  universal firefighting and handling robot, 268–269
  Seunghoon Lee, 261
  Shinryo Corporation, 273–274
  Shiraishi, 25
  “Shuttle System” for facade element installation, 168–169
  SIIA Technology AG, 179–180
  Silver, Mike, 70–71
  simulation systems, 295–297
  single-task construction robots (STCRs) analysis and classification network, 6–8
  analysis of composition of, 8–13
  categories of, 14–23
  bricklaying robots, 62–77
  concrete distribution robots, 77–84
  concrete finishing robots, 94–99, 108
  concrete levelling and compaction robots, 86–94
  crane-end effectors, 139–146
  earth and foundation work robots, 23–31
  exoskeletons, wearable robots and assistive devices, 202–214
  facade coating and painting robots, 184–196
  facade installation robots, 155–175
  fireproof coating robots, 237–243
  humanoid construction robots, 196–202
  interior finishing robots, 215–236
  reinforcement production and positioning robots, 39–46
  renovation and recycling robots, 274–290
