The Manual of Musical Instrument Conservation

This is the first book to combine museum-based conservation techniques with practical instructions on the maintenance, repair, adjustment, and tuning of virtually every type of historical musical instrument. As one of the world’s leading conservators of musical instruments, Stewart Pollens gives practical advice on the handling, storage, display, and use of historic musical instruments in museums and other settings, and provides technical information on such wide-ranging subjects as acoustics, cleaning, climate control, corrosion, disinfection, conservation ethics, historic stringing practice, measurement and historic metrology, retouching, tuning historic temperaments, varnish, and writing reports. There are informative essays on the conservation of each of the major musical instrument groups, the treatment of paper, textiles, wood, and metal, as well as historic techniques of wood- and metalworking as they apply to musical instrument making and repair. This is a practical guide that includes equations, formulas, tables, and step-by-step instructions.

Stewart Pollens served between 1976 and 2006 as the conservator of musical instruments at the Metropolitan Museum of Art, where he restored and maintained a collection of over 5000 instruments. He is the author of over eighty scholarly articles and six books, including Forgotten Instruments (1980), The Violin Forms of Antonio Stradivari (1992), The Early Pianoforte (1995; reprinted 2009), Giuseppe Guarneri del Gesù (1998), François-Xavier Tourte: Bow Maker (2001), and Stradivari (2010), which won a 2011 Choice award for “Outstanding Academic Title.” In 1997 he was the recipient of the American Musical Instrument Society’s Nicholas Bessaraboff Prize for The Early Pianoforte, a study of the invention and early history of the pianoforte. He is also a contributor to The New Grove Dictionary of Music and Musicians and writes frequently for The Strad.
The manual of musical instrument conservation / Stewart Pollens.

List of figures

1  Composite trumpet with bell rim by Johann Georg Schmied, Pfaffendorf, 1736, shown prior to restoration. Ex-Rosenbaum collection; Hamamatsu Museum of Musical Instruments 18
2a Anonymous brass bugle before treatment with trisodium EDTA. Collection of the author 26
2b Bugle after treatment and light polishing with a slurry of precipitated chalk 27
3  Dent removal tools, including stakes and hammers. Workshop of the author 29
4  Bending a tube filled with lead or pitch at Boosey & Co. (from Algernon Rose, *Talks with Bandsmen*, 1894) 35
5  Bronze disease on a brass bugle 37
6  Drafted clavichord tangent positions 43
7  X-ray of woodworm damage in a viola 59
8  Turning a graduated ivory cork adjuster for an English flûte 108
10  Gilding tools. Workshop of the author 118
11a Clamping a loose bar in a flamenco guitar by Miguel Angel Senovilla, Madrid, 1998 131
11b Clamping a separation between the back and sides with spool clamps. Private collection 132
12  Copies of tuning-machine parts for a triple-necked guitar by André Augustin Chevrier, Mirecourt, c.1830. The Metropolitan Museum of Art, 1992.117.1 132
13  Exhibition of pianos at the Metropolitan Museum of Art in 1985 141
14  Harper’s knot 143
15a Henry Greenway cross-strung harp, Brooklyn, after 1895. The Metropolitan Museum of Art, 89.4.1235 144
15b Reconstruction of a damaged gilded-compo ornament on the Greenway harp 145
16  Quilling a harpsichord jack 151
17  New parts fitted to a bentside spinet by Baker Harris, London, 1771. Van Cortlandt House Museum, New York 153
18  Fading of varnish on a viola by Carleen Hutchins after one year’s exhibition at a luminance of 75 lux supplied by ceiling-mounted 60-watt quartz-halogen lamp. The Metropolitan Museum of Art, 2002.571 179
19  Two methods of tying lute strings to the bridge. Lute by Stephen Barber and Sandi Harris, collection of the author 196
20  Measuring instruments. Workshop of the author 198
21  Rubber mold with replicas of Broadwood square piano bolt covers 218
22  Cast copies of ormolu mounts from a Viennese fortepiano before cutting off their sprues and electrogilding 219
23  Replacement mother-of-pearl parts ready to be glued into a nineteenth-century qanun soundboard rosette. The Metropolitan Museum of Art, 89.4.330 220
24  Organ tuning and voicing tools. Workshop of the author 226

Modern piano action. Line drawing from William Braid White’s *Piano Tuning and Allied Arts*, 1946

Standard set of piano action regulating tools. Workshop of the author

Setting a sector with a pair of dividers. Ivory sector and drafting instrument collection of the author

Modern piano action. Line drawing from William Braid White’s *Piano Tuning and Allied Arts*, 1946

Standard set of piano action regulating tools. Workshop of the author

Setting a sector with a pair of dividers. Ivory sector and drafting instrument collection of the author

Spectrophotometry of Stradivari violin varnish (1694)

Front of Nicolò Paganini’s Giuseppe Guarneri del Gesù violin showing encrusted rosin. The city of Genoa

Interior of pianoforte by William Frecker, London, 1799. Private collection

William Frecker pianoforte after restoration

Soundboard of a clavichord by J. C. Meerbach, Gotha, 1799, prior to restoration. Moravian College, Bethlehem, PA

Soundboard after restoration

Underside of soundboard before restoration

Underside of soundboard after restoration

Clamping system used to reglue the bridge of the Conrad Graf fortepiano using veneer press screws to apply pressure from above and below the soundboard

Damper mechanism of a Conrad Graf fortepiano showing corroded lead weight

Damper from a Conrad Graf fortepiano shown with replaced lead weight

Padre Antonio Soler’s monochord fretting template from his *Teorica y Practica del Temple para los Organos y Claves*. With permission of the Sociedad Española de Musicología

The author using a monochord fitted with Soler’s fretting template to assist in the tuning of a harpsichord

Werckmeister III tuning instructions from Andreas Werckmeister, *Musicalische Temperatur* (Frankfurt and Leipzig, 1691)

Cross section of Stradivari varnish (1734) showing stratification revealed by epi-fluorescence microscope

Gluing the lower bout of a violin made by Peter Guarneri, Venice, 1742. Collection of Stephanie Chase

Gluing together a violin top

Method of attaching violin string to tuning peg

Stradivari tenor viola neck-foot template showing angled foot. Museo Stradivariano

Original Stradivari bass-bars. Ex-Hill, Collection of James Warren

Overspun string made for a square piano by Alpheus Babcock, c.1820

Graves & Co. clarinet, Winchester, NH, c.1825, before restoration. Ex-Lillian Caplin collection

Turning an ivory ferrule for the Graves & Co. clarinet

The Graves & Co. clarinet after restoration

Steps in making a key from the firm of H. Bettony made for a didactic display at the Metropolitan Museum of Art, c.1900

Woodworking tools. Workshop of the author

Preliminary fitting of replacement inlays in a Broadwood square piano, London, 1801. Private collection

Turned bead-and-reel molding of rosewood for a Broadwood pianoforte

Scraped moldings
