## Subject Index

- assumptions 345–49
- bivariate 331–39
- education and income 339–43
- multivariate 343–45
- voter turnout 349–52
- regression-discontinuity (RD) **118, 132–34**, 159
- regression line 333
- regression line slope 334
- regression to(ward) the mean **127**
- relative frequency **282**
- relevance **25, 28–29**
- reliability tests **52** *see also* precision
- rentier effect 151
- repeated observations **125**
- replicability, data **223, 226–27, 226**, 266
- representativeness, of a sample **54**, 148
- repression effect 151
- repression (Guatemala) 224–25
- research design
  - best possible 7, 160–63
  - causal **95–96, 157–60**
  - data-gathering and **193**
  - general criteria **47, 95–96** *see also* case study
    - design; experimental designs; observational designs
- research methods, writing about 237
- research, nature of 192
- research questions 177
- research topics, choosing 190–92
- researcher effects **106–7, 217–18, 222–23**
- residual **331**
- residual sum of squared errors (RSS) **337**
- resonance **32, 32**
- respondent selection 51–53, 196
- response 85
- response-categories 201
