

## Contents

<i>Preface</i>	<i>page xi</i>
<i>Notation</i>	<i>xiii</i>
<b>1 Meteorology and radar</b>	<b>1</b>
1.1 How it all started	1
1.2 Why radars now	2
1.3 Understanding radar observations	4
1.4 Supplemental readings	7
<b>2 Fundamentals of weather radar measurements</b>	<b>8</b>
2.1 Radar: an active remote sensor	8
2.2 Microwaves and the atmosphere	9
2.3 Propagation in the atmosphere	20
2.4 Basic radar measurements	24
2.5 Weather surveillance	29
<b>3 Radar reflectivity and products</b>	<b>32</b>
3.1 The radar equation	32
3.2 The equivalent reflectivity factor	33
3.3 Reflectivity factor and rain rate	35
3.4 Radar products	38
<b>4 Reflectivity patterns</b>	<b>43</b>
4.1 Types of targets	43
4.2 Precipitation processes: a quick overview	43
4.3 The vertical structure of rain echoes	45
4.4 Radar signatures of widespread rain	48
4.5 Frozen precipitation	52
4.6 Nonprecipitation weather targets	55
4.7 Nonweather targets	58
4.8 An echo identification approach	61
<b>5 Doppler velocity information</b>	<b>65</b>
5.1 Doppler measurements	65
5.2 Information at vertical incidence and profiling	66

5.3 Mean Doppler velocity on PPI displays	76
5.4 Velocity-based products	83
5.5 Data contamination and ambiguities	86
<b>6 The added value of dual polarization</b>	<b>92</b>
6.1 Why polarization matters	92
6.2 Dual-polarization measurables	93
6.3 Signatures and artifacts	102
6.4 Applications	110
<b>7 Convective storm surveillance</b>	<b>115</b>
7.1 A forecast approach	115
7.2 Severe convection and its controls	116
7.3 What to look for	126
<b>8 Monitoring widespread systems</b>	<b>133</b>
8.1 Radar, widespread systems, and threat forecasting	133
8.2 What radar can contribute	136
8.3 A case study of winter storm forecasting	142
8.4 What about tropical cyclones?	145
<b>9 Radar estimation of precipitation</b>	<b>148</b>
9.1 Precipitation monitoring needs	148
9.2 Sources of estimation errors	150
9.3 Radar-based accumulation generation	152
9.4 Uses	165
<b>10 Nowcasting</b>	<b>166</b>
10.1 Nowcasting needs and approaches	166
10.2 The basis for simple nowcasting systems: extrapolation	168
10.3 Precipitation nowcasting	169
10.4 Severe weather nowcasting	171
10.5 Mesoscale modeling after radar data assimilation	174
<b>11 Additional radar measurements and retrievals</b>	<b>180</b>
11.1 Using multiple viewing angles	180
11.2 Multiple Doppler retrievals	183
11.3 Near-surface refractive index	185
11.4 Multiple-frequency and attenuation measurements	186
<b>12 Cloud and spaceborne radars</b>	<b>189</b>
12.1 Cloud radars	189
12.2 Spaceborne radars	195

---

<b>13 What does radar really measure?</b>	201
13.1 The radar system	201
13.2 The weather echo and its fluctuations	208
13.3 Representativeness of measurements	210
13.4 Where do we go from here?	214
<i>Appendix A Mathematics and statistics of radar meteorology</i>	215
A.1 Geometry of ground-based radar measurements	215
A.2 Operations on reflectivity data	221
A.3 Regressions and mapping functions	223
A.4 Variances, covariances, and autocorrelations	227
A.5 Basic radar signal processing	234
<i>References</i>	244
<i>Index</i>	254
