale (DRM), 584, 585
digital signal processing (DSP), 550–576
digital video broadcasting – terrestrial (DVB-T), see television
digital-to-analog converter (DAC), 10, 512, 518–523
diode detector, 122
diode, tuning, see varactor
diplexer, 415, 434
dipole, see antenna, dipole
Dirac delta function, 18, 339
direct broadcast satellite, 94, 224–226, 484, 585
direct conversion, 117, 475–477, 517, 550
direct digital synthesis (DDS), 511–513
direct method (of FM modulation), 135
direct sampling, see receiver
direct sequence spread spectrum (DSSS), 8, 195–199, 587, 589, 592
directivity, 29, 37, 48, 52
director, 49
discrete Fourier transform (DFT), 200
dispersion (dispersive response), 413
dither (dithering), 456
diversity, 84, 87, 181–184
Doherty, 537
Doppler shift, 81, 84, 173, 188
Doppler spread, 81, 87, 201
double-balanced mixer, see mixer
downconversion, 430–431, 446
drain efficiency, see power amplifier, efficiency
driver (antenna), 49
dual modulus, 509
ducting, 97
duplexer, 6
dynamic range, 359–361
blocking, 360, 453
quantization, 453
spurious-free (SFDR), 360, 457
E-plane, 29, 48
early-late synchronizer, 573
Ebers–Moll model, 286
Edwards–Sinsky metric, 247
effective aperture, 28, 37, 52, 92
effective height, 28
effective isotropic radiated power (EIRP), 206, 379–380
effective length, 26, 37, see also vector effective length
effective number of bits (ENOB), see analog-to-digital converter
effective powered radiation (ERP), 14, 206–207, 379
electric field, 16, 18, 26, 29, 46
electrically-short dipole, see antenna
electrically-short monopole, see antenna
emitter degeneration, 294–297
emitter follower, see transistor
emitter induction, see differential induction
equalization
encryption, 139, 141
energy efficiency, 127, 174–178
energy per bit, 152, 209
enhanced variable rate codec (EVRC), 142
envelope, see modulation
evelope detection, 121, 135, 480
evelope elimination and restoration (EER), 537
equal-gain combining, 181
equalization, 187
decision feedback (DFE), 185
least mean squares (LMS), 187
minimum mean square error (MMSE), 186–187, 194, 574
recursive least squares (RLS), 187
zero-forcing, 185, 187
error control coding, 141, 177, 181, 192
error correcting capability, 177
error vector magnitude (EVM), 542
Euler’s formula, 115
exctaser, 10
external noise dominance, see noise, external
external temperature, 208
extinction, see path loss
fade margin, 221
fading, 79–87, 89–90
fast, 82, 132
flat, 81, 154, 179–184
frequency-selective, 79
ionospheric, 96
log-normal, 91
Nakagami, 90
Rayleigh, 83
Ricean, 89
slow, 91
two-ray, 89
Family Radio Service (FRS), 586
Fano–Bode relation, 271, 385, 387–389
far field, 19
fast fading, see fading
fast Fourier transform (FFT), 200, see also filter, digital
Federal Communications Commission (FCC), 205
feed (antenna), see antenna
feedback linearization, 544–546
feedforward linearization, 544–546
field effect transistor (FET), see transistor
field programmable gate array (FPGA), 513, 575–576
fifth-generation (5G) cellular, 588, 592
filter, analog
absorptive, 399
allpass, 397
bandpass, 397, 400–402, 407–409, 411, 421, 422
bandstop, 397, 409–411
bandwidth, see bandwidth, analog filters
Bessel, 415
Butterworth, 404–410
Cauer, 415
ceramic, 427
Chebyshev, 410–412
impedance buffer, see buffer
impedance inversion, 283, 420–422, 536
impedance inverter, see impedance inversion
impedance matching, 33–35, 259–283
antennas, 380–390
conjugate matching, 259
double stub, 282
power amplifier loads, 538–539
quarter wave, 282
reflectionless, 259, 279
resistive, 260
single stub, 278–282
two reactance (“L”), 261–265
two-reactance cascades, 268–273
using transformers, 260–261
improved multiband excitation (IMBE), 142
impulse modulation, see modulation
impulse response, channel, see channel impulse response (CIR)
In Band On Channel (IBOC), 583
incoherent demodulation
of AM, 121–122
of FSK, 173
of OOK, 162–163
sensitivity, 126
indirect method (of FM modulation), 135
induction, see inductive degeneration
inductive degeneration, 321–322
infinite impulse response (IIR) filter, see filter
Inmarsat, 142, 587
input matching network (IMN), 301
insertion loss (IL), 236
instantability, 242
instantaneous frequency, 132
integrated circuit (IC), 12, 333–334, 482–484, 519, 575–576
intercept point
second-order, 347–348
third-order, 344–347
interference, 109
interleaving, 180–181
convolutional byte, 192
intermediate frequency (IF), 429
intermediate frequency (IF) sampling, see receiver
intermodulation, 343–348
second-order, 344, 347–348, 476
third-order, 344–347
International Telecommunications Union (ITU), 2, 111
internet of things (IoT), 589
interpolation, 562–563
zero-fill, 562
zero-order hold (ZOH), 562
interstage matching network (ISMN), 333
intersymbol interference (ISI), 86, 147, 185, 187, 198
inverse discrete Fourier transform (IDFT), 200, 559
inverse fast Fourier transform (IFFT), 200, 559
inverse hybrid parameters, 229
ionosphere, 95
layers, 96, 221
Iridium, 142, 188, 473, 587
irregular terrain model (ITM), see path loss
IS-54, 503
ISDB-T, see television
isotropic, see antenna
Johnson noise, see noise
Johnson–Nyquist noise, see noise, Johnson
Jupiter, 110, 111
K-band, 3
Ka-band, 3
Kahn EER, see envelope elimination and restoration
Kahn modulation, see envelope elimination and restoration
Kirchoff’s Voltage Law (KVL), 291
klystron, 285
Ku-band, 3
L-band, 3
land mobile radio (LMR), 31, 5, 6, 55, 69, 134, 137, 142, 210, 345, 353, 366, 379, 462, 474, 552, 585–586
